- Lightweight design makes it portable

**USB 3.1C Male to Displayport Female
Black**

USB Type C is the new connector for computer, peripherals and mobile devices. On new computer products the USB Type –C will replace connectors for DisplayPort, proprietary power, and the traditional USB. Finally delivering a cable that is truly universal.

Our USB 3.1C Male to DisplayPort female adaptor enables you to output DisplayPort video and audio from any USB Type-C device. This adaptor works with USB Type-C devices that emit a DisplayPort video signal. The adaptors lightweight design means that you can easily take it with you wherever you need.
