

# **Service Manual - P2724DEB**

**Version: 01**

**Date: 2023/10/18**

## 1. Important Safety Notice

### Product Announcement:

This product is certificated to meet RoHS Directive and Lead-Free produced definition. Using approved critical components only is recommended when the situation to replace defective parts. Vender assumes no liability express or implied, arising out of any unauthorized modification of design or replacing non-RoHS parts. Service providers assume all liability.

### Qualified Repairability:

Proper service and repair is important to the safe, reliable operation of all series products. The service providers recommended by vender should be aware of notices listed in this service manual in order to minimize the risk of personal injury when perform service procedures. Furthermore, the possible existed improper repairing method may damage equipment or products. It is recommended that service engineers should have repairing knowledge, experience, as well as appropriate product training per new model before performing the service procedures.

### NOTICE:

- ! To avoid electrical shocks, the products should be connected to an authorized power cord, and turn off the master power switch each time before removing the AC power cord.
- ! To prevent the product away from water or expose in extremely high humidity environment.
- ! To ensure the continued reliability of this product, use only original manufacturer's specified parts.
- ! To ensure following safety repairing behavior, put the replaced part on the components side of PWBA, not solder side.

- ! To ensure using a proper screwdriver, follow the torque and force listed in assembly and disassembly procedures to unscrew screws.
- ! Using Lead-Free solder to well mounted the parts.
- ! The fusion point of Lead-Free solder requested in the degree of 220°C.

