

# **AXIS Q3626-VE Dome Camera**

## Advanced 4 MP dome with remote adjustment

With remote pan-tilt-roll-zoom functionality, this top-of-the-line camera lets you easily adjust and readjust the camera view over the network. Thanks to Lightfinder 2.0 and Forensic WDR, it delivers outstanding image quality and great detail even in challenging light or near darkness. Based on the latest Axis system-on-chip, it supports advanced analytics based on deep learning on the edge. For instance, AXIS Object Analytics lets you detect and classify moving objects. This robust, IK10-rated camera comes enclosed in a metal casing. Furthermore, Axis Edge Vault safeguards your device and offers secure key storage with FIPS 140-2 level 2 certification.

- > Outstanding image quality in 4 MP
- > Remote adjustment of the camera angle
- > Analytics with deep learning
- > Electronic image stabilization
- > Axis Edge Vault safeguards device

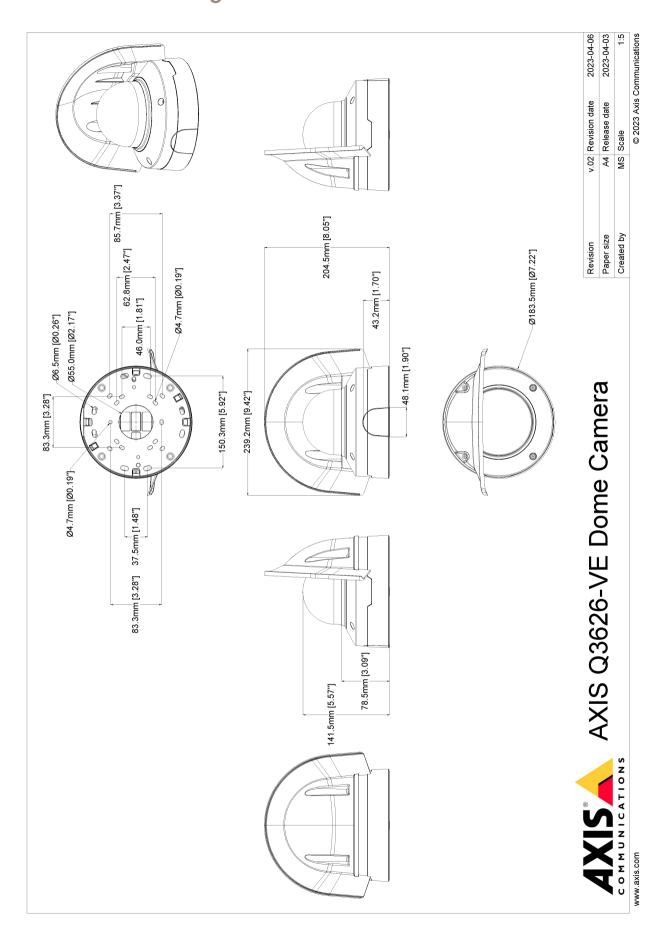

# AXIS Q3626-VE Dome Camera

Camora		Moturerly	
Image sensor	1/1.8" progressive scan RGB CMOS	Network Network	IPv4, IPv6 USGv6, ICMPv4/ICMPv6, HTTP, HTTPSb, HTTP/2, TLSb,
	Pixel size 2.9 μm	protocols	QoS Layer 3 DiffServ, FTP, SFTP, CIFS/SMB, SMTP, mDNS (Bonjour), UPnP*, SNMP v1/v2c/v3 (MIB-II), DNS/DNSv6, DDNS, NTP, NTS, RTSP, RTP, SRTP/RTSPS, TCP, UDP, IGMPv1/v2/v3, RTCP, ICMP,
Lens	Varifocal, 4.3–8.6 mm, F1.5–2.4 Horizontal field of view: 103°–52°		
	Vertical field of view: 56°–30° Minimum focus distance: 0.5 m (1.6 ft)		DHCPv4/v6, ARP, SSH, LLDP, CDP, MQTT v3.1.1, Secure syslog (RFC 3164/5424, UDP/TCP/TLS), Link-Local address (ZeroConf),
	Minimum focus distance: 0.5 m (1.6 ft) IR corrected, remote zoom and focus, P-Iris control		IEEE 802.1X (EAP-TLS), IEEE 802.1AR
Day and night	Automatic IR-cut filter	System integro	rtion
Minimum	Color: 0.06 lux at 50 IRE, F1.5	Application Programming Interface	<b>Programming</b> and AXIS Camera Application Platform (ACAP); specifications at
illumination	B/W: 0.01 lux at 50 IRE, F1.5		
Shutter speed	1/91000 s to 1 s with 50 Hz		
Camera angle adjustment	Pan ±190°, tilt -8 to +75°, roll ±97°		
System on chip (SoC)			Support for Session Initiation Protocol (SIP) for integration with
Model	ARTPEC-8		Voice over IP (VoIP) systems, peer to peer or integrated with SIP/PBX.
Memory	2048 MB RAM, 8192 MB Flash	Video	Compatible with AXIS Companion, AXIS Camera Station, video
Compute capabilities	Deep learning processing unit (DLPU)	management systems	management software from Axis' Application Development Partners available at axis.com/vms
Video		Onscreen	Autofocus
Video compression	H.264 (MPEG-4 Part 10/AVC) Baseline, Main and High Profiles H.265 (MPEG-H Part 2/HEVC) Main Profile Motion JPEG	controls	Electronic image stabilization Day/night shift Defogging
Resolution	<b>16:9:</b> 2688x1512 to 160x90		Heater Media clip
	16:10: 1280x800 to 160x100 4:3: 2016x1512 to 160x120		Privacy mask
Frame rate	With Forensic WDR: Up to 25/30 fps (50/60 Hz) in all resolutions		Video streaming indicator Wide dynamic range
	No WDR: Up to 50/60 fps (50/60 Hz) in all resolutions	Event conditions	
Video streaming	Up to 20 unique and configurable video streams <sup>a</sup> Axis Zipstream technology in H.264 and H.265		
	Controllable frame rate and bandwidth		
	VBR/ABR/MBR H.264/H.265 Low latency mode		
