

M64 WIRELESS

CHERRY XTRFY M64 WIRELESS ultra-light gaming mouse

Models may vary from the image shown

M64 WIRELESS. PERFECTED FOR ESPORTS.

Evolving from the best-selling M4 mouse, the M64 Wireless introduces a completely redesigned ergonomic shape that enhances your grip and control. An incredibly low weight, optimized for competitive gaming. And performance to be trusted by the greatest players in esports.

UNIQUE ERGONOMIC SHAPE WITH ULTRA-LOW FRONT.

Aiming for the perfect ergonomic shape, CHERRY XTRFY designed the M64 series with input from some of the world's most prominent pro players. As an evolution of the M4, the M64 mouse comes with a reinvented design for enhanced grip, including adjusted side curvature, button grooves and an ultra-low front, allowing you to move your fingers closer to the pad for more precision in every swipe.

ESPORTS-GRADE WIRELESS PERFORMANCE.

Rooted in esports, CHERRY XTRFY's prime focus is performance. The M64 series features wireless technology that has been refined over years, offering total freedom of movement without compromising speed and responsiveness. Combined with Pixart's top-performing 3395 sensor, there's nothing holding you back.

SOLID SHELL. WIRELESS. STILL JUST 53 GRAMS.

Despite being wireless with a 300-mA battery and a hole-free chassis, the M64 Wireless is incredibly lightweight.

At 53 grams, it's optimal for competitive gaming, offering swift and precise movements while retaining control.

PLAY FOR 75 HOURS. CHARGE IT FOR 2.

The battery has got you covered during those all-weekend LANs and marathon streams, with a playtime of up to 75 hours* per charge. And during the short time it takes to charge the mouse, you can continue playing unhindered with the flexible CHERRY XTRFY EZcord® charging cable.

*Depending on Hz and playstyle.

THE 6TH GENERATION.

This mouse is part of the 6th generation of CHERRY XTRFY mice, a series of top-tier models that deliver the performance you need to play at your peak. For an ergonomic form factor, go for the M64. Prefer a symmetrical shape? The M68 is the option for you. Both versions are wireless and come in 1000 Hz as well as 8000 Hz (Pro) models for state-of-the-art performance.

HIGHLIGHTS

- Optimized for esports
- Ergonomic shape with ultra-low front
- 53 grams lightweight with a solid shell
- 2.4 GHz lag-free wireless
