Projector User Guide

IMPORTANT: Please read this User Guide to obtain important information on installing and using your product in a safe manner, as well as registering your product for future service. Warranty information contained in this User Guide will describe your limited coverage from ViewSonic® Corporation, which is also found on our web site at <http://www.viewsonic.com> in English, or in specific languages using the Regional selection box on our website.

Thank you for choosing ViewSonic®

As a world-leading provider of visual solutions, ViewSonic® is dedicated to exceeding the world's expectations for technological evolution, innovation, and simplicity. At ViewSonic®, we believe that our products have the potential to make a positive impact in the world, and we are confident that the ViewSonic® product you have chosen will serve you well.

Once again, thank you for choosing ViewSonic®!

Safety Precautions

Please read the following **Safety Precautions** before you start using the projector.

- Keep this user guide in a safe place for later reference.
- Read all warnings and follow all instructions.
- Allow at least 20" (50 cm) clearance around the projector to ensure proper ventilation.
- Place the projector in a well-ventilated area. Do not place anything on the projector that prevents heat dissipation.
- Do not place the projector on an uneven or unstable surface. The projector may fall over, causing personal injury or projector malfunction.
- Do not look straight at the projector lens during operation. The intense light beam may damage your eyes.
- Always open the lens shutter or remove the lens cap when the projector lamp is on.
- Do not block the projection lens with any objects when the projector is under operation as this could cause objects to become heated and deformed or even cause a fire.
- The lamp becomes extremely hot during operation. Allow the projector to cool for approximately 45 minutes prior to removing the lamp assembly for replacement.
- Do not use lamps beyond the rated lamp life. Excessive use of lamps beyond the rated life could cause them to break on rare occasions.
- Never replace the lamp assembly or any electronic component unless the projector is unplugged.
- Do not attempt to disassemble the projector. There are dangerous high voltages inside which may cause death if you should come into contact with live parts.
- When moving the projector, be careful not to drop or bump the projector on anything.
- Do not place any heavy objects on the projector or connection cables.
- Do not stand the projector on end vertically. Doing so may cause the projector to fall over, causing personal injury or projector malfunction.
- Avoid exposing the projector to direct sunlight or other sources of sustained heat. Do not install near any heat sources such as radiators, heat registers, stoves, or other devices (including amplifiers) that may increase the temperature of the projector to dangerous levels.
- Do not place liquids near or on the projector. Liquids spilled into the projector may cause it to fail. If the projector does become wet, disconnect it from the power supply and call your local service center to have the projector serviced.

- When the projector is under operation, you may sense some heated air and odor from its ventilation grill. It is a normal operation and not a defect.
- Do not attempt to circumvent the safety provisions of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide and third blade are provided for your safety. If the plug does not fit into your outlet, obtain an adapter and do not attempt to force the plug into the outlet.
- When connecting to a power outlet, DO NOT remove the grounding prong. Please ensure grounding prongs are NEVER REMOVED.
- Protect the power cord from being treaded upon or pinched, particularly at the plug, and at the point where it emerges from the projector.
- In some countries, the voltage is NOT stable. This projector is designed to operate safely within a voltage between 100 to 240 volts AC, but could fail if power cuts or surges of ± 10 volts occur. In areas where voltage may fluctuate or cut out, it is recommended that you connect your projector through a power stabilizer, surge protector, or uninterruptable power supply (UPS).
- If smoke, an abnormal noise, or a strange odor is present, immediately switch the projector off and call your dealer or ViewSonic®. It is dangerous to continue using the projector.
- Use only attachments/accessories specified by the manufacturer.
- Disconnect the power cord from the AC outlet if the projector is not being used for a long period of time.
- Refer all servicing to qualified service personnel.

CAUTION: Possibly hazardous optical radiation is emitted from this product. As with any bright light source, do not stare into the beam.

CLASS 1 Consumer Laser Product EN50689:2021

- Notice is given to supervise children and to never allow them to stare into the projector beam at any distance from the projector.
- Notice is given to use caution when using the remote control for starting the projector while in front of the projection lens.
- Notice is given to the user to avoid the use of optical aids such as binoculars or telescopes inside the beam.

RG2 IEC 62471-5:2015.

Additional warning against eye exposure for close exposures less than 1 m.

Safety Precautions - Ceiling Mounting

Please read the following **Safety Precautions** before you start using the projector.

If you intend to mount the projector on the ceiling, it is strongly recommended that you use a proper fitting projector ceiling mount kit and that you ensure it is securely and safely installed.

If you use an inappropriate projector ceiling mount kit, there is a safety risk that the projector may fall from the ceiling due to an improper attachment through the use of the wrong gauge or length screws.

4	Video	<i>This button is not supported.</i>
5	HDMI	Selects the HDMI 1 or HDMI 2 input source.
6	Auto³	Enter auto adjustment mode.
7	Menu	Open the On-Screen Display (OSD) Menu.
8		Navigates and selects the desired menu items and make adjustments.

³ - For Computer input source only.

Button		Description
9	OK	Confirm the selection.
10	Keystone	Opens the Keystone menu to correct distorted images resulting from an angled projection.
11	Image	Selects the image mode.
12	Freeze	Freeze the projected image.
13	Pattern	Displays embedded test pattern.
14	Aspect	Displays the aspect ratio selection bar.
15	 / 	Selects Light source mode.
16	Mute	Turn on or off the sound.
17		Display the current status and information of the projector.
18	Zoom	Increase or decrease the projected image size.
19	Volume	Increase or decrease the sound level.
20	Blank	Temporarily hides the projected image.
21	Timer	Enable the timer function.

Button		Description	
1		Power	Turn the projector on or off.
2		Input	Displays the source selection bar.
3		Menu	Open the On-Screen Display (OSD) Menu.
4		Back	Returns to the previous screen.
5		Navigational Buttons	Navigates and selects the desired menu items and make adjustments.
6	OK	OK	Confirm the selection.
7		Option	Edit files or set the way files are displayed/arranged when using the USB input channel.
8		Keystone	Opens the Keystone menu to correct distorted images resulting from an angled projection.
9		Aspect	Displays the aspect ratio selection bar.

Button		Description
10		Picture Selects the picture mode.
11	 	Zoom Increase or decrease the projected image size.
12	 	Volume Increase or decrease the sound level.
13		Freeze Freeze the projected image.
14		ECO Selects the Light source mode.
15		Mute Turn on or off the sound.
16		Blank Temporarily hides the projected image.

Receiver Range

To ensure proper function of the remote control follow the steps below:

1. The remote control must be held at an angle within 30° perpendicular to the projector's IR remote control sensor(s).
2. The distance between the remote control and the sensor(s) should not exceed 6 m (19 ft).

NOTE: Refer to the illustration for the location of the infrared (IR) remote control sensor(s).

Replacing the Batteries

1. Remove the battery cover from the bottom of the remote control.
2. Remove any existing batteries (if necessary) and install two AAA batteries.
NOTE: Observe the battery's polarities as indicated.
3. Replace the battery cover by aligning it with the base and pushing it back into position.

NOTE:

- Avoid leaving the remote control and batteries in excessive heat or a humid environment.
- Replace only with the same or equivalent type recommended by the battery manufacturer.
- If the batteries are drained or if you will not be using the remote control for an extended period of time, remove the batteries to avoid damage to the remote control.
- Dispose of the used batteries according to the manufacturer's instructions and local environment regulations for your region.

Initial Setup

Choosing a Location - Projection Orientation

Personal preference and room layout will decide the installation location. Consider the following:

- Size and position of your screen.
- Location of a suitable power outlet.
- Location and distance between the projector and other equipment.

The projector is designed to be installed in one of the following locations:

Location	
<p>Front</p> <p>The projector is placed near the floor in front of the screen.</p>	
<p>Ceiling Front</p> <p>The projector is suspended upside-down from the ceiling in front of the screen.</p>	
<p>Rear¹</p> <p>The projector is placed near the floor behind the screen.</p>	
<p>Ceiling Rear¹</p> <p>The projector is suspended upside-down from the ceiling behind the screen.</p>	

NOTE: When selecting **Auto Ceiling/Front** or **Auto Ceiling/Rear** as the projector position, the projector will be considered front projection automatically.

¹ A rear projection screen is required.

300	7620	288.17	7319	482.54	12257	135.00	3429	89.10	2263

NOTE:

- These figures are for reference purposes only. Please refer to the actual projector for the precise dimensions.
- It is recommended that if you intend to permanently install the projector to physically test the projection size and distance using the actual projector before you permanently install it.

Mounting the Projector

NOTE: If you buy a third party mount, please use the correct screw size. Screw size can vary depending on the thickness of the mounting plate.

1. To ensure the most secure installation, please use a ViewSonic® wall or ceiling mount.
2. Ensure the screws used to attach the mount to the projector meet the following specifications:
 - Screw type: M4 x 8
 - Maximum Screw Length: 8 mm

CAUTION:

- Avoid installing the projector near a heat source or air conditioner.
- Keep at least a 50 cm (19.6 in.) gap between the ceiling and the bottom of the projector.

Using the Security Bar

To help prevent the projector from being stolen, use a security slot locking device to secure the projector to a fixed object.

Making Connections

Connecting to Power

1. Connect the power cord to the AC IN socket at the rear of the projector.
2. Plug the power cord into a power outlet.

NOTE: When installing the projector, incorporate a readily accessible disconnect device in the fixed wiring, or connect the power plug to an easily accessible outlet near the unit. If a fault should occur during operation of the projector, use the disconnect device to switch off the power supply, or disconnect the power plug.

Connecting to External Devices

VGA Connection¹

Connect one end of a VGA cable to the VGA port of the computer. Then connect the other end of the cable to the **COMPUTER** port of the projector.

NOTE: Some computers do not turn on their external displays automatically when connected to a projector. You may have to adjust your computer's projection settings.

¹ - Only for LSC600W-ST, LSC601W-ST, LSC600WU-ST, LSC601WU-ST, LSC730WU-ST, LSC731WU-ST, LSC600WU, LSC601WU, LSC650WU, LSC651WU, LSC730WU, LSC731WU, LSC800WU, and LSC801WU.

VGA Out Connection²

To view the projected content up close on a monitor as well as project it, a monitor can be connected to the **MONITOR OUT** port of the projector.

After establishing the VGA Connection, connect one end of a VGA cable to the VGA port of your monitor. Then connect the other end of the cable to the **MONITOR OUT** port of your projector.

² - Only for LSC600W-ST, LSC601W-ST, LSC600WU-ST, LSC601WU-ST, LSC730WU-ST, LSC731WU-ST, LSC600WU, LSC601WU, LSC650WU, LSC651WU, LSC730WU, LSC731WU, LSC800WU, and LSC801WU.

HDMI Connection

Connect one end of an HDMI cable to the HDMI port of your video device. Then connect the other end of the cable to the **HDMI 1** or **HDMI 2** port³ of your projector.

³ - HDCP 2.2 is only supported on LSC600-4K, LSC601-4K, LSC700-4K, and LSC701-4K.