	Video streaming indicator		
Signal-to-noise ratio	>55 dB		
WDR	Forensic WDR: Up to 120 dB depending on scene		
Multi-view streaming	Up to 8 individually cropped out view areas		
Noise reduction	Spatial filter (2D noise reduction) Temporal filter (3D noise reduction)	Event actions	Audio clips: play, stop Calls: answer call, end SIP call, make SIP call Day-night mode
Image settings	Saturation, contrast, brightness, sharpness, white balance, day/night threshold, local contrast, tone mapping, exposure mode, exposure zones, defogging, barrel distortion correction, electronic image stabilization, compression, rotation: 0°, 90°, 180°, 270° including corridor format, mirroring, dynamic text and image overlay, polygon privacy mask,target aperture		
			Defog mode I/O: toggle I/O while the rule is active
			MQTT: publish
			Notification: HTTP, HTTPS, TCP and email Overlay text
Image processing	Axis Zipstream, Forensic WDR, Lightfinder 2.0		Pre- and post-alarm video or image buffering for recording or upload
Pan/Tilt/Zoom	Digital PTZ with preset positions		Recordings: SD card and network share
Audio	ACC automatic ratio control		SNMP traps: send, send while the rule is active Status LED: flash
Audio features	AGC automatic gain control Network speaker pairing		Upload of images or video clips: FTP, SFTP, HTTP, HTTPS, network share and email
Audio streaming	Configurable duplex: Two-way (half duplex, full duplex)	Built-in	WDR mode Pan-tilt-roll: designed to withstand at least 500 full movement
Audio input	10-band graphic equalizer Input for external unbalanced microphone, optional 5 V microphone power Digital input, optional 12 V ring power Unbalanced line input	installation aids	cycles, autoroll, pixel counter, remote zoom and focus, level grid
		Analytics	
		AXIS Object Analytics	Object classes: humans, vehicles (types: cars, buses, trucks, bikes) Features: line crossing, object in area, crossline counting BETA, occupancy in area BETA, time in area BETA Up to 10 scenarios
Audio output	Output via network speaker pairing	,,	
Audio encoding	24bit LPCM 48 kHz, AAC-LC 8/16/32/44.1/48 kHz, G.711 PCM		
,g	8 kHz, G.726 ADPCM 8 kHz, Opus 8/16/48 kHz Configurable bit rate		Metadata visualized with trajectories, color-coded bounding
			boxes and tables Polygon include/exclude areas
			Perspective configuration ONVIF Motion Alarm event

Metadata	Object data: Classes: humans, faces, vehicles (types: cars, buses, trucks, bikes), license plates Confidence, position Event data: Producer reference, scenarios, trigger conditions	Connectors	Network: Shielded RJ45 10BASE-T/100BASE-TX/1000BASE-T POE I/O: 4-pin 2.5 mm terminal block for two configurable supervised inputs / digital outputs (12 V DC output, max load 50 mA) Audio: 3.5 mm mic/line in	
Applications	Included AXIS Object Analytics, AXIS Video Motion Detection, active tampering alarm, audio detection AXIS Live Privacy Shield Support for AXIS Camera Application Platform enabling	Storage	Power: DC input, terminal block  Support for microSD/microSDHC/microSDXC card Support for SD card encryption (AES-XTS-Plain64 256bit) Recording to network-attached storage (NAS) For SD card and NAS recommendations see axis.com

This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit. (openssl.org), and cryptographic software written by Eric Young (eay@cryptsoft.com).		

