Compact design ideal for use at a counter desk

The fi-70F scans documents in a mere second (A6 portrait 200/300 dpi), and guarantees short wait times with quick startup times of half a second.

Compact design to scan anywhere

The fi-70F scans identification and small cards of all types and sizes – such as driver's licenses, passports, insurance cards, credit cards, and small survey forms. It is capable of drawing power from computer USB ports, and can be used even in environments with no AC power sources. Comes in a truly compact design, the fi-70F fits in cramped spaces, making it the ideal scanner for countertops at banks and car rental offices, as well as receptions at hotels, hospitals, and retail environments. Perform quick scanning operations naturally while conversing with your customers.

Boosted productivity with easier operation

Scan and save images with just one touch of the button. Coverless scanning capabilities also allow scanning without repetitive opening and closing of the cover before, after, and between each scan, making scanning tasks much more efficient. Various intelligent image processing functions like Automatic Cropping, Automatic Rotation, and De-skew enable you to scan high quality images confidently without adjusting any settings.

Environment-friendly specifications

The fi-70F is designed to incorporate advanced energy efficient technologies. Not only does it comply with ENERGY STAR and RoHS, but its entire manufacturing process complies with strict environment regulations.

Advanced software for maximized efficiency

Bypass the inconvenience of making fine adjustments to OCR settings with the PaperStream IP scanner driver, supporting both TWAIN and ISIS. The software automatically converts scanned images into exceptionally clean images, supporting OCR accuracy even when scanning documents with background patterns or wrinkled and soiled documents. Working with the driver, PaperStream Capture effectively and efficiently feeds information into users' organizations workflow with its various batch scanning capture features.