Audio Connection

The projector supports both Audio In and Audio Out.

Audio In⁴

To play audio from your external device through the projector's speakers, connect one end of an audio cable to your external device, and the other end to the projector's **AUDIO IN** port.

Audio Out

To play audio from the projector through an external speaker, connect one end of an audio cable to the external speaker, and the other end to the projector's **AUDIO OUT** port.

⁴ - Only for LSC600W-ST, LSC601W-ST, LSC600WU-ST, LSC601WU-ST, LSC730WU-ST, LSC731WU-ST, LSC600WU, LSC601WU, LSC650WU, LSC651WU, LSC730WU, LSC731WU, LSC800WU, and LSC801WU.

S/PDIF⁵

To play audio from the projector through an external speaker, connect one end of an audio cable to the external speaker, and the other end to the projector's **S/PDIF** port.

NOTE: The **HDMI 1** port supports ARC⁵. It can deliver sound to external devices via the **HDMI 1** port. Please make sure **HDMI ARC** is set to **On** in the OSD Menu.

⁵ - Only for LSC600-4K, LSC601-4K, LSC700-4K, and LSC701-4K.

USB Connection

USB Type A⁶

The USB Type A port is for reader (FAT32) and supplying power.

USB Type B⁷

The USB Type B port is for service and USB display.

6- The USB Type A port supports firmware update for LSC600-4K, LSC601-4K, LSC700-4K, and LSC701-4K. Please check the OSD setting, **Firmware Update by USB**.

7- Only for LSC600W-ST, LSC601W-ST, LSC600WU-ST, LSC601WU-ST, LSC730WU-ST, LSC731WU-ST, LSC600WU, LSC601WU, LSC650WU, LSC651WU, LSC730WU, LSC731WU, LSC800WU, and LSC801WU.

USB Display

USB Display will output the computer's audio and image.

1. Connect one end of a USB Type B cable to the USB port of your computer. Then connect the other end of the cable to the **SERVICE** port of your projector.
2. Once connected, the computer will automatically detect the pwPresenter driver from the projector. Select autorun.exe to install the driver.
3. On the remote control, press the **Input** button and select **USB B** from the input source menu to display the computer's image.

Network Connection

Plug the network cable into the **CONTROL**⁸ or **LAN**⁹ port for network connectivity.

The projector provides several networking and remote management features. The LAN /RJ45 function of the projector, through a network, can control the projector remotely.

8 - Only for LSC600W-ST, LSC601W-ST, LSC600WU-ST, LSC601WU-ST, LSC730WU-ST, LSC731WU-ST, LSC600WU, LSC601WU, LSC650WU, LSC651WU, LSC730WU, LSC731WU, LSC800WU, and LSC801WU.

9 - Only for LSC600-4K, LSC601-4K, LSC700-4K, and LSC701-4K.

RS-232 Connection

When you use a RS-232 serial port cable to connect the projector to an external computer certain functions can be controlled remotely by the PC, including Power On/Off, Volume adjustment, Input select, Brightness, and more.

HDBaseT Connection

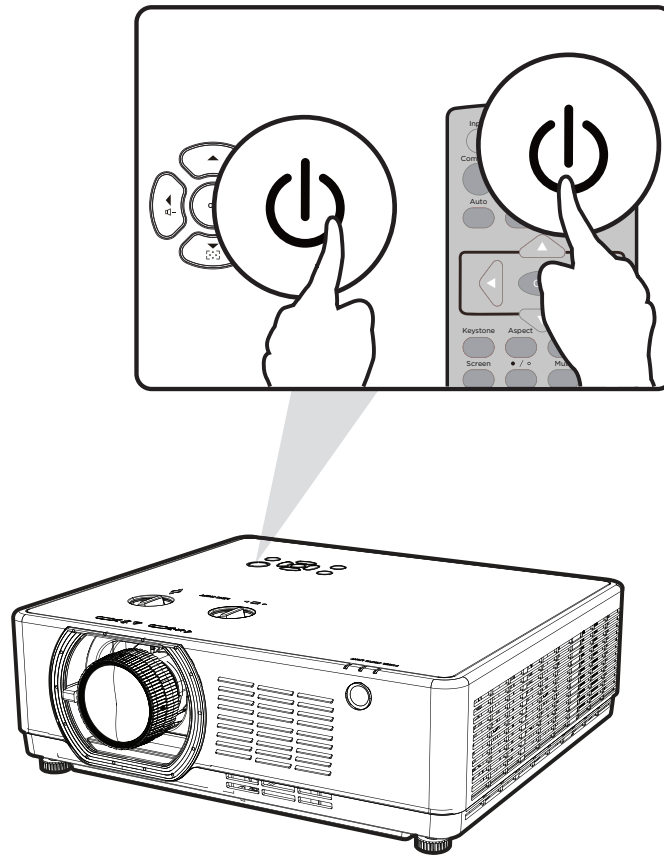

NOTE: HDBaseT is only available for LSC601WU, LSC651WU, LSC731WU, LSC801WU, LSC731WU-ST, LSC601W-ST, LSC601WU-ST, LSC601-4K, and LSC701-4K.

HDBaseT is a technology to transmit image signals through a LAN cable. Connect a Cat5e/Cat6 cable to the projector's **HDBaseT** port from an HDBaseT TX box. Then connect the HDBaseT TX box to an HDBaseT output (e.g., HD TV source, Blue-ray player, etc.).

Using the Projector

Turning the Projector On

1. Make sure the projector's power cord is properly connected to a power outlet.
2. Press the **Power** button on the projector or remote control to turn on the projector.

NOTE:

- The Power Indicator Light will be flashing orange during startup.
- The first time the projector is turned on, you will be prompted to select the preferred language and projection orientation.

Selecting an Input Source

LSC600W-ST | LSC601W-ST | LSC600WU-ST | LSC601WU-ST | LSC730WU-ST |
LSC731WU-ST | LSC600WU | LSC601WU | LSC650WU | LSC651WU | LSC730WU |
LSC731WU | LSC800WU | LSC801WU

The projector can be connected to multiple devices at the same time. However, it can only display one full screen at a time.

NOTE: HDBaseT is only available for LSC601WU, LSC651WU, LSC731WU, LSC801WU, LSC731WU-ST, LSC601W-ST, and LSC601WU-ST.

When **Input Search** is on, the projector will automatically search for input sources. If multiple sources are connected, press the **Input** button on the projector or remote control to select the desired input.

NOTE: Make sure the connected sources are also turned on.

LSC600-4K | LSC601-4K | LSC700-4K | LSC701-4K

The projector can be connected to multiple devices at the same time. However, it can only display one full screen at a time.

NOTE: HDBaseT is only available for LSC601-4K and LSC701-4K.

NOTE: Make sure the connected sources are also turned on.

Adjusting the Projected Image

Adjusting the Projector's Height and Projection Angle

The projector is equipped with two adjustment feet. Adjusting the feet will change the projector's height and the vertical projection angle.

Fine-Tuning the Image Size and Clarity

To adjust the projected image to the size you need, rotate the **Zoom Ring**. You can also improve the clarity of the image by adjusting the **Focus Ring**.

Controlling the Projected Image Position (Lens Shift)

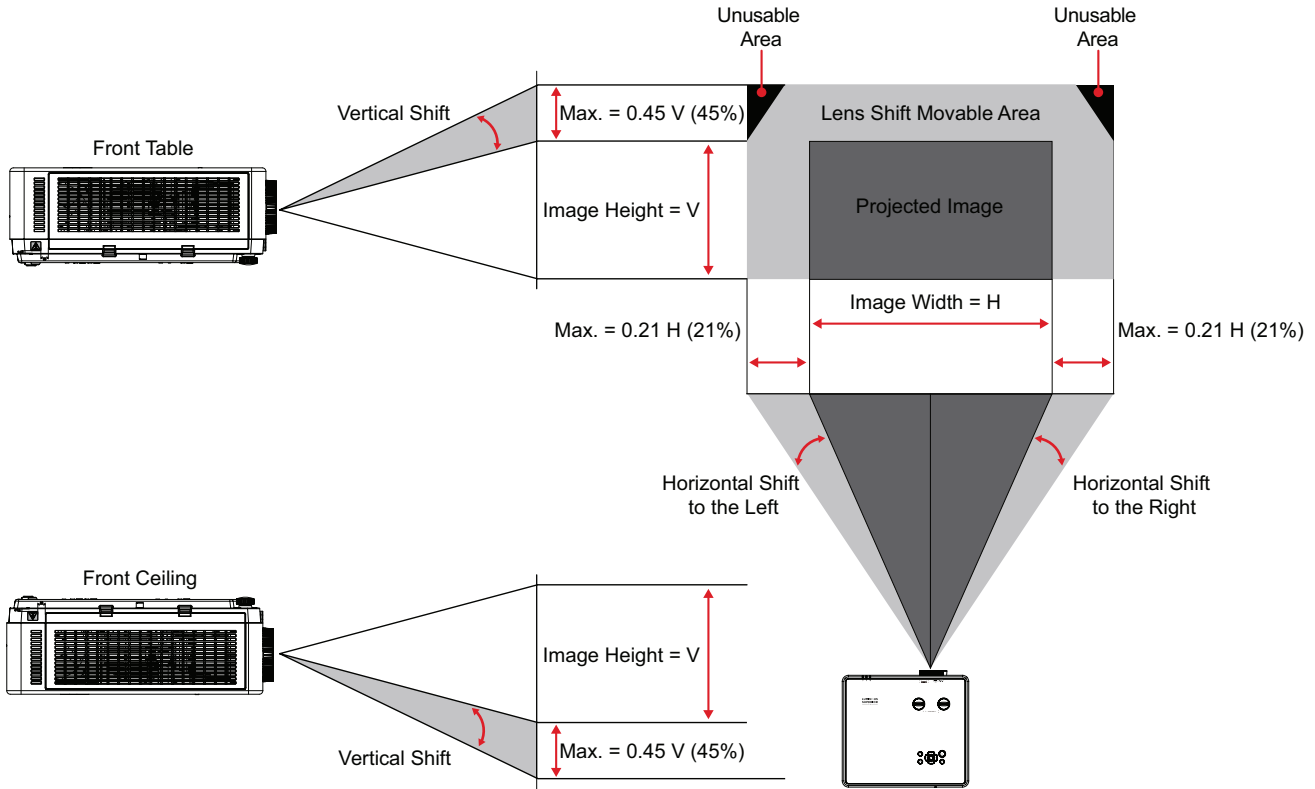

The projection lens can be moved up, down, right, and left with the lens shift function by turning the **Lens Shift** dials. This function makes the positioning of images easy on the screen.