## 2. Exploded view diagram with list of items

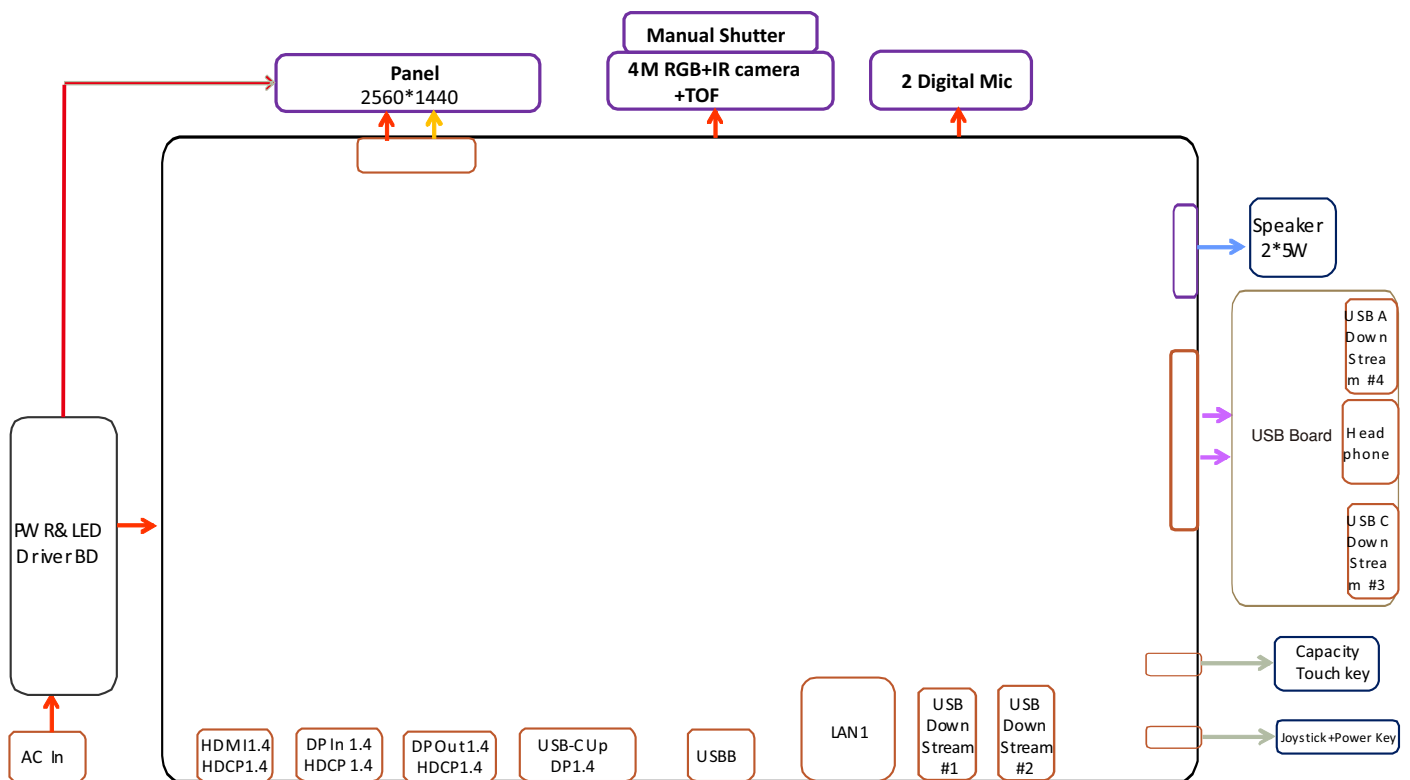

Item	Description	Q'ty	Remark
1	Front Trim	1	For EMEA Only, not for other regions
2	Touch Function Board	1	
3	Panel	1	
4	Power Mylar	1	
5	Power Board	1	
6	Interface Board	1	
7	Main Chassis ASSY	1	
8	Middle Frame	1

15	Riser ASSY	1	
16	Base ASSY	1	
17	Power cable (varies by country)	1	See "NOTE"
18	DisplayPort 1.8 M cable (DisplayPort to DisplayPort)	1	See "NOTE"
19	USB 3.2 Gen1 1.8 M Type A to Type B cable upstream cable	1	See "NOTE"
20	USB-C® Gen2 1.0 M cable (C to C)	1	See "NOTE"

### NOTE:

For replacement of power cord, connectivity cable and external power supply (if applicable), contact Dell:

1. Go to <https://www.dell.com/support>.
2. Verify your country or region in the Choose A Country/Region drop-down menu at the bottom-right corner of the page.
3. Click Contact Us next to the country dropdown.
4. Select the appropriate service or support link based on your need.
5. Choose the method of contacting Dell that is convenient for you.

### 3. Wiring Connectivity Diagram

#### 4. How to connect and disconnect power cable/ connectivity cable

**WARNING:** To change power cable/ connectivity cable, switch off power before unplugging the cable and replugging in required cable.

#### Connecting the HDMI cable (Optional)

#### Connecting the DP cable

#### 4. How to connect and disconnect power cable/ connectivity cable

### Connecting the monitor for DP Multi-Stream Transport (MST) function

### Connecting the USB cable

### Connecting the USB-C Cable (A to C) (Optional)

#### 4. How to connect and disconnect power cable/ connectivity cable

##### Connecting the USB Type-C cable (C to C)

##### Connecting the monitor for USB-C Multi-Stream Transport (MST) function

##### Connecting the monitor for RJ45 Cable (Optional)

## 5. Disassembly and Assembly Procedures

### NOTE:

This “Disassembly and Assembly Procedures” is for EMEA only, not for other regions. Please note that Dell will deem warranty void if any disassembly is done on the monitors.

### Tool Required:

List the type and size of the tools that would typically can be used to disassemble the product to a point where components and materials requiring selective treatment can be removed.

### Tool Description:

- Screwdriver(Phillip head) #1
- Screwdriver(Phillip head) #2
- Penknife
- Soldering iron and absorber

### 5.1 Disassembly Procedures:

Remove the monitor stand base:

S1

1. Place the monitor on a soft cloth or cushion.
2. Press and hold the stand-release button.
3. Lift the stand up and away from the monitor.

S2

Use a Philips-head screwdriver to remove 4pcs screws for unlocking mechanisms. Remove DP cap. (No.1~4 screw size=M4x11; Torque=11±1kgfxcmm)

Wedge your fingers between rear cover and the middle bezel on the corners of the top side of the monitor to release the rear cover, then use one hand to press the middle bezel, the other hand to pull up carefully the rear cover in order of arrow preference for unlocking mechanisms of rear cover.

S3

S4

Lift the rear cover up carefully. Disconnect the joystick key cable from the connector of the main board, and then remove the rear cover and put it aside for later disassembling.

S5

Use a Philips-head screwdriver to remove 3pcs screw for unlocking the joystick board, then tear off all the tapes and release the joystick cable.

