1 Remove Front and Back Screw Covers.

2 Remove Faceplate.

3 Remove Cable Lock.

4 Select your PoE device and note its location in relation to the mounting slots

5 Insert the tie through the cable slots and then clasp over the POE device.

6 Specifically for Texas PoE GAT-USB-PD use velcro pad for attachment

7 Feed the ethernet cable through the cable exit.

8 Connect the ethernet cable to the POE and secure the cable with the cable lock.

A1 Use a pencil to mark pilot hole locations.

A2 Use a drill bit suitable for your surface and make 4x pilot holes

A3 If running a ethernet or USB cable through the surface use a hole saw in the cable exit position.

A4 Secure the Link to the surface with 4x No.8 Self tapping screws. Rawl plugs are provided if required.

9 Connect the USB cable to the tablet, then place inside the enclosure. Re-attach the faceplate.

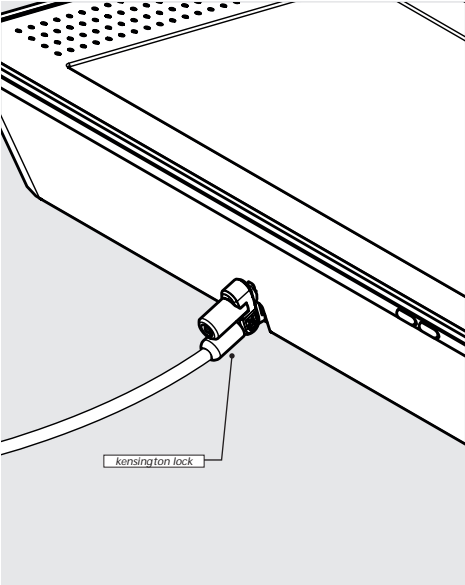

10 Use 6x M3 Screws to secure faceplate.

11 Reattach the front and back screw covers

12 Set up the video-conferencing software and peripherals as per the provider's instructions.

13 For additional security, tether your Link with a Kensington security cable. *Security cable not provided.
