Meet Select

Meet the Select Series, a series that includes PDUs and UPSs; two critical components of a robust AV power system. Confidently specify our Select Series PDUs knowing they are reliable products that will provide power to your system and prevent power surges from harming your equipment with our MOV surge protection. We've been powering the AV industry for over 20 years and know the quality of our power products. What power you are plugging into your system should be the least of your worries, so simply plug your AV equipment into a Middle Atlantic Select PDU or UPS and focus on building the best AV system yet.

OUR PRODUCTS

Rackmount PDUs – Reliable with basic surge protection	4
Multi-Mount PDUs – Place the PDU exactly where it's needed with flexible mounting brackets	5
PDT Low Profile Vertical Power Strip – Spaced out(lets) to put power in reach of every device in the rack	6
PD Slim High Density Vertical Power Strip – Bringing outlets closer together to power a packed rack.....	8
Uninterruptible Power Supply – Keep your equipment powered when facing power outages and anomalies	9
PDUs with RackLink – Remotely control your power from anywhere with intelligence.....	10
DC Power Distribution – Cut the cord and optimize installations with varying voltages.....	13

Select Series Rackmount PDUs

Power your rack with the power distribution units designed specifically for AV applications. From just one rackmount PDU you can protect all your devices from surges and provide EMI filtering.

Features & Benefits

- Rear distribution outlets keep the rack organized and cables easy to manage
- Do not struggle to reach the plug. The extended chassis depth makes it easy to plug in equipment, making integration a breeze
- SignalSAFE™ power cord minimizes potential interference from AC magnetic fields
- Choose to have control from the front of the rack with a front facing switch or a simple light indicator
- Choose a front convenience outlet if needed

Select Series Multi-Mount PDUs

Mount it here, mount it there, mount it everywhere! The Multi-Mount series gives you the flexibility to place outlets right where they are needed.

Features & Benefits

- Reversible, adjustable mounting ears support many mounting methods for ultimate flexibility
- Outlets with varied orientations to accommodate many plug styles
- A space saving shallow chassis
- 9' SignalSAFE™ power cord minimizes potential interference from AC magnetic fields

Select Series PDT Low Profile Vertical Power Strip

Get more outlets without giving up rack space. With a thin chassis, the Select Series PDT Low Profile Vertical Power Strip mounts unobtrusively in the back of the rack while still placing outlets right next to the equipment it needs to power. And we will let you in on a secret—the PDTs mount to every style of Middle Atlantic rack rail brackets. A no brainer for your AV system!

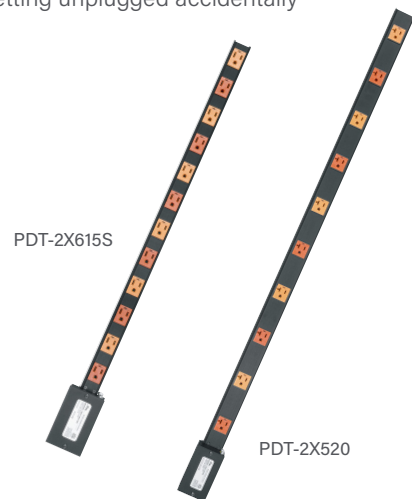

Features & Benefits

- Thin design takes up minimal space inside racks while still allowing each piece of vital equipment to receive the power it needs
- Mounting hardware is included and takes no time to snap the PDU on to the rack rail brackets (plus the clip are reusable!)
- The choice is yours: Available with basic surge, two stage surge with remote notification, no surge, and metering. Models also come in hardwired or corded.
- Corded models use a SignalSAFE™ wire to minimize potential interference from AC magnetic fields from other equipment in the rack
- PDTs are available with TwistLock Plugs. Secure your power cords in place and never fear them getting unplugged accidentally
- The PDT is available in a dual circuit model

Select Series PD Slim High Density Vertical Power Strip

The Select Series High Density Vertical Power Strips are a great solution to a rack full of power hungry equipment. It mounts vertically and unobtrusively in the back of your rack with a high density of outlets to ensure every piece of equipment gets the power it needs. Finding space for power in your rack should be the least of your worries.

Features & Benefits

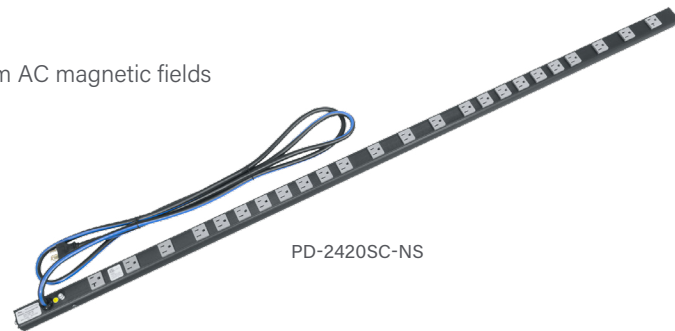

- Leave no device unpowered. The high density of outlets in each strip supports demanding installations
- Lightweight, slim design gives you as many outlets as possible while taking up as little vertical space as possible
- Mounting hardware is included for fast and easy installation
- Choose from basic surge protection or none
- Attached SignalSAFE™ power cord minimizes potential interference from AC magnetic fields

Select Series UPS

Select Series UPS Backup Systems are a competitively priced option for ensuring uptime of equipment in the event of a power outage or power anomaly. Select UPSs are designed for both AV and Security applications. Plug it in, feel confident, and simply focus on creating an amazing AV experience.