(No.1~3 screw size=M2x3.3, Torque=1±0.2kgfxcmm)

S6

Disconnect the touch cable away from the connector of the main board, then tear off 2pcs aluminum foil and 3pcs acetate tape.

## 5. Disassembly and Assembly Procedures

S7

Tear off 3pcs acetate tapes , then disconnect the speakers' cable away from the connector of the main board, and then use a Philips-head screwdriver to remove 6pcs screws for unlocking the two speakers with the middle frame, and remove the speakers.  
(No.1~6 Screw size= M3x6, Torque=4~5kgfxcM)

S8

Disconnect the panel lamp cable away from the interface board and panel module, then tear off the tape and remove the panel lamp cable. Disconnect the camera cable away from the connector of the interface board.

S9

Tear off 1pcs aluminum foil for releasing the USB cable. Use a Philips-head screwdriver to remove 1pcs screw for unlocking the USB unit, then disconnect the two USB cables away from the connectors of interface board. Release the USB board away from the hook of the middle frame.  
(No.1 screw size=M3x3,5, Torque=4±0.5 kgfxcM)

S10

Use a Philips-head screwdriver to remove 2pcs screws for unlocking the middle frame with panel module and front bezel.  
(No.1~2screw size=M2x3.3,Torque=1±0.2kgfxcM)

S11

Use a Philips-head screwdriver to remove 4pcs screws for unlocking the camera unit.  
(No.1~4 Screw size= M3x8, Torque=6±0.5kgfxcM)

S12

Use a Philips-head screwdriver to remove 4pcs screws for unlocking the bracket chassis with the panel, then disconnect the touch cable.  
(No.1~4 Screw size= M3x4, Torque=5±1kgfxcM )

S13

Disconnect the LVDS cables away from the connectors of the panel module, then lift up and take away the bracket chassis and put it on a protective cushion.

## 5. Disassembly and Assembly Procedures

S14

Release the assembled camera unit from the probers of the middle frame and put it aside for later disassembling.

S15

Tear off 2pcs aluminum foil to release the Mic boards  
Use a Philips-head screwdriver to remove 13pcs screws for unlocking the middle frame with the panel.  
(No.1~12 screw size=M3x4,Torque=3±0.5kgfxcM)

S16

Lift up the middle bezel away from the pane module, then put it on a cushion foam for later disassembling.

S17

Use a Philips-head screwdriver to remove 4pcs screws for unlocking the left and right Mic boards with the middle frame, then release the two Mic boards away from the middle frame.

(No.1~4 screw size=M2x3.3,Torque=1±0.2kgfxcM)

S18

Release the touch key cable away from the panel, then disassemble the front bezel with the panel, then tear off the mylar tape and release the touch board.

## 5. Disassembly and Assembly Procedures

S19

Remove the Mylar tape from the hooks of the bracket chassis.

S20

Use a Philips-head screwdriver to remove 8pcs screws for interface board and power board with the bracket chassis module.

(No.1 screw size=M4x8, Torque=7.5 0.5kgfxcn;  
No.2~8 screw size=M4x8, Torque=7.5±0.5kgfxcn)

S21

Remove the power board and interface board from the bracket chassis module carefully, and then disconnect all of the cables.

## 5. Disassembly and Assembly Procedures

### 5.2 Assembly Procedures:

S1

Place a bracket chassis base on a protective cushion, then stick 7pcs Silicon sheets on the positions as the picture below shown.

S2

Turn over a power board and put the power board into the bracket chassis, settle the panel power cable to the correct position.

S3

Take 1pcs interface board, connect 2pcs LVDS cable to the connectors of the interface board, then connect the cable of the power board to the connector of the interface board. Turn over the interface board and locate it into the main chassis. Use a Philips-head screwdriver to tighten 8pcs screws for locking the interface board and power board.

(No.1 screw size=M4x8, Torque=7.5±0.5kgfxcn;  
No.2~8 screw size=M4x8, Torque=7.5±0.5kgfxcn)

S4

Turn over the bracket chassis, and then take 1pcs black mylar to insert the hooks of the bracket chassis to cover the power board.