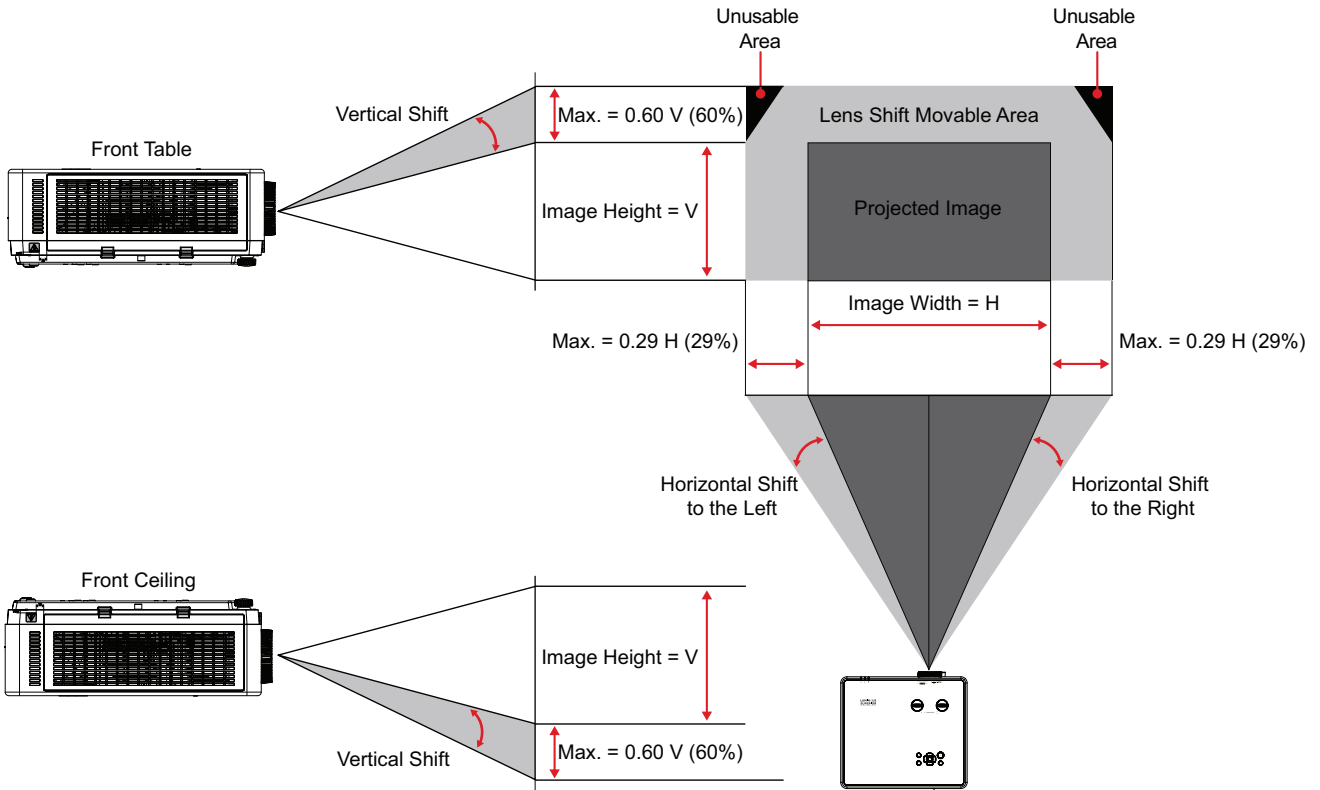

NOTE: For the clearest picture, please keep the vertical and horizontal **Lens Shift** dials centered.

Lens shift is generally expressed as a percentage of the image height or width, please see the below illustrations.

LSC600WU | LSC601WU

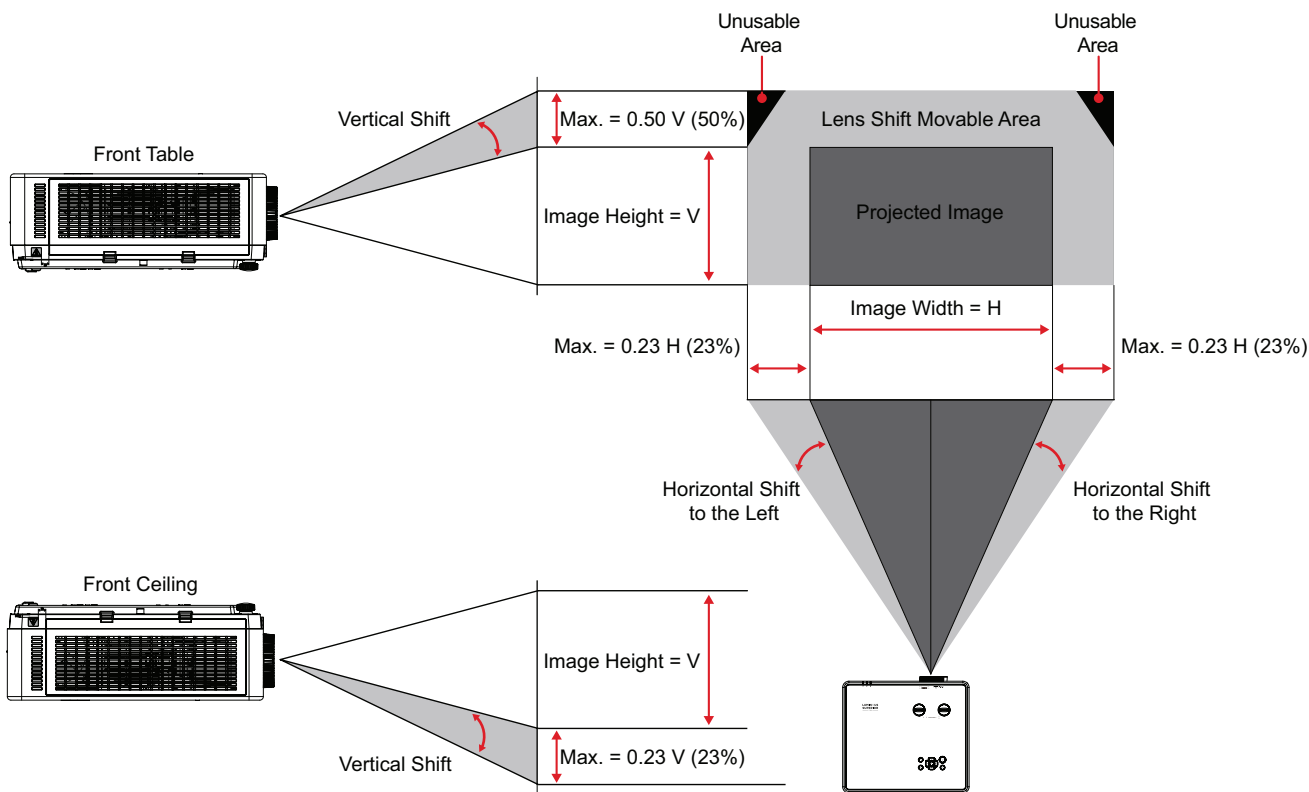

LSC650WU | LSC651WU | LSC730WU | LSC731WU | LSC800WU | LSC801WU

LSC600-4K | LSC601-4K | LSC700-4K | LSC701-4K

LSC730WU-ST | LSC731WU-ST

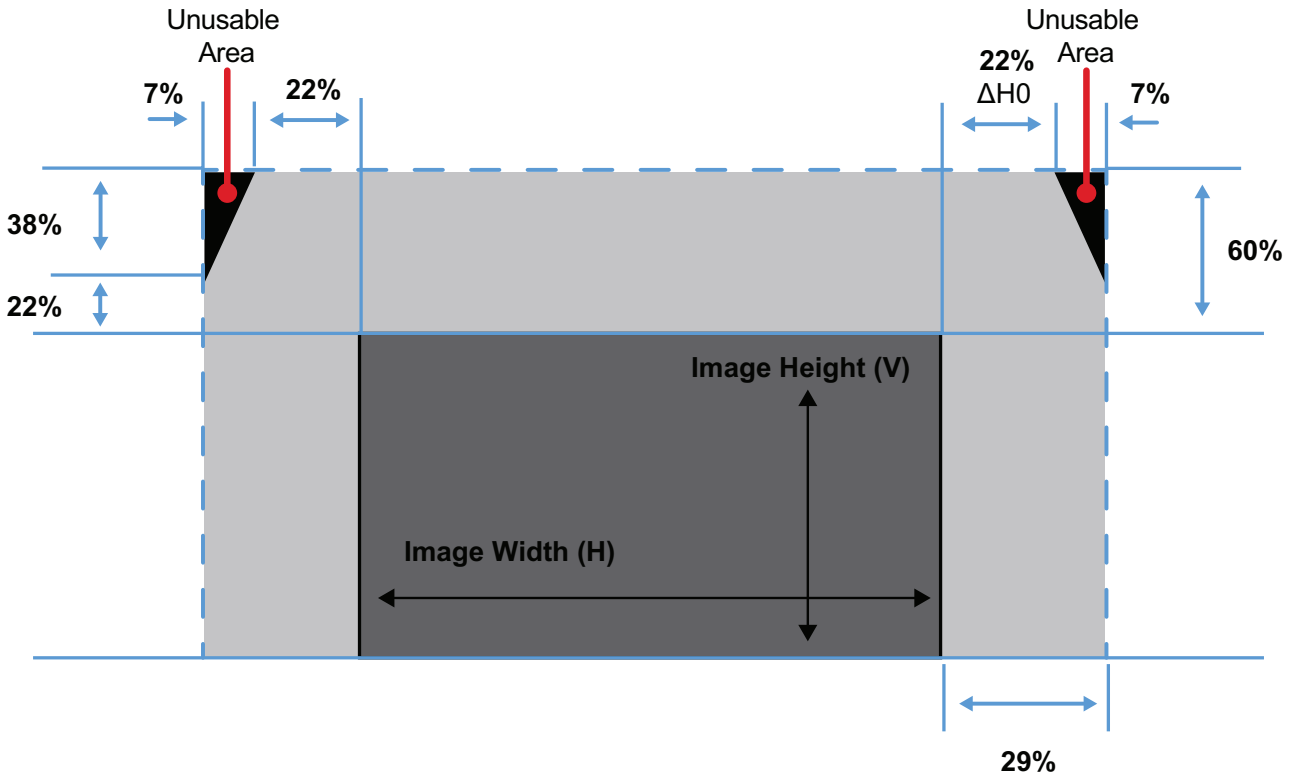

LSC600WU | LSC601WU

NOTE:

- V : Projected image height.
- H : Projected image width.
- ΔH : Maximum horizontal shift when the lens is centered.
- ΔH_0 : The lens shift range without vignetting in horizontal direction when the lens is at the top center or the bottom center.
- ΔV : Maximum vertical shift when the lens is centered.
- ΔV_0 : The horizontal lens shift range that avoids vignetting when the lens is positioned at the top center or bottom center.
- When the lens is shifted beyond the described range of operation, screen edges may become darker or images may become out of focus.
- The calculation is based on image width and image height.

