

V-02HD MK II Remote

Connection Guide

V-02HD MK II Remote is a dedicated iPad app used exclusively for the Roland V-02HD MK II. You can connect the V-02HD MK II to your iPad via USB and use the V-02HD MK II Remote app to remotely control the V-02HD MK II.

Connectivity

The V-02HD MK II Remote app and the V-02HD MK II disconnect when you switch to a different app or when the iPad enters sleep mode (auto-lock). The app and the unit automatically reconnect when you return to the V-02HD MK II Remote app, but it may take several seconds for the connection to be restored.

When you want to use V-02HD MK II Remote for a long time, we recommend that you turn off the auto-lock feature on the iPad.

Change this setting in Settings → Display & Brightness → Auto-Lock.

* This app is compatible with V-02HD MK II system program version 1.03 and later. Make sure that the system program of the V-02HD MK II is updated to the latest version.