S5

Panel preparation: Take out 1pcs panel module from the carton, remove the protective film by tearing off the tapes, then Examine the panel surface according to inspection criteria. Turn over the panel to place screen faced down for later assembling.

S6

Take 1pcs touch board, 1pcs key cable and 1pcs front bezel, then connect the key cable to the connector of the board. Tear off the release paper and paste the touch board on the correct position of the front bezel, then paste 1pcs mylar to cover the touch board. Move the front bezel close to the panel module, then assemble the front bezel with the panel module.

## 5. Disassembly and Assembly Procedures

S7

Take 1pcs left Mic board, 1pcs right Mic board and some essential cables, then assemble 1pcs rubber with left Mic board and assemble 1pcs rubber with right Mic board, then connect left Mic board right Mic board with cables as the picture below shown.

S8

Take 1pcs middle frame with speaker cover, then put the middle frame and locate the Mic boards to the correct positions, then use a Philips-head screwdriver to lock 4pcs screws for locking the left and right Mic boards as the picture below shown.

(No.1~4 screw size=M2x3.3, Torque=1±0.2kgfxcmm)

S9

Tear off the release paper on the back of the touch cable and then fix the cable on the back of the panel. Move the middle frame with Mic boards close to the panel unit, then assemble the middle bezel unit with the front bezel and panel module.

S10

Use a Philips-head screwdriver to lock 13pcs screws for locking the middle frame unit with the panel, then paste 2pcs aluminum foil to fix the Mic board.

(No.1~13 screw size=M3x4, Torque=3±0.5kgfxcmm)

## 5. Disassembly and Assembly Procedures

S11

Take 1pcs camera unit assembled in LCM line, then locate the camera unit into the pins of the middle frame.

S12

Move the bracket and put it on the back of panel, then connect the 2pcs LVDS cables to the connectors of the panel module.

S13

Use a Philips-head screwdriver to tighten 4pcs screws for locking the bracket with the panel, then take 1pcs camera cable to connect camera with main board.

(No.1~4 Screw size= M3x4, Torque=5±1kgfxcn )

S14

Use a Philips-head screwdriver to tighten 4pcs screws for locking the camera unit with the middle frame.

(No.1~4 Screw size= M3x8, Torque=6±0.5kgfxcn)

S15

Use a Philips-head screwdriver to tighten 2pcs screws for locking the middle frame with panel module and front bezel.

(No.1~2screw size=M2x3.3,Torque=1±0.2kgfxcn)

S16

Take 1pcs USB board, 2pcs connective cables and 1pcs conductive foam. Connect the 2pcs cables to the connectors of the USB board, then turn over the board and paste the conductive foam on the back of the USB board as the picture below shown.

## 5. Disassembly and Assembly Procedures

S17

Locate the USB board into the hook of the middle frame. Use a Philips-head screwdriver to tighten 1pcs screw for locking the USB unit with the middle frame, then connect the two USB cables to the connectors of main board, then fix the cable with 1pcs aluminum foil as the picture below shown.  
(No.1 screw size=M3x3.5, Torque=4±0.5 kgfxcM)

S18

Take 1pcs panel lamp cable to connect the main board with panel, then fix the lamp cable on the back of the panel with tape. Connect the camera cable to the connector of the main board.

S19

Take a pair of speakers to locate the probers, then Use a Philips-head screwdriver to tighten 6pcs screws for locking the two speakers with the middle frame, and then connect the speaker's cable to the connector of the main board and fix the cables and with 3pcs acetate tape as the picture below.  
(No.1~6 Screw size= M3x6, Torque=4~5kgfxcM)

S20

connect the touch cable to the connector of the interface board, then paste 2pcs aluminum foil on the specific positions for fixing the bracket and panel connectors as the picture below shown.

S21

Take 1pcs joystick key, 1pcs joystick board and 1pcs key cable, then assemble the joystick key with board and connect the key cable to the connector of the key board.

S22

Locate the joystick board to the correct position of the rear cover, then use a Philips-head screwdriver to tighten 3pcs screws for locking the joystick board with rear cover, fix the key cable on the rear cover by 3pcs adhesive tapes on the back of the cable.  
(No.1~2 screw size=M2x3.3,Torque=1±0.2kgfxcM)

## 5. Disassembly and Assembly Procedures

S23

Move the assembled rear cover close to the panel unit, then connect the joystick cable to the connector of interface board. Put down the rear cover and push the rear cover on the positions marked as the picture below shown for mechanisms engagement.