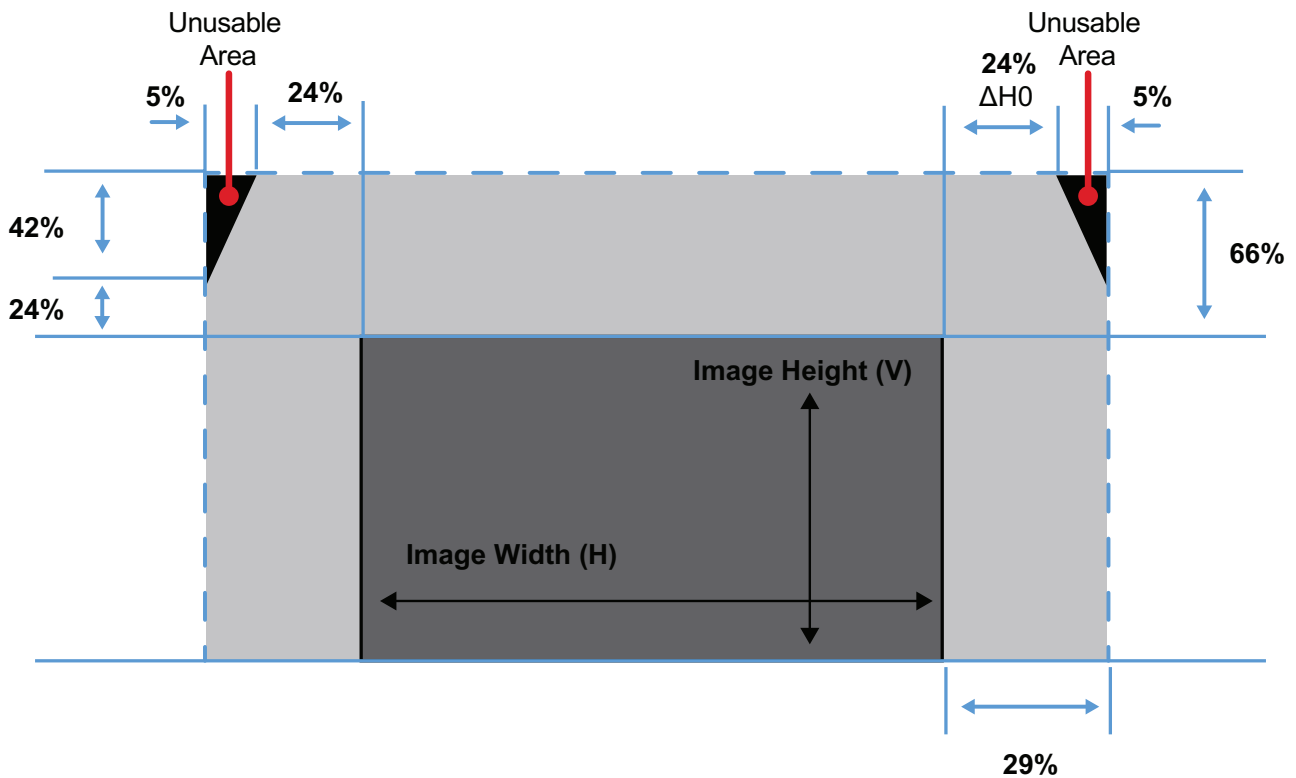

LSC650WU | LSC651WU | LSC730WU | LSC731WU | LSC800WU | LSC801WU

NOTE:

- V : Projected image height.
- H : Projected image width.
- ΔH : Maximum horizontal shift when the lens is centered.
- $\Delta H0$: The lens shift range without vignetting in horizontal direction when the lens is at the top center or the bottom center.
- ΔV : Maximum vertical shift when the lens is centered.
- $\Delta V0$: The horizontal lens shift range that avoids vignetting when the lens is positioned at the top center or bottom center.
- When the lens is shifted beyond the described range of operation, screen edges may become darker or images may become out of focus.
- The calculation is based on image width and image height.

LSC600-4K | LSC601-4K | LSC700-4K | LSC701-4K

NOTE:

- V : Projected image height.
- H : Projected image width.
- ΔH : Maximum horizontal shift when the lens is centered.
- ΔH0 : The lens shift range without vignetting in horizontal direction when the lens is at the top center or the bottom center.
- ΔV : Maximum vertical shift when the lens is centered.
- ΔV0: The horizontal lens shift range that avoids vignetting when the lens is positioned at the top center or bottom center.
- When the lens is shifted beyond the described range of operation, screen edges may become darker or images may become out of focus.
- The calculation is based on image width and image height.

LSC730WU-ST | LSC731WU-ST

NOTE:

- V : Projected image height.
- H : Projected image width.
- ΔH : Maximum horizontal shift when the lens is centered.
- ΔH_0 : The lens shift range without vignetting in horizontal direction when the lens is at the top center or the bottom center.
- ΔV : Maximum vertical shift when the lens is centered.
- ΔV_0 : The horizontal lens shift range that avoids vignetting when the lens is positioned at the top center or bottom center.
- When the lens is shifted beyond the described range of operation, screen edges may become darker or images may become out of focus.
- The calculation is based on image width and image height.

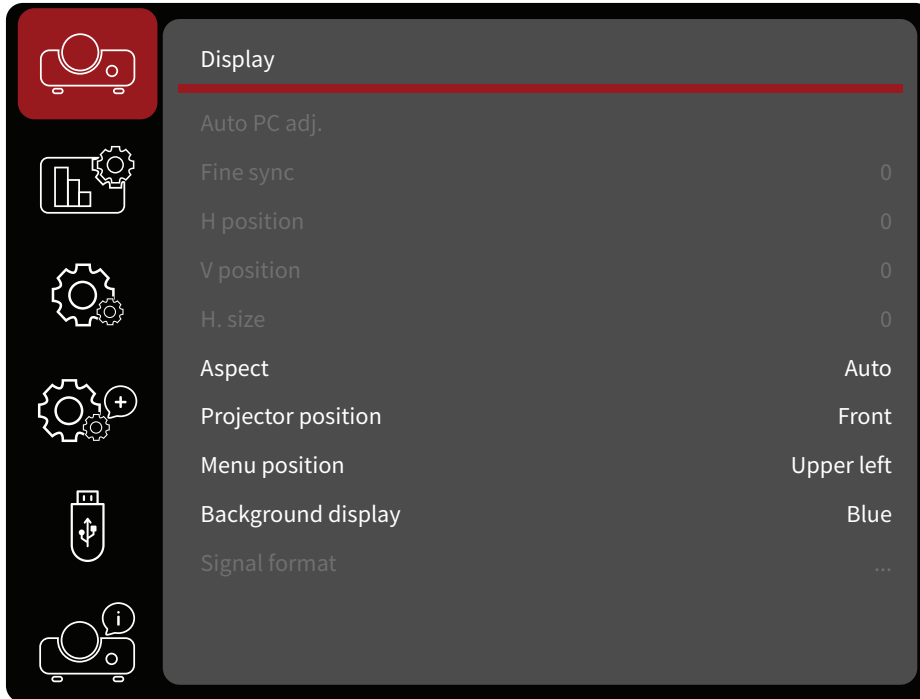

Turning the Projector Off

1. Press the **Power** button on the projector or remote control and a “power off message” will appear.
2. Press the **Power** button again to confirm and put the projector in standby mode.

Menu Operation (non 4K models¹)

On-Screen Display (OSD) Menu

The projector has multilingual on-screen display menus that allow you to make image adjustments and change a variety of settings.

Menu		Description
Display		Adjust image position, Aspect, Projector and Menu Position, Background Display, and Signal Format settings.
Image Settings		Adjust Image Mode, Contrast, Brightness, and other image settings.
Settings		Adjust Direct Power On, Standby Mode, High Altitude Mode, Cooling Fast, Key Lock, Contrast Optimization, Baud Rate, Laser Control, Sound, and HDMI Setup.
Advanced		Adjust Language, Auto Setup, Keystone, Logo, Security, Power Management, Filter, Test Pattern, and Network Setup settings.
USB A		Adjust slide, transition, slide order, and other settings when a USB Type A storage device is connected to the projector.
Information		View projector information.

1 - This includes the following models: LSC600W-ST, LSC601W-ST, LSC600WU-ST, LSC601WU-ST, LSC730WU-ST, LSC731WU-ST, LSC600WU, LSC601WU, LSC650WU, LSC651WU, LSC730WU, LSC731WU, LSC800WU, and LSC801WU.

Menu Navigation

The projector has multilingual on-screen display menus that allow for image and settings adjustment.

1. To open the On-Screen Display (OSD) Menu, press the **Menu** button on the projector or the remote control.
2. When the OSD is displayed, use the **Navigation** buttons (**▲/▼**) to select any item in the main menu. While making a selection on a particular page, press the **OK** button on the projector or the remote control to enter a sub-menu.
3. Use the **Navigation** buttons (**▲/▼/◀/▶**) to select the desired item in the sub-menu and then press **OK** to view further settings. Adjust the settings by using the **Navigation** buttons (**▲/▼/◀/▶**).
4. Select the next item to be adjusted in the sub-menu and adjust as described above.
5. Press **OK** to confirm, and the screen will return to the main menu.
6. To exit, press the **Menu** button again. The OSD menu will close and the projector will automatically save the new settings.

Display

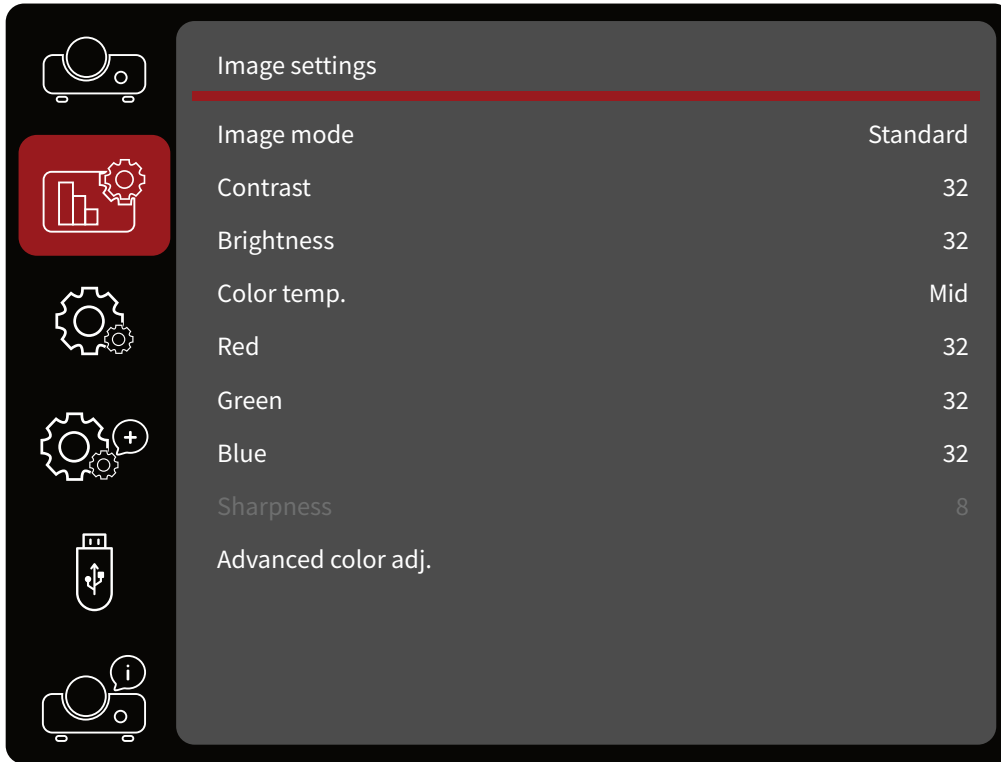

Menu	Description
Auto PC Adj.	Automatically adjust the best picture timings for the projected image. NOTE: For the PC input signal only.
Fine Sync	Manually adjust the picture timings for the projected image. NOTE: For the PC input signal only.
H Position	Manually set the horizontal position of the projected image. NOTE: <ul style="list-style-type: none"> For the PC input signal only. The adjustment range may vary depending on the display timings.
V Position	Manually set the vertical position of the projected image. NOTE: <ul style="list-style-type: none"> For the PC input signal only. The adjustment range may vary depending on the display timings.
H. Size	Manually set the horizontal width of the projected image. NOTE: For the PC input signal only.

