

QUANTUM STREAM TALK

USB condenser microphone for streaming, recording and gaming.

Sound is survival

Let your voices be heard

Whether you're a streamer broadcasting your games on Twitch or a podcaster with a growing audience, the JBL Quantum Stream Talk will make sure your voice gets heard. The super cardioid pickup pattern of this sleek, functional design makes it perfect for a single voice, ensuring that any random noises elsewhere in the room won't get heard. A built-in shock absorber in the sturdy microphone stand also helps make sure your streams and recordings are as noise-free as possible. Monitor the audio stream in your headphones via the 3.5mm connection and the multi-function control knob, which also adjusts the mic's gain and loudness and quickly mutes you if a cough or sneeze creeps up on you. Use the included JBL QuantumENGINE PC software to adjust EQ, apply noise reduction, and perform a quick mic test, all from your computer screen.

Features

- ▶ Single condenser microphone for perfect streaming
- ▶ Single voice pick-up pattern
- ▶ One-press mute button
- ▶ Easy-to-adjust control knob
- ▶ Built-in shock absorber
- ▶ Plug and play
- ▶ Flexible design
- ▶ JBL QuantumENGINE compatibility

QUANTUM STREAM TALK

USB condenser microphone for streaming, recording and gaming.

Features and Benefits

Single condenser microphone for perfect streaming

Your voice will come through loud and strong thanks to a lightweight, fast-moving diaphragm that's sensitive (-44dB) and has a wide, flat frequency range (50~12kHz). At 96kHz/24 bits recording, your streams and recordings will sound better and capture every nuance of what you're saying.

Single voice pick-up pattern

You won't pick up random sounds around the room, because the super cardioid pick-up pattern is hyper-focused on your voice. Just like your audience will be.

One-press mute button

Press the center of the control knob to mute yourself momentarily. The LED lights at the top of the mic tube will change into red, so you'll always know when you're on mute. Unlike some of your coworkers during Zoom meetings.

Easy-to-adjust control knob

The same knob controls both the mic gain (how loud your voice is going into the mic) and the headphones' volume (how loud your voice is heard in your headphones), so you can fine-tune how you sound even in the middle of a streaming or recording session.

Built-in shock absorber

Tend to pound the table when you're making a great point on your podcast? The built-in shock absorber in the microphone's base will keep your audience from hearing any weird thumping sounds when you do.

Plug and play

Plug into your laptop, desktop computer, or digital mixing board with the included USB-C cable and start talking. It's that simple.

Flexible design

Adjust the position of the microphone easily with the ball joint attaching the mic to the stand.

JBL QuantumENGINE compatibility

With the included JBL QuantumENGINE software, you can quickly adjust EQ and gain to fine-tune your sound, mute and unmute yourself, apply noise reduction, and perform a quick mic test, all from your computer screen.

Technical Specifications

- ▶ Power required/consumption: 5 V = 500 mA
- ▶ Frequency response: 50 Hz - 12 kHz
- ▶ Sensitivity: -47±3 dB (1 kHz@1 Pa, 0 dB = 1 v/Pa)
- ▶ Maximum SPL: 110 dB
- ▶ Sample rates: 44.1kHz / 48kHz / 96kHz
- ▶ Bit rate: 16 / 24 bits
- ▶ Capsules: 6 mm Electret Condenser Microphone
- ▶ Polar patterns: Super-Cardioid
- ▶ Headphones Amplifier Impedance: 16 ohms / 32 ohms
- ▶ Headphones Power output (RMS): 23 mWrms per channel (Load = 32 ohms)
- ▶ Headphones THD: <0.5% (Load = 32 ohms)
- ▶ Headphones Frequency response: 20 Hz - 20 kHz
- ▶ Headphones Signal to noise: 92 dB (A-weighted)
- ▶ Dimensions Mic with Stand (L x W x H): 10.5cm x 10cm x 18.5cm / 4.13" x 3.94" x 7.28"
- ▶ Weight Mic with Stand: 146g / 0.322lbs

What's in the box

- 1 x JBL Quantum Stream Talk microphone
- 1 x USB power cable
- 1 x Warranty/Warning
- 1 x QSG
