

Product Carbon Footprint

Lenovo V17 G4 IRU

Machine Types: 83A2

Device Type: Notebook

Report Date 03/07/2023

Lenovo values our commitment to the environment. As part of that commitment, Lenovo performs a streamlined product lifecycle analysis in accordance with the IEC TR 62921 standard. This analysis allows the customer to estimate the carbon footprint of their product. The carbon footprint is the total green-house gases emitted by the product over its lifespan reported as global warming potential for 100-year time horizon (GWP-100) in units of CO₂ equivalents

Estimated carbon footprint of the: **Lenovo V17 G4 IRU**

289 kg CO₂e ±

59 kg CO₂e

This estimate uses the assumptions from the table below (Based on EU use location. U.S. estimates below):

| | | | | | |
|--------------------------|-------------|---------------------------------|--------------|-------------------|-----------|
| Product Weight (kg) | 2.20 | Product Screen Size (inches) | 17.3 | Assembly Location | CN |
| Product Lifetime (years) | 4 | Yearly Typical Energy Use (kWh) | 19.41 | Use Location | EU |

Below is a breakout of the carbon emissions of this product by both lifecycle stage (raw material extraction through product end-of-life) and greenhouse gases resulting from the manufacture of major components:

| | | | | | |
|--------------------------|------------|-----------------------|------------|--------------------------|------------|
| Mean (EU): | 289 | 5th Percentile (EU): | 219 | Mean (US): | 312 |
| Standard Deviation (EU): | 59 | 95th Percentile (EU): | 578 | Standard Deviation (US): | 58 |