S24

Use a Philips-head screwdriver to tighten 4pcs screws for locking the rear cover with the unit. Paste 2pcs label on the specific positions.

(No.1~4 screw size=M4x11; Torque=11±1kgfxcn)

S25

Insert a DP out Cap into the DP out connector. Take a stand base close to the monitor. Fit the two tabs on the upper part of the stand into the grooves, and then lower the stand so that the monitor mounting area snaps onto the stand.

S26

Lift up the monitor to check the gap between the front bezel and the panel, then provide power supply and a video signal to the monitor, then turn on the monitor for functionality check.

## 6. Trouble Shooting Instructions

# Troubleshooting

 **WARNING:** Before you begin any of the procedures in this section, follow the [Safety Instructions](#).

## Self-test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

1. Turn off both your computer and the monitor.
2. Unplug the video cable from the back of the computer. To ensure proper Self-Test operation, remove all digital and the analog cables from the back of computer.
3. Turn on the monitor.

The floating dialog box should appear on-screen (against a black background), if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.

or

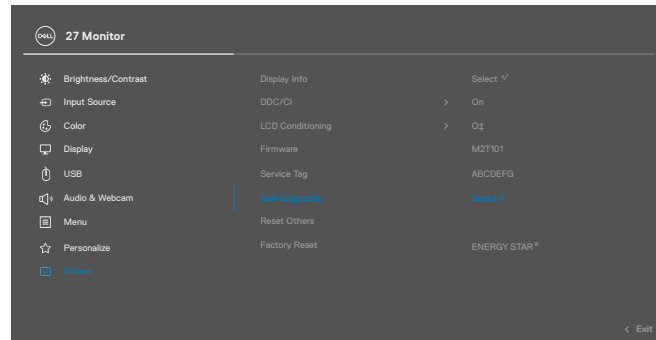

4. This box also appears during normal system operation if the video cable becomes disconnected or damaged.
5. Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.

If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

## 6. Trouble Shooting Instructions

### Built-in diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

#### To run the built-in diagnostics:

1. Ensure that the screen is clean (no dust particles on the surface of the screen).
2. Select OSD items of Self-Diagnostics in Others feature.
3. Press the joystick button to start the diagnostics. A gray screen is displayed.
4. Observe if the screen has any defects or abnormalities.
5. Toggle the joystick once again until a red screen is displayed.
6. Observe if the screen has any defects or abnormalities.
7. Repeat steps 5 and 6 until the screen displays green, blue, black, and white colors. Note any abnormalities or defects.

The test is complete when a text screen is displayed. To exit, toggle the joystick control again.

If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the video card and computer.

## 6. Trouble Shooting Instructions

### Common Problems

The following table contains general information about common monitor problems you might encounter and the possible solutions:

Common Symptoms	What you experience	Possible solutions
No Video/ Power LED off	No picture	<ul style="list-style-type: none"><li>• Ensure that the video cable connecting the monitor and the computer is properly connected and secure.</li><li>• Verify that the power outlet is functioning properly using any other electrical equipment.</li><li>• Ensure that the power button is depressed fully.</li><li>• Ensure that the correct input source is selected in the <b>Input Source</b> menu.</li></ul>
No Video/ Power LED on	No picture or no brightness	<ul style="list-style-type: none"><li>• Increase brightness and contrast controls via OSD.</li><li>• Perform monitor self-test feature check.</li><li>• Check for bent or broken pins in the video cable connector.</li><li>• Run the built-in diagnostics.</li><li>• Ensure that the correct input source is selected in the <b>Input Source</b> menu.</li></ul>
Missing Pixels	LCD screen has spots	<ul style="list-style-type: none"><li>• Cycle power on-off.</li><li>• Pixel that is permanently off is a natural defect that can occur in LCD technology.</li><li>• For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: <a href="https://www.dell.com/pixelguidelines">https://www.dell.com/pixelguidelines</a>.</li></ul>
Stuck-on Pixels	LCD screen has bright spots	<ul style="list-style-type: none"><li>• Cycle power On-Off.</li><li>• Pixel that is permanently off is a natural defect that can occur in LCD technology.</li><li>• For more information on Dell Monitor Quality and PixelPolicy, see Dell Support site at: <a href="https://www.dell.com/pixelguidelines">https://www.dell.com/pixelguidelines</a>.</li></ul>
Brightness Problems	Picture too dim or too bright	<ul style="list-style-type: none"><li>• Reset the monitor to factory settings.</li><li>• Adjust brightness and contrast controls via OSD.</li></ul>
Safety Related Issues	Visible signs of smoke or sparks	<ul style="list-style-type: none"><li>• Do not perform any troubleshooting steps.</li><li>• Contact Dell immediately.</li></ul>

