

A Guide to Robotic Cameras for Production & Presentation

Datavideo offers a wide range of PTZ cameras for various applications and venue size. There are many factors to consider when choosing a PTZ camera and this guide should help clarify which camera would be best for your application.

In this guide we will indicate which cameras are 4K models for your reference.

Choosing A PTZ Camera For Your Application

Here are four features to consider when selecting a PTZ Camera:

1. Auto Tracking

2. Power & Video Signal Transmission

3. Optical Zoom & Distances

4. Camera Control

Auto Tracking

A Datavideo Auto Tracking camera uses AI technology built into the camera, so no software or external device is needed to use this function.

Once auto-tracking is turned off, the camera will still work as a regular PTZ camera. When there is no operator available for a live video event, the presenter has the ability to turn on/off the tracking feature. Auto-tracking cameras are popular solutions for lecture capture, corporate, conferencing, or even houses of worship venues where technical operators are not available.

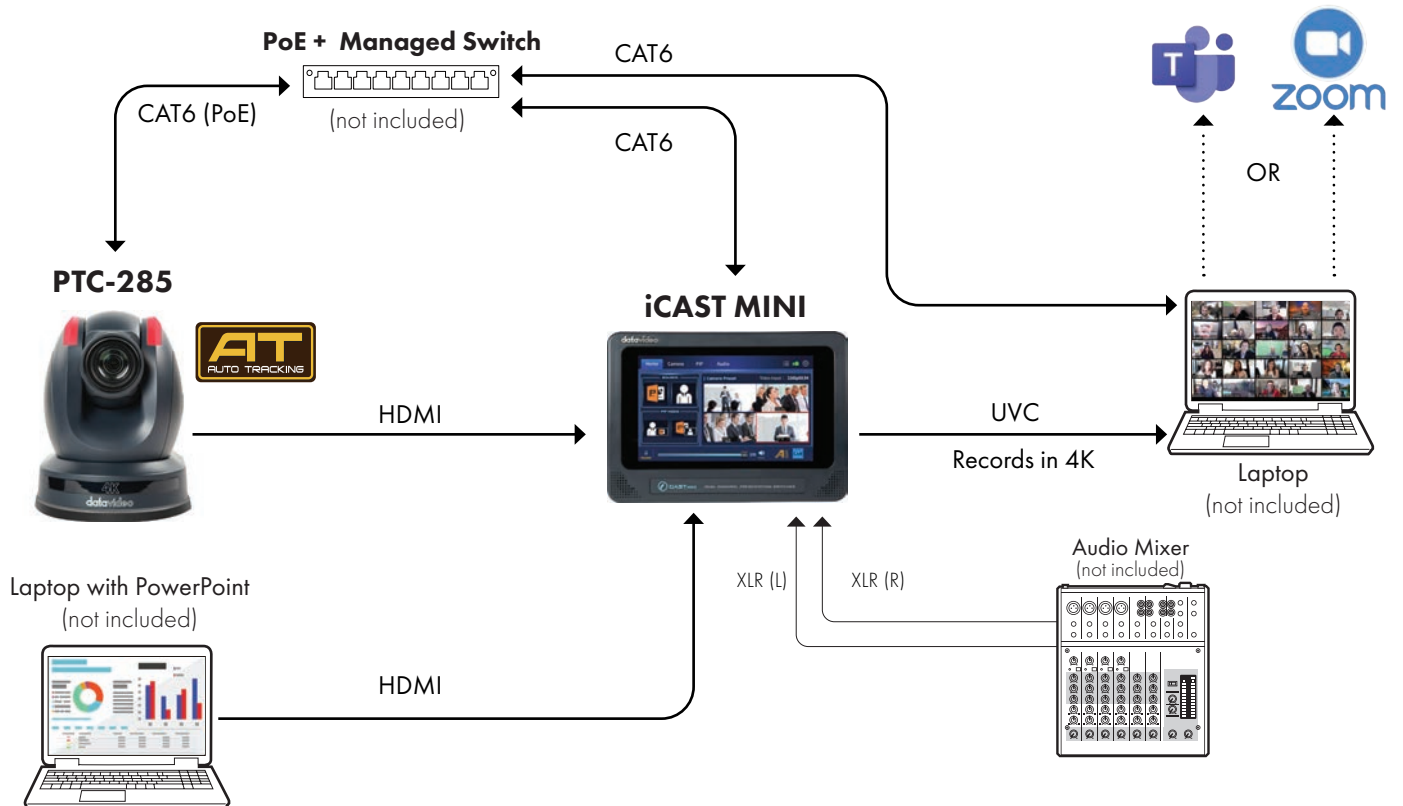

Auto Tracking

Optical Zoom Distances

Most PTZ production cameras have three different optical zoom distances which include 12x, 20x and 30x. Optical zoom is preferred over digital because it uses the lens to magnify the subject you're shooting whereas, digital zoom crops the image instead of using a lens to magnify the subject. Here are the Datavideo cameras options:

12x

PTC-280

12x optical zoom
(30-40ft distance)

PTC-285

12x optical zoom
(30-40ft distance)

20x

PTC-140

20x optical zoom
(50-75ft distance)

PTC-305

20x optical zoom
(50-75ft distance)

30x

PTC-150

30x optical zoom
(75-120ft distance)

Control Protocols: IP or Serial

CONTROL

Serial

RMC-180 MARK II

- Controls up to 4 PTC cameras
- Up to 8 presets for 2 cameras

IP

PTZ View Assist

- Free app for Android or IO's
- Control up to 4 cameras

Serial or IP Control

RMC-300A

- Controls up to 24 cameras thru IP
- Controls up to 8 camera serial (RS-422)

IP Control

RMC-2

- Controls up to 3 cameras
- Works with TPC-700 via USB

IR

RMC-1AT

- Controls Auto Tracking PTZ Cameras

IP Control

TPC-700 & ZR-1

- Touch Panel Controller with PTZ Auto Tracking