Features & Benefits

- With four models available, you'll be able to find the perfect backup for your AV system
 - 1 RU models ideal for one-person installation and saving space
 - 2 RU models are robust enough to back up a more intense AV set-up.
- Select UPSs use a simulated sine wave, keeping the cost of the product down, while keeping your equipment protected and powered
- In just 8ms of a power outage or anomaly, the UPS will transfer equipment to battery power
- Protects equipment from damaging over and under voltage
- Separate critical and non-critical outlet banks. Should an extended power outage occur, the UPS will cease powering the non-critical equipment via load shedding
- Each UPS comes with basic surge protection and EMI filtering
- An LED status indicator on the front of the UPS alerts you to a loss in power, low battery level, or of battery overload.
- Hot swappable battery pack can be easily replaced via the front panel for easy service without disrupting the system
- With an optional IP card, you can remotely monitor the uptime of your equipment and control your UPS

Select Series PDUs with RackLink™

Monitor your power anytime, anywhere, and even automatically. Select Series PDUs with RackLink™ creates a simple and cost-effective solution that puts intelligent control of power distribution at your fingertips, wherever you are. The applications are endless— RackLink™ allows you to manage everything from a network of digital signage installs, to a building full of conference rooms, to an entire campus of classrooms—all from your device.

Features & Benefits

- Easy set-up of the RackLink™ user interface will enable individual IP outlet control for up to 8 outlets
- Using the RackLink™ Discovery app on iPhone or Android, quickly connect RackLink™ enabled PDUs and monitor the system, anywhere, anytime
- Utilize remote sequencing with user selectable delays for an optimal start-up or shut down progression
- Comes with basic surge to protect your devices from harmful power anomalies
- Improve system reliability by automating actions such as multiple IP AutoPing and recovery
- Receive automatic notifications of connection status
- Seamlessly interfaces with 3rd party AV control systems and cloud platforms for scheduling, control, reporting and even customization

Select Series PDUs with RackLink™

Power your AV installations around the world with RackLink. Select Series with RackLink has CE rated models available, so you can have the RackLink you know and trust for your international deployments. These PDUs still have all of the benefits that come standard with RackLink. Manage the start-up or shutdown of your equipment, automate actions such as Autoping and recovery, individually control outlets, and more, all from the RackLink interface. We are making it easy to standardize the power you use in every installation, ensuring the same, simple experience for your customers anywhere they are.

The RackLink™ User Interface

The RackLink interface is your home base for managing every PDU on your network. Here you can check the status of your system down to each individual outlet. From the home screen you can power cycle outlets, check surge protection status, automate actions to keep your equipment up and running, and more. The setup is intuitive so you can begin optimizing your AV installations as soon as the equipment is plugged in. Spend less time troubleshooting and more time doing what matters – designing incredible AV spaces.

For a live demo of RackLink, visit our website: See [RackLink™ in Action](#)

Select Series DC Power Distribution

Clean up your rack by replacing messy, space consuming wall warts and power strips with the Select Series DC Power Distribution designed for AV, security, and networking applications. The DC Power Distribution allow you to optimize installations that involve a multitude of devices in varying voltages. The PDUs provide high current capacity to an extensive number of outputs, maximizing the same voltage in a single unit or splitting between the most popular voltages. Additionally, with flexible mounting options, you can bring DC Power to a typical rack unit, small enclosure, or wall box.

Features & Benefits

- Providing you with an industry-leading number of outputs - power as many as 24 devices
- Keep the power flowing with a maximum current capacity of up to 300W of power and a multitude of voltage options
- Protect your equipment with basic surge protection and overload protection on the AC input. Additionally, individual redundancy is built in with auto-resetting PTC overload protection on each individual output
- The reversible, adjustable mounting ears support many mounting methods
- Color-coded screw terminal connectors with industry standard voltages and polarity labeling are included for easy identification
- LED indicator lights show activity on each output and alert you to maximum capacity on each voltage bank
- Trim your power cords to a suitable length and leave less cable to manage, enhancing aesthetics and increasing airflow
- Ultra-quiet, thermostatic temperature-controlled fan has automatic speed adjustment to keep your PDU from overheating
- A 6ft IEC power cord is included with each PDU