Menu	Description	
Aspect	Auto	Scales an image proportionally to fit the projector's native resolution in its horizontal width. This is suitable for the incoming image which is neither in 4:3 nor 16:9 and you want to make most use of the screen without altering the image's aspect ratio.
	16:9	Scales an image so that it is displayed in the center of the screen with a 16:9 aspect ratio. This is most suitable for images which are already in a 16:9 aspect, like high definition TV, as it displays them without aspect alteration.
	21:9	Scales an image for a MTR application.
	16:10	Scales an image so that it is displayed in the center of the screen with a 16:10 aspect ratio. This is most suitable for images which are already in a 16:10 aspect, as it displays them without aspect alteration.
	4:3	Scales an image so that it is displayed in the center of the screen with a 4:3 aspect ratio. This is most suitable for 4:3 images like computer monitors, standard definition TV, and 4:3 aspect DVD movies, as it displays them without aspect alteration.
Projector Position	Select the projection position of the projector.	
Menu Position	Set the On-Screen Display (OSD) Menu's position on screen.	
Background Display	Set the background color.	
Signal Format³	Set the projection area's display color.	

³ - Not available for USB reader, USB display, or LAN display.

Image Settings

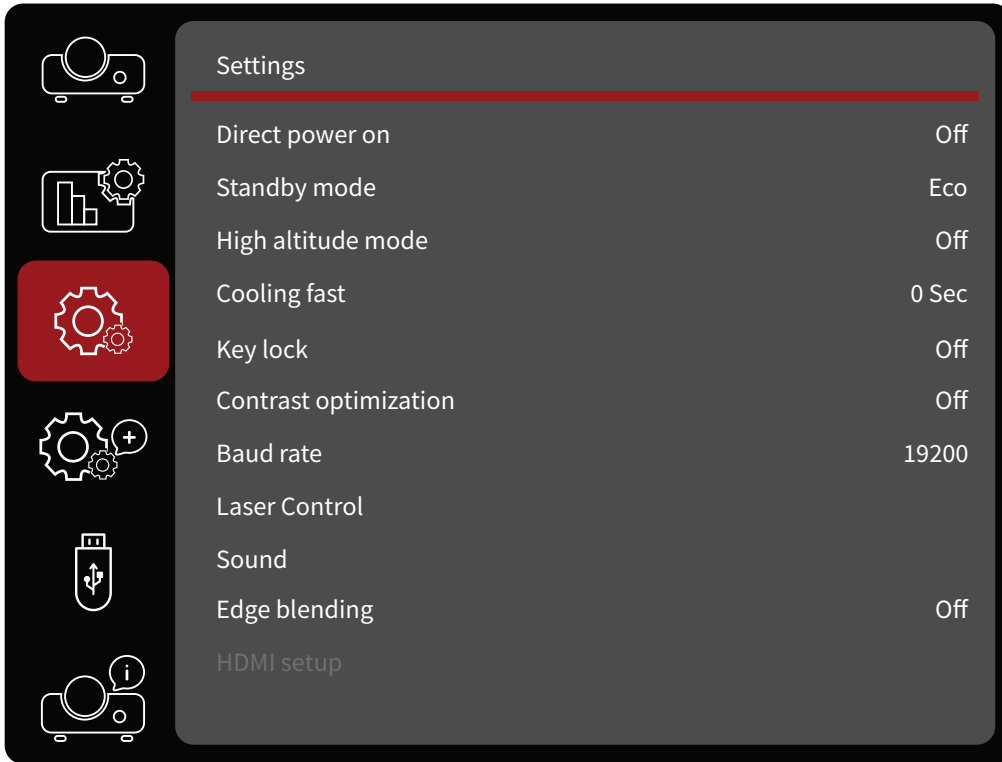

Menu	Description	
Image Mode	There are several predefined display modes that you can choose from to suit your viewing preference.	
	Standard	Designed for normal circumstances in a daylight environment.
	Cinema	Provides the best balance of detail and colors for watching movies.
	Golf	Suitable for golf simulators.
	Colorboard	Designed for environments with different wall colors.
	User	User-specific, custom image settings.
	Brightest	Suitable for bright, well-lit environments.
Contrast	Use this to set the peak white level after you have previously adjusted the Brightness setting to suit your selected input and viewing environment.	
Brightness	The higher the value, the brighter the image. Lower values will result in a darker image.	
Color Temp.	High/Mid/Low	Select from Warm, Standard, or Cold color temperatures.
	User	Set a custom color temperature.
Red	Adjusts the contrast levels of red.	
Green	Adjusts the contrast levels of green.	

Menu	Description
Blue	Adjusts the contrast levels of blue.
Sharpness	A higher value will sharpen the image, while a lower value will soften the image.
Advanced Color Adj.⁴	Only in permanent installations with controlled lighting levels such as boardrooms, lecture theaters should advanced color adjustment be considered. Advanced color adjustment provides fine color control adjustment to allow for more accurate color reproduction. Select the primary color first and adjust its range/values in hue, saturation, and gain.

4 - Not available for LSC600W-ST and LSC601W-ST.

Settings

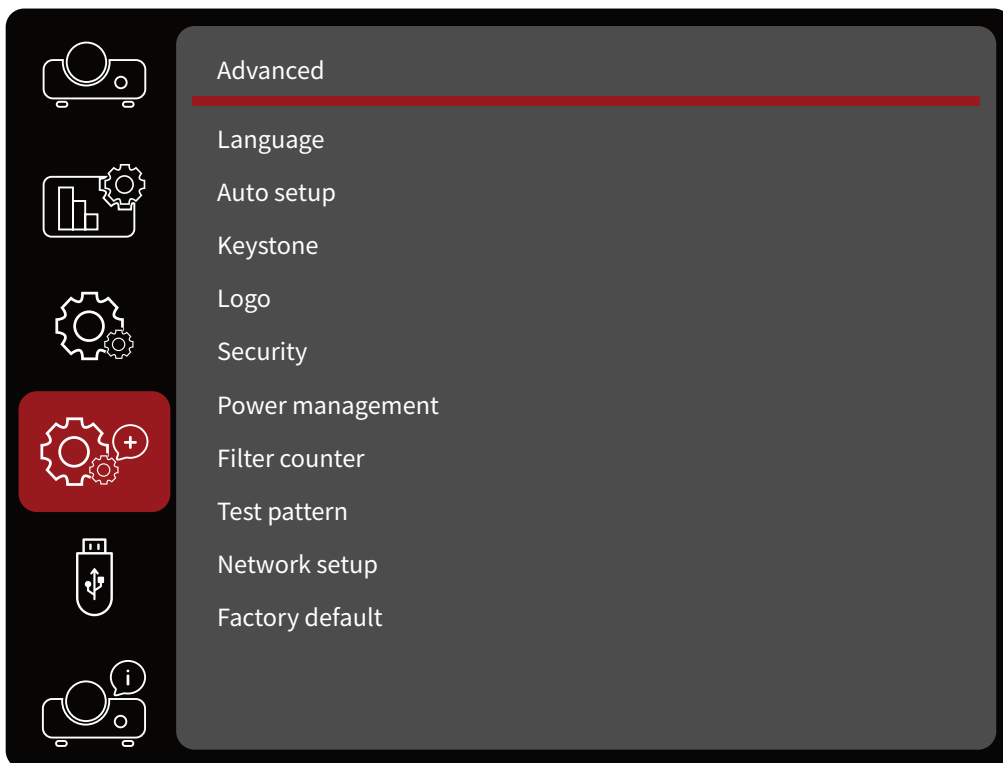

Menu	Description	
Direct Power On	The projector will turn on automatically once connected to a power source.	
Standby Mode	Normal	Normal standby > 0.5W; the Network setup function is available.
	Eco	Eco standby < 0.5W; the Network setup function is not available.
	Network	Network standby; only available Wake on LAN (WOL).
High Altitude Mode	When turned on, the fans will spin faster for better cooling and performance. This is useful for high altitude environments where the air is thin. If set to Auto , the projector will activate the high-altitude mode automatically.	
Cooling Fast	Select the cooling fan speed to shorten the cooling time.	
Key Lock	Lock and unlock the control panel.	
Contrast Optimization	Select this function to automatically optimize and adjust the signal based on the image, providing dynamic contrast for the best possible visual clarity and depth.	

Menu	Description	
Baud Rate	Set a baud rate that is identical with your computer's so that you can connect the projector using a suitable RS-232 cable and control the projector with RS-232 commands.	
Laser Control	Change the light source brightness according to the projector's operating environment.	
	Normal	Adjustable brightness level, 50%~100%.
	Full	Non-adjustable brightness level, 100%.
	ECO1	60% brightness level.
	ECO2	50% brightness level.
Sound	Volume	Decrease or increase the sound level.
	Mute	Turn off or turn on the sound.
Edge Blending	<p>The Edge Blending function supports blending up to four projector screens of the same model. Mixing different projector models is not recommended. This function can horizontally split input content into a maximum of four parts, but it cannot split input content vertically. Please use an HDMI splitter to send the same input content to all blending projectors.</p> <p>NOTE:</p> <ul style="list-style-type: none"> • Edge Blending does not support VGA input. • Adjusting Edge Blending will reset all existing horizontal and vertical Keystone adjustments. 	
	 <p>The screenshot shows a dark grey settings menu with a red header 'Settings'. Underneath, 'Edge Blending' is highlighted in red and has a toggle switch set to 'On'. Other options listed include 'Area Setting', 'White Balance', 'Image Edge Adj.', 'EB Keystone', and 'Advanced'.</p>	
	Area Setting	Set the range of the blending area.
White Balance	Adjust the Red / Green / Blue color brightness and saturation of the blended image, bringing the colors closer together	

Menu	Description		
Edge Blending	Image Edge Adj.	Adjust the blending effect smoothly by switching between the Left, Right, Top, Bottom, and Non-Blending areas.	
		Level 0	Adjust brightness of blending area to 0%.
		Level 1	Adjust brightness of blending area to 25%.
		Level 2	Adjust brightness of blending area to 50%.
		Level 3	Adjust brightness of blending area to 75%.
		Level 4	Adjust brightness of blending area to 100%.
		Level 5	Adjust brightness of non-blending area to 0%.
	EB Keystone	<p>Set 4 corner adjustment and grid image adjustment.</p> <p>Use the EB Keystone feature to precisely adjust the blending area between projectors. There are two OSD tools available: EB 4Dot Keystone and Grid Image Tune.</p> <p>The 4Dot Keystone tool adjusts the four corners of the full screen, while the Grid Image Tune tool allows for detailed position adjustments.</p>	
	Advanced	Set projector quantity, projector position and blending range.	