# Dimension drawing

## Key features and technologies

#### Pan-tilt-roll-zoom (PTRZ)

PTRZ functionality includes the ability of a camera to rotate around its vertical, lateral, and longitudinal axes. The camera's focal length is adjustable to achieve a narrower or wider field of view. Thanks to the remote functionality, you can quickly adjust and readjust the camera view remotely over the network, saving time and effort. PTRZ functionality also gives you the flexibility to make future adjustments easily, ensuring less disruption, less downtime, and that no dispatched technician is needed.

#### **AXIS Object Analytics**

AXIS Object Analytics is a preinstalled, multifeatured video analytics that detects and classifies humans, vehicles, and types of vehicles. Thanks to Al-based algorithms and behavioral conditions, it analyzes the scene and their spatial behavior within – all tailored to your specific needs. Scalable and edge-based, it requires minimum effort to set up and supports various scenarios running simultaneously.

### Axis Edge Vault

Axis Edge Vault is the hardware-based cybersecurity platform that safeguards the Axis device. It offers features to guarantee the device's identity and integrity and to protect your sensitive information from unauthorized access.

Establishing the root of trust starts at the device's boot process. In Axis devices, the hardware-based mechanism secure boot verifies the operating system (AXIS OS) that the device is booting from. AXIS OS, in turn, is cryptographically signed (signed firmware) during the build process. Secure boot and signed firmware tie into each other and ensure that the firmware has not been tampered with during the lifecycle of the device and that the device only boots from authorized firmware. This creates an unbroken chain of cryptographically validated software for the chain of trust that all secure operations depend on.

From a security aspect, the secure keystore is the critical building-block for protecting cryptographic information used for secure communication (IEEE 802.1X, HTTPS, Axis device ID, access control keys etc..) against malicious extraction in the event of a security breach. The secure keystore is provided through a Common Criteria and/or FIPS 140 certified hardware-based cryptographic computing module. Depending on security requirements, an Axis device can have either one or multiple such modules, like a TPM 2.0 (Trusted Platform Module) or a secure element, and/or a system-on-chip (SoC) embedded Trusted Execution Environment (TEE).

Signed video ensures that video evidence can be verified as untampered without proving the chain of custody of the video file. Each camera uses its unique video signing key, which is securely stored in the secure keystore, to add a signature into the video stream. This allows video to be traced back to the Axis camera from where it originated, so it's possible to verify that the footage has not been tampered with after it left the camera.

To read more about Axis Edge Vault, go to axis.com/solutions/edge-vault.

### Electronic image stabilization

Electronic image stabilization (EIS) provides smooth video in situations where a camera is subject to vibrations. Built-in gyroscopic sensors continuously detect the camera's movements and vibrations, and they automatically adjust the frame to ensure you always capture the details you need. Electronic image stabilization relies on different algorithms for modeling camera motion, which are used to correct the images.

#### Forensic WDR

Axis cameras with wide dynamic range (WDR) technology make the difference between seeing important forensic details clearly and seeing nothing but a blur in challenging light conditions. The difference between the darkest and the brightest spots can spell trouble for image usability and clarity. Forensic WDR effectively reduces visible noise and artifacts to deliver video tuned for maximal forensic usability.

#### Lightfinder

The Axis Lightfinder technology delivers high-resolution, full-color video with a minimum of motion blur even in near darkness. Because it strips away noise, Lightfinder makes dark areas in a scene visible and captures details in very low light. Cameras with Lightfinder discern color in low light better than the human eye. In surveillance, color may be the critical factor to identify a person, an object, or a vehicle.

### **Zipstream**

The Axis Zipstream technology preserves all the important forensic in the video stream while lowering bandwidth and storage requirements by an average of 50%. Zipstream also includes three intelligent algorithms, which ensure that relevant forensic information is identified, recorded, and sent in full resolution and frame rate.
