

# AXIS M3905-R Dome Camera

2 MP onboard surveillance

This compact and discreet 2 MP onboard camera complies with transportation-industry regulations including fire-safety for buses. It can withstand vibrations and a wide range of temperatures. Additionally, with AXIS TP3826-E housing this dome camera can be mounted on the outside of a bus. Thanks to Lightfinder and Forensic WDR, it provides details even in challenging light conditions. And with traffic light mode it can distinguish the color of traffic lights in dark scenes. Optional M12 lenses are available to adjust field of view for customized monitoring purposes.

- > Compact, rugged design
- > 88° Horizontal field of view
- > Lightfinder and Forensic WDR
- > Zipstream
- > Traffic Light mode

### AXIS M3905-R Dome Camera

Models	AXIS M3905-R RJ45 AXIS M3905-R M12
Camera	
Image sensor	1/2.9" Progressive scan RGB CMOS Pixel size 2.8 μm
Lens	3.6 mm, F2.0 Horizontal field of view: 88° Vertical field of view: 47° Minimum focus distance: 0.3 m (1 ft) M12 mount, fixed iris See <b>Optional accessories</b> for exchangeable lenses
Minimum	Color: 0.13 lux at 50 IRE F2.0
illumination Shutter speed	With WDR: 1/19000 s to 1/5 s No WDR: 1/17000 s to 1/5 s
Camera angle adjustment	Pan: ±30° Tilt: 15-90° Rotation: ±175°
System on chip	
Model	S6LM55
	1024 MB RAM, 512 MB Flash
Memory Video	ונפון עואראנאין איז אוראין אויא איזאין איז
Video	H.264 (MPEG-4 Part 10/AVC) Baseline, Main and High Profiles
compression	H.265 (MPEG-H Part 2/HEVC) Main Profile Motion JPEG
Resolution	16:9: 1920x1080 to 640X360
	<b>16:10:</b> 1280x800 to 640x400 <b>4:3:</b> 1280x960 to 320x240
Frame rate	Up to 25/30 fps (50/60 Hz) in all resolutions
	Capture mode 2MP 1220x1080 (16:9) @25/30 fps Capture mode 2MP 1220x720 (16:9) @25/30 fps
Video streaming	Up to 4 unique and configurable video streams <sup>a</sup> Multiple, individually configurable streams in H.264, H.265 and Motion JPEG Axis Zipstream technology in H.264 and H.265 Controllable frame rate and bandwidth VBR/ABR/MBR H.264 and H.265 Video streaming indicator
WDR	Forensic WDR: Up to 120 dB depending on scene
Noise reduction	Spatial filter (2D noise reduction) Temporal filter (3D noise reduction)
Image settings	Compression, brightness, sharpness, contrast, white balance, Forensic WDR, exposure control, exposure zones, fine tuning of behavior at low light, rotation: 0°, 90°, 180°, 270° including Corridor Format, dynamic overlay, 32 individual polygonal privacy mask, mirroring of images Scene profiles: forensic, vivid, traffic overview
Image processing	Axis Zipstream, Forensic WDR, Lightfinder
Pan/Tilt/Zoom	Digital PTZ, preset positions, guard tour, control queue
Network	
Network protocols	IPv4, IPv6 USGv6, HTTP, HTTPS <sup>c</sup> , HTTP/2, TLS <sup>c</sup> , QoS Layer 3 DiffServ, FTP, SFTP, CIFS/SMB, SMTP, mDNS (Bonjour), UPnP <sup>®</sup> , SNMP v1/v2c/v3 (MIB-II), DNS/DNSv6, DDNS, NTP, RTSP, RTP, SRTP, TCP, UDP, IGMPv1/v2/v3, RTCP, ICMP, DHCPv4/v6, ARP, SOCKS, SSH, LLDP, CDP, MQTT v3.1.1, Syslog, Link-Local address (ZeroConf)
System integra	tion
Application Programming Interface	Open API for software integration, including VAPIX® and AXIS Camera Application Platform (ACAP); specifications at <i>axis.com/developer-community</i> . ACAP includes Native SDK and Computer VisionSDK. AXIS Video Hosting System (AVHS) with One-Click Connection One-click cloud connection ONVIF® Profile G, ONVIF® Profile M, ONVIF® Profile S and ONVIF® Profile T, specification at <i>onvif.org</i>
Video management systems	Compatible with AXIS Companion, AXIS Camera Station, video management software from Axis' Application Development Partners available at <i>axis.com/vms</i>

Onscreen controls	Video streaming indicator Wide dynamic range Privacy masks	
Event conditions	Device status: above operating temperature, above or below operating temperature, below operating temperature, IP address removed, network lost, new IP address, storage failure, system ready, within operating temperature Edge storage: recording ongoing, storage disruption I/O: manual trigger, virtual input MOIT subscribe Scheduled and recurring: scheduled event Video: average bitrate degradation, live stream open, tampering	
Event actions	Guard tours Upload images or video clips: FTP, HTTP, HTTPS, SFTP, email and network share Notification: HTTP, HTTPS, TCP and email Overlay text Preset positions Record video: SD card and network share SNMP trap messages WDR mode MQTT publish

 d. In the LTS track for firmware upgrades, improvements are focused on cybersecurity and stability. New features are available in the firmware from the Active track