Menu	Description		
HDMI Setup	Image	Auto	Automatically set to standard signal.
		64~940	Manually adjust the signal until the image is normal.
		0~1023	Manually adjust the signal until the image is normal.
	Sound	HDMI	Output audio from the device connected to the HDMI port.
		Computer	Output audio from the device connected to the COMPUTER port.
	HDMI EQ Settings	0/1/2/3	Adjust the HDMI input signal level according to the device connected to the HDMI port. If there is a lot of noise in the image, or problems such as the inability to project the image occur, the settings must be changed.

Advanced

Menu	Description	
Language	Select the On-Screen Display (OSD) Menu language.	
Auto Setup	Input Search	Automatically find and project an available input source.
	Auto PC Adj.	When Auto PC Adj. is turned on, the projector will input an analog signal. Pressing the Auto button on the remote control will adjust Fine Sync, H. Position, V. Position, and H. Size automatically. When Auto PC Adj. is turned off, the Auto button on the remote control will be unsupported.
	Auto Keystone	Automatically correct a distorted projected image.

Menu	Description	
Keystone	Keystone	Store or reset the keystone correction after unplugging the power cord.
	H/V Keystone	Correct the projected image horizontally or vertically.
	4-Corner Correction	Correct the projected image's four corners.
	6-Corner Correction	Correct the projected images' six corners.
	Curved Correction	Correct a projected image that is uneven or deformed due to a curved surface.
	Grid Image Tune	Adjust the local points of the projected image.
	Reset	Return the settings to their default values.
Logo	Logo Select	Set the startup logo when powering on the projector.
	Capture	Capture images being projected and use it for a startup logo.
	Logo PIN Code Lock	Prevent unauthorized personnel from changing the logo screen.
	Logo PIN Code Change	Change the PIN code to any 3-digit number.
Security	PIN Code Lock	Prevent unauthorized personnel from operating the projector.
	PIN Code Change	Change the PIN code to any 3-digit number.

Menu	Description	
<p style="text-align: center;">Power Management</p>	Ready	<p>A countdown will be displayed after 30 seconds without a signal input.</p> <p>Allows the projector to enable Ready mode automatically after a set period of time once no input source is detected .</p> <p>If the input signal is reconnected or any key (except the Power button) on the remote control or control panel is pressed, the light source will be turn back on.</p>
	Shutdown	<p>A countdown will be displayed after 30 seconds without a signal input.</p> <p>Allows the projector to shut down automatically after a set period of time once no input source is detected to prevent unnecessary waste of light source life.</p>
	Off	Disable the power management function.
	Timer	Sets period of time once no input source is detected and allows the projector to turn Ready mode automatically.
	Ready Countdown	<p>When Power Management is set to Ready, the transition time from Ready mode to standby mode is 0 to 30 minutes.</p> <p>If set to 0, the projector can not switch automatically. In Ready mode, press the Power button to switch the projector from Ready mode to Standby mode and press any other key to power on the projector.</p>
<p style="text-align: center;">Filter Counter</p>	<p>The filter prevents dust from entering your projector, which can build up on internal parts. A blocked filter may reduce the cooling fan's efficiency, causing the projector to overheat and potentially shorten its lifespan. Clean the filter promptly whenever the Filter Warning icon appears.</p> <p>Please follow these steps to clean your filter:</p> <ol style="list-style-type: none"> 1. Turn off the projector and unplug it from its power source. 2. Remove the filter. 3. Gently clean it with a brush. 4. Replace the filter, making sure it has been inserted fully. 	
	Filter Counter	Display the filter's usage time.
	Timer	Set the filter's cleaning time.
	Filter Counter Reset	Reset the Filter Counter.

Menu	Description
Test Pattern	Display the projector's built-in test pattern. NOTE: Not available for USB A, USB B, and LAN display.
Network Setup	Set the IP address, LAN, and DHCP settings. NOTE: The projector does not support wireless display. Users can purchase a Wi-Fi dongle with a built-in RTL8192EU driver.
Factory Default	Returns all settings to the factory preset values. NOTE: When using Reset Settings, the following settings will still remain: Language, Projector Projection, Baud Rate, High Altitude, and Light Source Hours.

Controlling the Projector through a Network

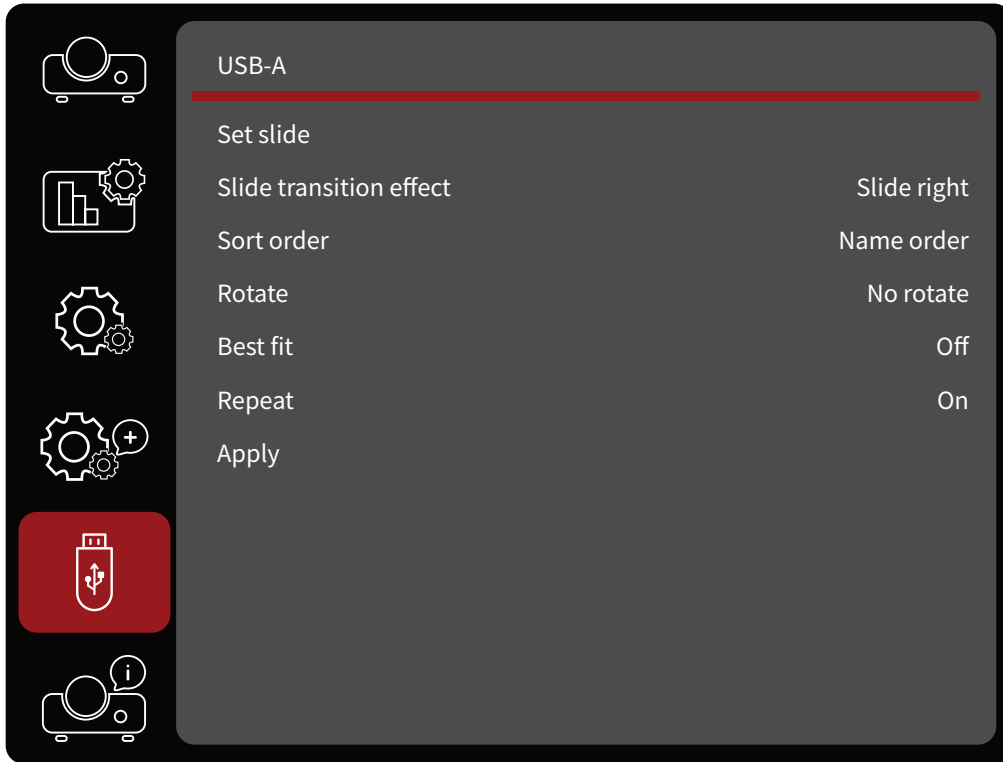

The projector provides diverse networking and remote management features. The LAN /RJ45 function of the projector, through a network, can remotely manage: Power On/Off, Volume adjustment, Input select, Brightness, and more.

1. Connect the projector to a network via the LAN/RJ45 port.
2. Open the On-Screen Display Menu and go to: **Advanced > Network Setup**.
3. Select **DHCP** and turn it **On** to obtain an IP address automatically; or select **Off** to enter the network information manually.

NOTE: Please wait for around 15~20 seconds, then re-enter the **Network Setup** settings page. The Projector IP Address, Subnet Mask, Default Gateway, DNS Server settings will be displayed. Make note of the IP address displayed in the Projector IP Address row.

4. Using a web browser, and under the same network, type in the projector's IP address.
5. Enter the user name and password, then click **Log in**.

USB-A

Menu	Description
Set Slide	Display slides.
Slide Transition Effect	Control slide playback transition effects.
Sort Order	Set the order of the slides.
Rotate	Set the rotation direction of images.
Best Fit	Set the image to fit with the projection screen.
Repeat	Play the slides repeatedly when turned on.
Apply	Enable the slide settings.

View Input source, H-Sync Freq., V-Sync Freq., Light Source Counter, Image Mode, MAC Address, Serial Number, Firmware Version, and SUBCPU information.

Menu Operation (4K models¹)

On-Screen Display (OSD) Menu

The projector has multilingual on-screen display menus that allow you to make image adjustments and change a variety of settings.

Menu		Description
Adjust		Adjust Picture, Audio, Light Source Mode, Advanced, Color Management, and User settings.
Installation		Adjust Projector Projection, Geometric Correction, Filter, High Altitude Mode, and Digital Lens Shift settings.
Settings		Adjust Language, Wired LAN, Power Management, HDMI, Information, Firmware, and Factory Reset settings.

1- This includes the following models: LSC600-4K, LSC601-4K, LSC700-4K, and LSC701-4K.

Menu Navigation

The projector has multilingual on-screen display menus that allow for image and settings adjustment.

1. To open the On-Screen Display (OSD) Menu, press the **Menu** button on the projector or the remote control.
2. When the OSD is displayed, use the **Navigation** buttons (**▲/▼**) to select any item in the main menu. While making a selection on a particular page, press the **OK** button on the projector or the remote control to enter a sub-menu.
3. Use the **Navigation** buttons (**▲/▼/◀/▶**) to select the desired item in the sub-menu and then press **OK** to view further settings. Adjust the settings by using the **Navigation** buttons (**▲/▼/◀/▶**).
4. Select the next item to be adjusted in the sub-menu and adjust as described above.
5. Press **OK** to confirm, and the screen will return to the main menu.
6. To exit, press the **Menu** button again. The OSD menu will close and the projector will automatically save the new settings.