## 6. Trouble Shooting Instructions

Common Symptoms	What you experience	Possible solutions
Intermittent Problems	Monitor malfunctions on & off	<ul style="list-style-type: none"><li>• Ensure that the video cable connecting the monitor to the computer is connected properly and is secure.</li><li>• Reset the monitor to factory settings.</li><li>• Perform monitor self-test feature check to determine if the intermittent problem occurs in self-test mode.</li></ul>
Missing Color	Picture missing color	<ul style="list-style-type: none"><li>• Perform monitor self-test.</li><li>• Ensure that the video cable connecting the monitor to the computer is connected properly and is secure.</li><li>• Check for bent or broken pins in the video cable connector.</li></ul>
Wrong Color	Picture color not good	<ul style="list-style-type: none"><li>• Change the settings of the Preset Modes in the Color menu OSD depending on the application.</li><li>• Adjust R/G/B value under Custom Color in Color menu OSD.</li><li>• Change the Input Color Format to PC RGB or YPbPr in the Color menu OSD.</li><li>• Run the built-in diagnostics.</li></ul>
Image retention from a static image left on the monitor for a long period of time	Faint shadow from the static image displayed appears on the screen	<ul style="list-style-type: none"><li>• Set the screen to turn off after a few minutes of screen idle time. These can be adjusted in Windows Power Options or Mac Energy Saver setting.</li><li>• Alternatively, use a dynamically changing screensaver.</li></ul>
Mic/Webcam does not work	<ul style="list-style-type: none"><li>• USB cable not plug in or not select the correct USB source</li><li>• Not set the monitor Mic/webcam as the default device</li></ul>	<ul style="list-style-type: none"><li>• Plug in the USB Cable (Type-A to Type-B or Type-C to Type-C), and if you connect both USB-C port, please switch the USB source in the OSD menu.</li><li>• Select the monitor Mic/webcam as the default in the PC side.</li><li>• Touch the Mic button and make sure the Mic mute LED is dark.</li></ul>

## 6. Trouble Shooting Instructions

### Product specific problems

Problem	What you experience	Possible solutions
Screen image is too small	Image is centered on screen, but does not fill entire viewing area	<ul style="list-style-type: none"><li>• Check the Aspect Ratio setting in the Display menu OSD.</li><li>• Reset the monitor to factory settings.</li></ul>
Cannot adjust the monitor with the joystick control on the rear of the monitor	OSD does not appear on the screen	<ul style="list-style-type: none"><li>• Turn off the monitor, unplug the monitor power cable, plug it back, and then turn on the monitor.</li></ul>
No Input Signal when user controls are pressed	No picture, the LED light is white	<ul style="list-style-type: none"><li>• Check the signal source. Ensure the computer is not in the power saving mode by moving the mouse or pressing any key on the keyboard.</li><li>• Check whether the signal cable is plugged in properly. Connect the signal cable again, if necessary.</li><li>• Reset the computer or video player.</li></ul>
The picture does not fill the entire screen	The picture cannot fill the height or width of the screen	<ul style="list-style-type: none"><li>• Due to different video formats (aspect ratio) of DVDs, the monitor may display in full screen.</li><li>• Run the built-in diagnostics.</li></ul>
No image when using DP connection to the PC	Blank screen	<ul style="list-style-type: none"><li>• Verify which DP standard is your Graphics Card certified to. Download and install the latest graphics card driver.</li><li>• Some DP 1.1a graphics card cannot support DP 1.2/1.4 monitors.</li></ul>
No image when using USB Type-C connection to computer, laptop, and so on	Blank screen	<ul style="list-style-type: none"><li>• Verify if the USB Type-C interface of the device can support DP alternate mode.</li><li>• Verify if the device required more than 90 W power charging.</li><li>• USB Type-C interface of device cannot support DP alternate mode.</li><li>• Set Windows to Projection mode.</li><li>• Ensure that the USB Type-C cable is not damaged.</li></ul>