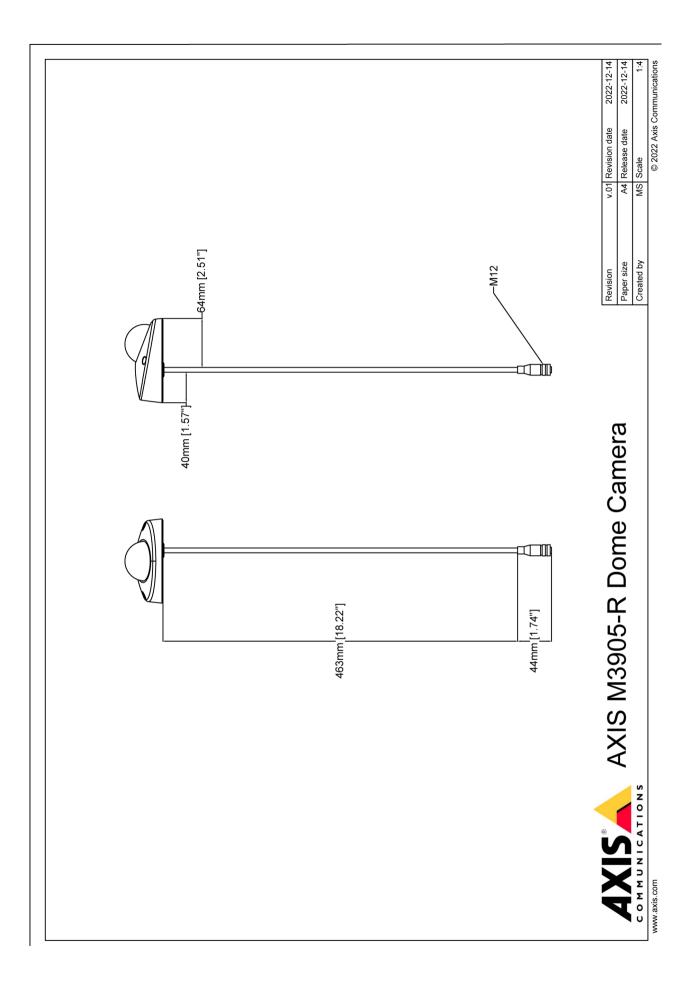

## Detect, Observe, Recognize, Identify (DORI)

	DORI definition	Distance
Detect	25 px/m (8 px/ft)	50.6 m (166.0 ft)
Observe	63 px/m (19 px/ft)	20.1 m (65.9 ft)
Recognize	125 px/m (38 px/ft)	10.1 m (33.1 ft)
Identify	250 px/m (76 px/ft)	5.1 m (16.7 ft)

Axis calculates the DORI values using pixel densities for different use cases as recommended by the EN-62676-4 standard. The calculations use the center of the image as the reference point and consider lens distortion. The possibility to recognize or identify a person or object depends on factors such as object motion, video compression, lighting conditions, and camera focus. Use margins when planning. The pixel density varies across the image, and the calculated values can differ from the distances in the real world.

## Key features and technologies

#### **Built-in cybersecurity**

Axis Edge Vault is a secure cryptographic compute module (secure module or secure element) in which the Axis device ID is securely and permanently installed and stored.

Secure boot is a boot process that consists of an unbroken chain of cryptographically validated software, starting in immutable memory (boot ROM). Being based on signed firmware, secure boot ensures that a device can boot only with authorized firmware. Secure boot guarantees that the Axis device is completely clean from possible malware after resetting to factory default.

Signed firmware is implemented by the software vendor signing the firmware image with a private key, which is secret. When firmware has this signature attached to it, a device will validate the firmware before accepting and installing it. If the device detects that the firmware integrity is compromised, it will reject the firmware upgrade. Axis signed firmware is based on the industry-accepted RSA public-key encryption method.

#### Zipstream

The Axis Zipstream technology preserves all the important forensic in the video stream while lowering bandwidth and storage requirements by an average of 50%. Zipstream also

includes three intelligent algorithms, which ensure that relevant forensic information is identified, recorded, and sent in full resolution and frame rate.

#### Forensic WDR

Axis cameras with wide dynamic range (WDR) technology make the difference between seeing important forensic details clearly and seeing nothing but a blur in challenging light conditions. The difference between the darkest and the brightest spots can spell trouble for image usability and clarity. Forensic WDR effectively reduces visible noise and artifacts to deliver video tuned for maximal forensic usability.

#### Lightfinder

The Axis Lightfinder technology delivers high-resolution, full-color video with a minimum of motion blur even in near darkness. Because it strips away noise, Lightfinder makes dark areas in a scene visible and captures details in very low light. Cameras with Lightfinder discern color in low light better than the human eye. In surveillance, color may be the critical factor to identify a person, an object, or a vehicle.