Menu Options

Adjust

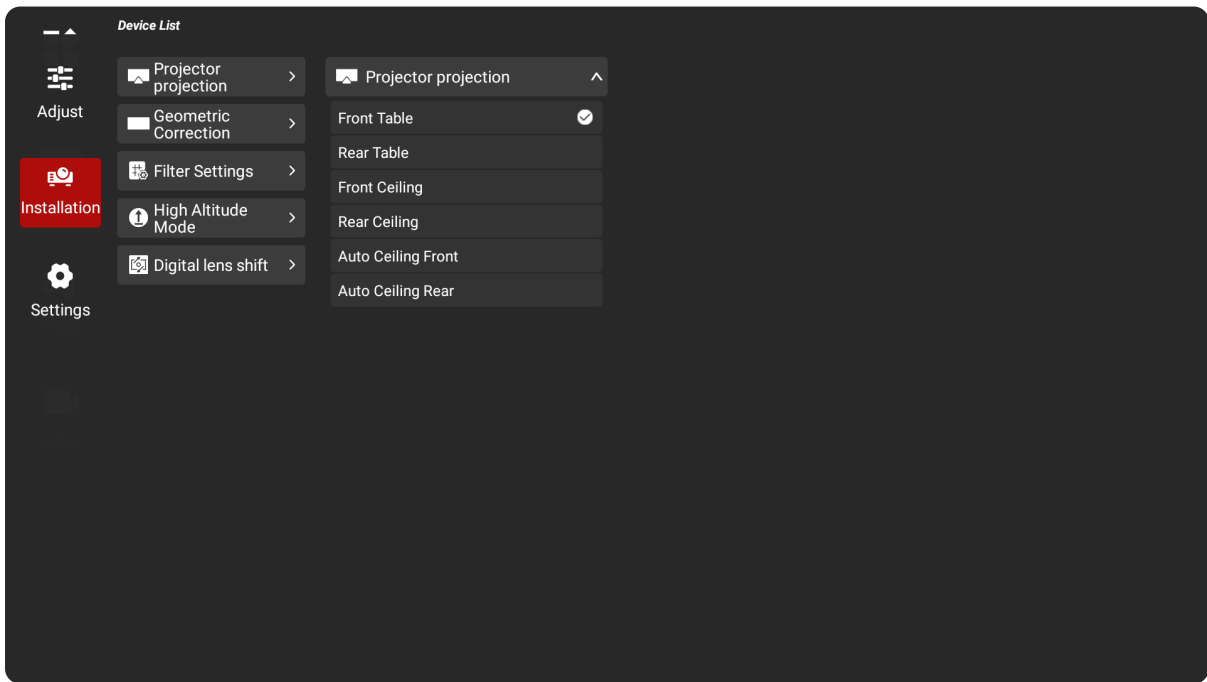

Menu		Description	
Picture	Picture Mode	There are several predefined picture modes that you can choose from for your viewing preference.	
		Brightest	Suitable for bright, well-lit environments.
		Presentation	Suitable for most presenting needs for business and education environments.
		Movie	Provides the best balance of detail and colors for watching movies.
		Golf	Suitable for golf simulators.
		Game	Optimizes your projector for maximum contrast and vivid colors. With this mode, you can shadow detail when playing games.
		HDR	Enable for HDR supported content and darker blacks, brighter highlights, and vivid color.
		User	User-specific, custom image settings.

Menu		Description	
Picture	Brightness	The higher the value, the brighter the image. Lower values will result in a darker image.	
	Contrast	Use this to set the peak white level after you have previously adjusted the Brightness setting to suit your selected input and viewing environment.	
	Saturation	Refers to the amount of that color in a video picture.	
	Hue	Adjust the color level.	
	Sharpness	A higher value will sharpen the image, while a lower value will soften the image.	
	Gamma	Manually adjust the brightness level of the monitor's grayscale levels.	
	Color Temperature	Standard/ Warm/Cool	Select from Standard, Warm, or Cool color temperatures.
		User	Set a custom color temperature.
	Red	Adjusts the contrast levels of red.	
	Green	Adjusts the contrast levels of green.	
	Blue	Adjusts the contrast levels of blue.	
Audio	Volume	Decrease or increase the sound level.	
	S/PDIF	Enable or disable the S/PDIF function.	
Light Source Mode	Normal	Standard operating mode.	
	ECO	Lower the light output, lowering power consumption.	
	Adjust	Select the power percentage (50%~100%) for brightness mode.	

Menu		Description
Aspect Ratio	Auto	Scales an image proportionally to fit the projector's native resolution in its horizontal width. This is suitable for the incoming image which is neither in 4:3 nor 16:9 and you want to make most use of the screen without altering the image's aspect ratio.
	Full	Projects the image as its original resolution and resizes it to fit within the display area.
	4:3	Scales an image so that it is displayed in the center of the screen with a 4:3 aspect ratio. This is most suitable for 4:3 images like computer monitors, standard definition TV, and 4:3 aspect DVD movies, as it displays them without aspect alteration.
	16:9	Scales an image so that it is displayed in the center of the screen with a 16:9 aspect ratio. This is most suitable for images which are already in a 16:9 aspect, like high definition TV, as it displays them without aspect alteration.
	16:10	Scales an image so that it is displayed in the center of the screen with a 16:10 aspect ratio. This is most suitable for images which are already in a 16:10 aspect, as it displays them without aspect alteration.
	21:9	Scales an image for a MTR application.
Magnify	Zoom	Reduce or magnify the projected image.
	Positions	Pan the enlarged image to fit the display area and make the necessary adjustments.
Advanced	HDMI Range	Allows the user to select HDMI greyscale range between 0~255 (full range), 16~240 (limited range) or Auto by the signal type detected.
	HDMI EDID	Used to configure the display settings when connecting to another device.
	DCR	Detects the image signal and intelligently controls the backlight brightness and color.
Color Management	Hue	Adjust the color level.
	Saturation	Refers to the amount of that color in a video picture.
	Gain	Adjust white temperature or a specific color temperature and gain value (red, green, blue).
User Reset	Reset the settings to their default values.	

Installation

Menu		Description
Projector Projection	Select the preferred projection location.	
Geometric² Correction	Keystone	Adjust image distortion.
	4 Corner	Adjusts each corner to make a square image when the projection surface is not level.
Filter Settings	Review the filter's usage hours and enable or disable a warning message when the filter is used for a set amount of time.	
High Altitude Mode	When turned on, the fans will spin faster for better cooling and performance. This is useful for high altitude environments where the air is thin. If set to Auto , the projector will activate the high-altitude mode automatically.	
Digital Lens Shift	Digitally adjust the position of the projected image.	

2 - The default Keystone settings will be cleared when using 4-corner Correction.

Settings

Menu	Description
Language	Select the On-Screen Display (OSD) Menu language.
Wired LAN	Set DHCP to Auto or input a Static IP.
Power Management	Enable or disable Power On Mode and Auto Power Off, or set the Standby Mode type.
HDMI Settings	CEC When you connect HDMI CEC-compatible devices to the projector with HDMI cables, you can control them on the same power on or power off status using the HDMI CEC control feature in the projector's OSD. This lets one device or multiple devices in a group power on or power off via HDMI CEC in a typical configuration. NOTE: ARC will be turned off if CEC is disabled.
	HDMI ARC Enable or disable HDMI ARC support.
Information	View Firmware Version, MCU Version, Baude Rate, Resolution, MAC Address, and Used Time information.
Firmware Upgrade	Update the firmware by USB or OTA.

Menu	Description
Factory Reset	Returns all settings to the factory preset values. NOTE: <ul style="list-style-type: none">• When using Reset Settings, the following settings will still remain: Language, Projector Projection, Baud Rate, High Altitude, and Light Source Hours.• The projector will restart after the Factory Reset completes.

Controlling the Projector through a Network

The projector provides diverse networking and remote management features. The LAN /RJ45 function of the projector, through a network, can remotely manage: Power On/Off, Volume adjustment, Input select, Brightness, and more.

1. Connect the projector to a network via the LAN/RJ45 port.
2. Open the On-Screen Display Menu and go to: **Advanced > Network Setup**.
3. Select **DHCP** and turn it **On** to obtain an IP address automatically; or select **Off** to enter the network information manually.

NOTE: Please wait for around 15~20 seconds, then re-enter the **Network Setup** settings page. The Projector IP Address, Subnet Mask, Default Gateway, DNS Server settings will be displayed. Make note of the IP address displayed in the Projector IP Address row.

4. Using a web browser, and under the same network, type in the projector's IP address.
5. Enter the user name and password, then click **Log in**.

Troubleshooting

This section describes some common problems that you may experience when using the projector.

Problem or Issue	Possible Solutions
The projector does not turn on	<ul style="list-style-type: none">• Ensure the power cord is properly attached to the projector and to the power outlet.• If the cooling process has not completed, please wait until it has finished then try to turn on the projector again.• If the above does not work, try another power outlet or another electrical device with the same power outlet.
There is no picture	<ul style="list-style-type: none">• Ensure the video source cable is connected properly, and that the video source is turned on.• If the input source is not selected automatically, select the correct source with the “Source Input” on either the projector or the remote control.
The image is blurred	<ul style="list-style-type: none">• Adjusting focus with the Focus Ring will help correctly focus the projection lens.• Ensure the projector and screen are aligned properly. If necessary, adjust the height of the projector as well as the projection angle and direction.
The image is reversed	<ul style="list-style-type: none">• Open the OSD Menu and go to: Setup > Projection and adjust the projection option.
The image is stretched when projecting a 16:9 DVD	<ul style="list-style-type: none">• When you play an anamorphic DVD or 16:9 DVD, the projector will show the best image in 16:9.• If you play a 4:3 format DVD title, please change the format as 4:3 in projector OSD Menu.• Please setup the display format as 16:9 (wide) aspect ratio on the DVD player.
The remote control does not work	<ul style="list-style-type: none">• Ensure there are no obstacles between the remote control and projector; and that they are within range, 8 m (26 ft).• The batteries may be out of power, please check and replace if necessary.

Problem or Issue	Possible Solutions
The projector stops responding to all controls	<ul style="list-style-type: none">• Turn off the projector and unplug the power cord. Wait at least 20 seconds then reconnect and try again.

LED Indicators

When the warning indicators (see below) light up or flash, the projector will automatically shutdown. Unplug the power cord from the projector, wait for 30 seconds and try again. If the warning indicators light up or flash, please contact your nearest service center for assistance.

Maintenance

General Precautions

- Make sure the projector is turned off and the power cable is unplugged from the power outlet.
- Never remove any parts from the projector. Contact ViewSonic® or a reseller when any part of the projector needs replacing.
- Never spray or pour any liquid directly onto the case.
- Handle the projector with care, as a darker-colored projector, if scuffed, may show marks more clearly than a lighter-colored projector.

Cleaning the Lens

- Use a canister of compressed air to remove dust.
- If the lens is still not clean, use lens-cleaning paper or moisten a soft cloth with lens cleaner and gently wipe the surface.

CAUTION: Never rub the lens with abrasive materials.

Cleaning the Case

- Use a soft, lint-free, dry cloth to remove dirt or dust.
- If the case is still not clean, apply a small amount of non-ammonia, non-alcohol based, mild non-abrasive detergent onto a clean, soft, lint-free cloth, then wipe the surface.

CAUTION: Never use wax, alcohol, benzene, thinner, or other chemical detergents.

Storing the Projector

If you intend to store the projector for an extended period of time:

- Ensure the temperature and humidity of the storage area are within the recommend range.
- Retract the adjuster foot completely.
- Remove the batteries from the remote control.
- Pack the projector in its original packaging or equivalent.