## 6. Trouble Shooting Instructions

Problem	What you experience	Possible solutions
No charging when using USB Type-C connection to computer, laptop, and so on	No charging	<ul style="list-style-type: none"><li>• Verify if the device can support one of 5 V/9 V/15 V/20 V charging profiles.</li><li>• Verify if the Notebook requires a &gt;90 W power adaptor.</li><li>• If the Notebook requires a &gt;90 W power adaptor, it may not charge with the USB Type-C connection.</li><li>• Ensure that you use only Dell approved adapter or the adapter that comes with the product.</li><li>• Ensure that the USB Type-C cable is not damaged.</li></ul>
Intermittent charging when using USB Type-C connection to computer, laptop, and so on	Intermittent charging	<ul style="list-style-type: none"><li>• Check if the maximum power consumption of device is over 90 W.</li><li>• Ensure that you use only Dell approved adapter or the adapter that comes with the product.</li><li>• Ensure that the USB Type-C cable is not damaged.</li></ul>
No image when using USB Type-C MST	Blank screen or 2 <sup>nd</sup> DUT is not Prime mode	<ul style="list-style-type: none"><li>• USB Type-C input, Go to OSD menu, under Display Info check the Link Rate is HBR2 or HBR3, if Link Rate is HBR2, suggest to use USB Type-C to DP cable to turn on MST.</li></ul>
No network connection	Network dropped or Intermittent	<ul style="list-style-type: none"><li>• Do not toggle Off/On the power button when network is connected, keeps the power button On.</li></ul>

## 6. Trouble Shooting Instructions

Problem	What you experience	Possible solutions
The LAN port is not functioning	OS setting or cable connection issue	<ul style="list-style-type: none"> <li>• Ensure that the latest BIOS and drivers for your computer are installed on your computer.</li> <li>• Ensure that the RealTek Gigabit Ethernet Controller is installed in the Windows Device Manager.</li> <li>• If your BIOS Setup has a LAN/GBE Enabled/Disabled option, make sure it is set to Enabled.</li> <li>• Ensure that the Ethernet cable is connected securely on the monitor and the hub/router/firewall.</li> <li>• Check the status LED of the Ethernet cable to confirm connectivity. Re-connect both ends of the Ethernet cable if the LED is not lit.</li> <li>• First power off the Computer and unplug the Type-C cable and power cord of the monitor. Then, power on the computer, plug in the monitor power cord and Type-C cable.</li> </ul>
Monitor buttons (Mute / Volume down / Volume up / Hookswitch) not working with Microsoft Teams® App	Monitor buttons (Mute / Volume down / Volume up / Hookswitch) not working on Microsoft Teams® App with Chrome OS / Ubuntu	<p>Use Microsoft Teams® App to perform the below tasks:</p> <ul style="list-style-type: none"> <li>• Call Icon to accept / hang up call</li> <li>• Volume down / Volume up adjustment</li> <li>• Mic mute / unmute</li> <li>• Video on / off</li> </ul>
Headset with Mic (3.5mm combo jack) not working with monitor mute / unmute button	Headset with Mic (3.5mm combo jack) not working with monitor mute / unmute button	<ul style="list-style-type: none"> <li>• Use UC App (e.g. Microsoft Teams, Skype for Business, Zoom, etc.) Mic Icon to mute / unmute</li> <li>• Select 'Echo Cancelling Speakerphone' audio path in the 'Sounds Setting' on UC application.</li> <li>• Connect the USB-C to C cable or USB-A to B cable.</li> </ul>