Disclaimer

- ViewSonic® does not recommend the use of any ammonia or alcohol-based cleaners on the lens or case. Some chemical cleaners have been reported to damage the lens and/or case of the projector.
- ViewSonic® will not be liable for damage resulting from use of any ammonia or alcohol-based cleaners.

Cleaning the Filter

Please follow these steps to clean your filter:

1. Turn off the projector and unplug it from its power source.
2. Remove the filter.
3. Gently clean it with a brush.
4. Replace the filter, making sure it has been inserted fully.

CAUTION: Do not operate the projector after removing the filter. Otherwise, dust will adhere to the lens assembly, compromising image quality.

Regulatory and Service Information

Compliance Information

This section addresses all connected requirements and statements regarding regulations. Confirmed corresponding applications shall refer to nameplate labels and relevant markings on the unit.

FCC Compliance Statement

This device complies with part 15 of FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

Industry Canada Statement

CAN ICES (A) / NMB (A)

This Class A digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de classe A est conforme à la norme NMB-003 du Canada.

CE Conformity for European Countries

CE The device complies with the EMC Directive 2014/30/EU and Low Voltage Directive 2014/35/EU. Ecodesign Directive 2009/125/EC.

The following information is only for EU-member states:

The mark shown to the right is in compliance with the Waste Electrical and Electronic Equipment Directive 2012/19/EU (WEEE). The mark indicates the requirement NOT to dispose of the equipment as unsorted municipal waste, but use the return and collection systems according to local law.

Declaration of RoHS2 Compliance

This product has been designed and manufactured in compliance with Directive 2011/65/EU of the European Parliament and the Council on restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS2 Directive) and is deemed to comply with the maximum concentration values issued by the European Technical Adaptation Committee (TAC) as shown below:

Substance	Proposed Maximum Concentration	Actual Concentration
Lead (Pb)	0.1%	< 0.1%
Mercury (Hg)	0.1%	< 0.1%
Cadmium (Cd)	0.01%	< 0.01%
Hexavalent Chromium (Cr6 ⁺)	0.1%	< 0.1%
Polybrominated biphenyls (PBB)	0.1%	< 0.1%
Polybrominated diphenyl ethers (PBDE)	0.1%	< 0.1%
Bis (2-ethylhexyl) phthalate (DEHP)	0.1%	< 0.1%
Butyl benzyl phthalate (BBP)	0.1%	< 0.1%
Dibutyl phthalate (DBP)	0.1%	< 0.1%
Diisobutyl phthalate (DIBP)	0.1%	< 0.1%

Certain components of products as stated above are exempted under the Annex III of the RoHS2 Directives as noted below. Examples of exempted components are:

- Mercury in cold cathode fluorescent lamps and external electrode fluorescent lamps (CCFL and EEFL) for special purposes not exceeding (per lamp):
 - » Short length (500 mm): maximum 3.5 mg per lamp.
 - » Medium length (> 500 mm and 1,500 mm): maximum 5 mg per lamp.
 - » Long length (> 1,500 mm): maximum 13 mg per lamp.
- Lead in glass of cathode ray tubes.
- Lead in glass of fluorescent tubes not exceeding 0.2% by weight.
- Lead as an alloying element in aluminum containing up to 0.4% lead by weight.
- Copper alloy containing up to 4% lead by weight.
- Lead in high melting temperature type solders (i.e. lead-based alloys containing 85% by weight or more lead).
- Electrical and electronic components containing lead in a glass or ceramic other than dielectric ceramic in capacitors, e.g. piezoelectronic devices, or in a glass or ceramic matrix compound.

Indian Restriction of Hazardous Substances

Restriction on Hazardous Substances statement (India). This product complies with the “India E-waste Rule 2011” and prohibits use of lead, mercury, hexavalent chromium, polybrominated biphenyls or polybrominated diphenyl ethers in concentrations exceeding 0.1 weight % and 0.01 weight % for cadmium, except for the exemptions set in Schedule 2 of the Rule.

Limited Warranty

ViewSonic® Projector

What the warranty covers:

ViewSonic® warrants its products to be free from defects in material and workmanship, under normal use, during the warranty period. If a product proves to be defective in material or workmanship during the warranty period, ViewSonic® will, at its sole option, repair or replace the product with a like product. Replacement product or parts may include remanufactured or refurbished parts or components.

Limited Three (3) year General Warranty:

Subject to the more limited one (1) year warranty set out below, North and South America: Three (3) years warranty for all parts excluding the lamp, three (3) years for labor, and one (1) year for the original lamp from the date of the first consumer purchase.

Other regions or countries: Please check with your local dealer or local ViewSonic® office for the warranty information.

Limited One (1) year Heavy Usage Warranty:

Under heavy usage settings, where a projector's use includes more than fourteen (14) hours average daily usage, North and South America: One (1) year warranty for all parts excluding the lamp, one (1) year for labor, and ninety (90) days for the original lamp from the date of the first consumer purchase; Europe: One (1) year warranty for all parts excluding the lamp, one (1) year for labor, and ninety (90) days for the original lamp from the date of the first consumer purchase. Other regions or countries: Please check with your local dealer or local ViewSonic® office for the warranty information. Lamp warranty subject to terms and conditions, verification and approval. Applies to manufacturer's installed lamp only. All accessory lamps purchased separately are warranted for 90 days.

Who the warranty protects:

This warranty is valid only for the first consumer purchaser.

What the warranty does not cover:

1. Any product on which the serial number has been defaced, modified, or removed.
2. Damage, deterioration, or malfunction resulting from:
 - » Accident, misuse, neglect, fire, water, lightning, or other acts of nature, unauthorized product modification, or failure to follow instructions supplied with the product.
 - » Operation outside of product specifications.
 - » Operation of the product for other than the normal intended use or not under normal conditions.
 - » Repair or attempted repair by anyone not authorized by ViewSonic®.
 - » Any damage of the product due to shipment.
 - » Removal or installation of the product.
 - » Causes external to the product, such as electric power fluctuations or failure.
 - » Use of supplies or parts not meeting Viewsonic's specifications.
 - » Normal wear and tear.
 - » Any other cause which does not relate to a product defect.
3. Removal, installation, and set-up service charges.

How to get service:

1. For information about receiving service under warranty, contact ViewSonic® Customer Support (Please refer to the "Customer Support" page). You will need to provide your product's serial number.
2. To obtain warranted service, you will be required to provide: (a) the original dated sales slip, (b) your name, (c) your address, (d) a description of the problem, and (e) the serial number of the product.
3. Take or ship the product, freight prepaid, in the original container to an authorized ViewSonic® service center or ViewSonic®.
4. For additional information or the name of the nearest ViewSonic® service center, contact ViewSonic®.

Limitation of implied warranties:

There are no warranties, express or implied, which extend beyond the description contained herein including the implied warranty of merchantability and fitness for a particular purpose.

Exclusion of damages:

ViewSonic's liability is limited to the cost of repair or replacement of the product. ViewSonic® shall not be liable for:

1. Damage to other property caused by any defects in the product, damages based upon inconvenience, loss of use of the product, loss of time, loss of profits, loss of business opportunity, loss of goodwill, interference with business relationships, or other commercial loss, even if advised of the possibility of such damages.
2. Any other damages, whether incidental, consequential or otherwise.
3. Any claim against the customer by any other party.

Effect of state law:

This warranty gives you specific legal rights, and you may also have other rights which vary from local authority. Some local governments do not allow limitations on implied warranties and/or do not allow the exclusion of incidental or consequential damages, so the above limitations and exclusions may not apply to you.

Sales outside the U.S.A. and Canada:

For warranty information and service on ViewSonic® products sold outside of the U.S.A. and Canada, contact ViewSonic® or your local ViewSonic® dealer.

The warranty period for this product in mainland China (Hong Kong, Macao, and Taiwan Excluded) is subject to the terms and conditions of the Maintenance Guarantee Card.

For users in Europe and Russia, full details of warranty provided can be found at: <http://www.viewsonic.com/eu/> under "Support/Warranty Information".

Mexico Limited Warranty

ViewSonic® Projector

What the warranty covers:

ViewSonic® warrants its products to be free from defects in material and workmanship, under normal use, during the warranty period. If a product proves to be defective in material or workmanship during the warranty period, ViewSonic® will, at its sole option, repair or replace the product with a like product. Replacement product or parts may include remanufactured or refurbished parts or components & accessories.

How long the warranty is effective:

3 years for all parts excluding the lamp, 3 years for labor, 1 year for the original lamp from the date of the first consumer purchase.

Lamp warranty subject to terms and conditions, verification and approval. Applies to manufacturer's installed lamp only.

All accessory lamps purchased separately are warranted for 90 days.

Who the warranty protects:

This warranty is valid only for the first consumer purchaser.

What the warranty excludes and does not cover:

1. Any product on which the serial number has been defaced, modified or removed.
2. Damage, deterioration, or malfunction resulting from:
 - » Accident, misuse, neglect, fire, water, lightning, or other acts of nature, unauthorized product modification, unauthorized attempted repair, or failure to follow instructions supplied with the product.
 - » Any damage of the product due to shipment.
 - » Causes external to the product, such as electrical power fluctuations or failure.
 - » Use of supplies or parts not meeting ViewSonic®'s specifications.
 - » Normal wear and tear.
 - » Any other cause which does not relate to a product defect.
3. Any product exhibiting a condition commonly known as "image burn-in" which results when a static image is displayed on the product for an extended period of time.
4. Removal, installation, insurance, and set-up service charges.

How to get service:

For information about receiving service under warranty, contact ViewSonic® Customer Support (Please refer to the attached “Customer Service” page). You will need to provide your product’s serial number, so please record the product information in the space provided below on your purchase for your future use. Please retain your receipt of proof of purchase to support your warranty claim.

For Your Records

Product Name: _____ Model Number: _____

Document Number: _____ Serial Number: _____

Purchase Date: _____ Extended Warranty Purchase? _____ (Y/N)

If so, what date does warranty expire? _____

1. To obtain warranty service, you will be required to provide (a) the original dated sales slip, (b) your name, (c) your address, (d) a description of the problem, and (e) the serial number of the product.
2. Take or ship the product, in the original container packaging, to an authorized ViewSonic® service center.
3. Round trip transportation costs for in-warranty products will be paid by ViewSonic®.

Limitation of implied warranties:

There are no warranties, express or implied, which extend beyond the description contained herein including the implied warranty of merchantability and fitness for a particular purpose.

Exclusion of damages:

ViewSonic®’s liability is limited to the cost of repair or replacement of the product. ViewSonic® shall not be liable for:

1. Damage to other property caused by any defects in the product, damages based upon inconvenience, loss of use of the product, loss of time, loss of profits, loss of business opportunity, loss of goodwill, interference with business relationships, or other commercial loss, even if advised of the possibility of such damages.
2. Any other damages, whether incidental, consequential or otherwise.
3. Any claim against the customer by any other party.
4. Repair or attempted repair by anyone not authorized by ViewSonic®.