## 6. Trouble Shooting Instructions

Problem	What you experience	Possible solutions
When press either Volume down / Volume up or Mute button, LED not blink	When press either Volume down / Volume up or Mute button, LED not blink when connected to HDMI or DP only	Connect USB-A to USB-B cable
Webcam or Mic not working	Webcam or Mic not working when connected to HDMI or DP only	Connect USB-A to USB-B cable
Ethernet port (RJ45) cannot connect to internet	Ethernet port (RJ45) cannot connect to internet on Win 10 / Win 11	Change the LAN Controller Power Saving from Enable to Disable
No sound coming from the speakers	No sound coming from the speakers when play audio/video on your system	<ul style="list-style-type: none"><li>• Ensure that you have set the default playback device as Echo Cancelling Speakerphone or DELL P2724DEB on your system.</li><li>• Turn Off the monitor, unplug the monitor power cord, replug it, and then turn On the monitor.</li><li>• Reset the monitor to Factory Settings.</li></ul>

## 6. Trouble Shooting Instructions

Problem	What you experience	Possible solutions
Speaker volume is low/sounds soft	Speaker volume is low/sounds soft when speaker option is DELL P2724DEB in Sound setting interface	<ul style="list-style-type: none"><li>• Increase the speaker volume of <b>DELL P2724DEB</b> to maximum in the Sound setting interface</li><li>• Press the Volume Up button to increase the speaker volume of <b>DELL P2724DEB</b></li><li>• If you select <b>DELL P2724DEB</b> audio path, please ensure that the <b>Echo Cancelling Speakerphone</b> volume is set to medium or high. Else, the <b>DELL P2724DEB</b> maximum volume may sound soft because it is limited by the <b>Echo Cancelling Speakerphone</b> volume. For example, when the Echo Cancelling Speakerphone volume is at 50%, and the <b>DELL P2724DEB</b> volume is set to 100% will have the same sound level as the former.</li></ul>
No sound from speaker	No sound from monitor's speaker when in Teams/ Zoom call.	<ul style="list-style-type: none"><li>• Select the same audio path in the Teams/ Zoom application as the operating system's Sound setting.</li></ul>
Monitor's Volume up/ Volume down buttons not sync with OS	Pressing the Volume up/Volume down buttons on the monitor does not increase or decrease the volume on the OS.	<ul style="list-style-type: none"><li>• Select 'Echo Cancelling Speakerphone' audio path on the operating system's Sound setting of your laptop.</li><li>• Select 'Echo Cancelling Speakerphone' audio path on the UC application.</li><li>• Connect the USB-C to C cable or USB-A to B cable.</li></ul>

## 6. Trouble Shooting Instructions

Problem	What you experience	Possible solutions
Webcam is not detected	Webcam is not detected in the Windows Device Manager	<ul style="list-style-type: none"><li>• Ensure that the USB upstream cable is connected between the monitor and the computer or notebook.</li><li>• Ensure that the <b>Webcam &amp; Presence Sensor</b> in OSD is set to Enable.</li><li>• Reconnect the USB upstream cable to the computer or notebook.</li></ul>
	Webcam is not detected in the Dell Peripheral Manager for Windows software	<ul style="list-style-type: none"><li>• To support the P2724DEB monitor, please use the Dell Peripheral Manager version 1.7.0 or later.</li></ul>
Webcam cannot connect/ Webcam disconnected	Could not detect Monitor camera/ Could not switch back to the PC camera	<ul style="list-style-type: none"><li>• Reset the monitor to factory settings.</li><li>• Turn off the monitor, unplug the monitor power cord, replug it, and then turn on the monitor.</li><li>• Select the monitor camera again in the Camera/Video setting on your UC conference application.</li></ul>
Microphone is muted	Microphone is muted in the Windows Device Manager	<ul style="list-style-type: none"><li>• Ensure that the USB upstream cable is connected between the monitor and the computer or notebook.</li><li>• Ensure that the 'Microphone' in OSD is set as Unmute.</li><li>• Reconnect the USB upstream cable to the computer or notebook.</li><li>• Ensure that the microphone is enabled/unmuted on the monitor. If the microphone mute LED is lighting up in static red (indicates microphone muted), press the microphone button to unmute the microphone.</li><li>• Ensure that the monitor's microphone is selected and enabled/unmuted on the setting in the UC application.</li></ul>
