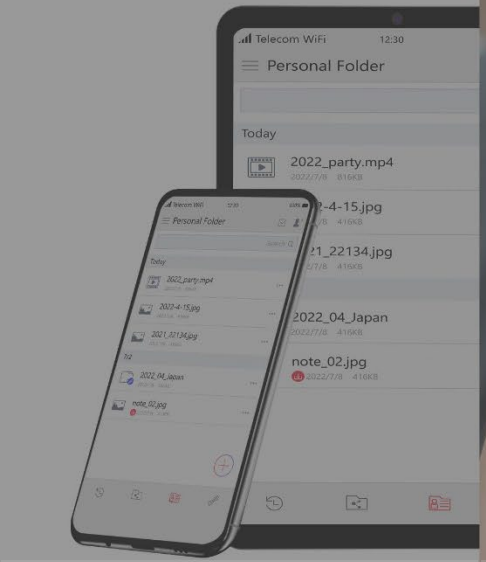
MSI Cloud Center – Key Features

MSI Cloud Center

Cross Platform

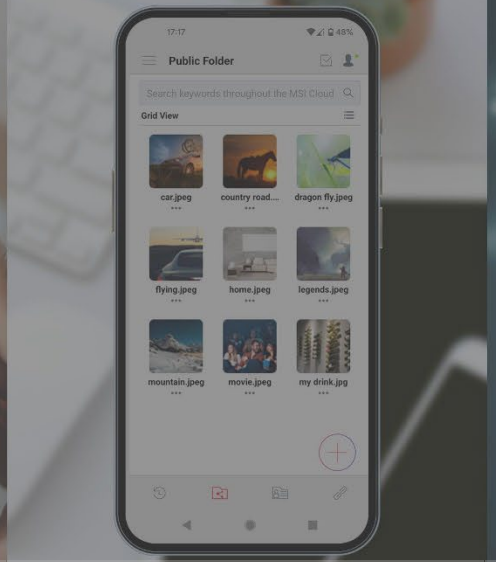


Backup, download, share files between your PC, Android, and iOS devices.

QR Code Login

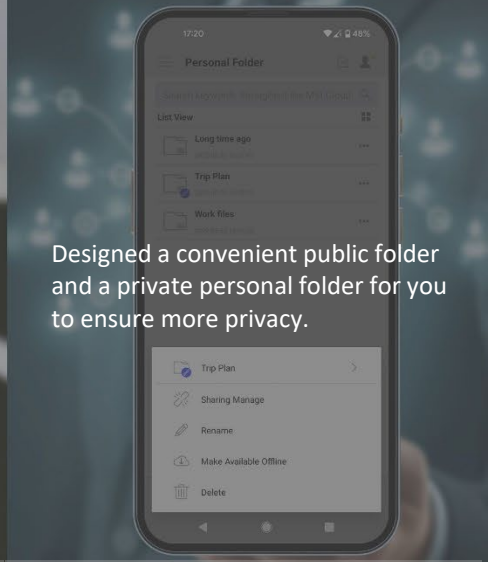
Easily & instantly log in with a QR code in seconds generated by the MSI Cloud Center.

Fast & Secure



Wirelessly and promptly upload photos, video, and any files within a private intranet environment.

Private Cloud



Designed a convenient public folder and a private personal folder for you to ensure more privacy.

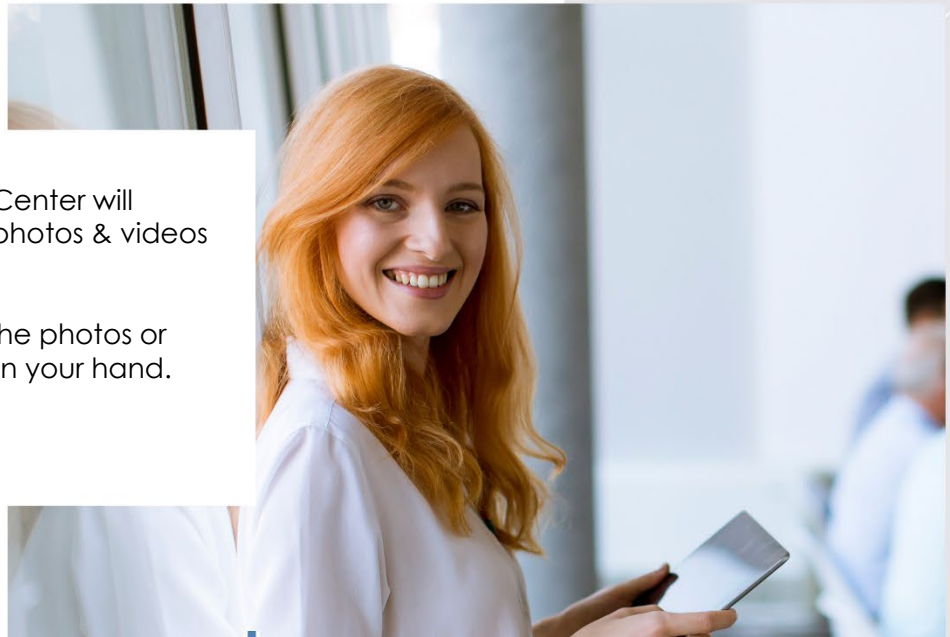
Share data with team members or make files as private as you want, the decision is in your hands.

Convenient Auto-Backup

MSI Cloud Center

Just one click and the MSI Cloud Center will automatically backup all of your photos & videos to the specific storage you want.

You can choose to upload all of the photos or videos separately, the decision is in your hand.



Multiple Files Selecting

MSI Cloud Center

You can select multiple files at once, the MSI Cloud Center supports multi-file uploading and downloading as well, this brings you the most convenient & efficient way to backup files.

Multiple Devices/ Storages Support

The MSI Cloud Center can fast pair with multiple devices, and switch between them easily.

You can switch from your PC to other MSI PCs which you have logged in with its unique QR code.

You can upload, download, delete or even share the files with your family or team members who have been authorized & logged in with a QR code generated by the MSI Cloud Center, and they will also enjoy all of the benefit of Your Private Cloud or Home Cloud.

Share To The World

Through the applications installed on the smartphone, you can share any data, photos, or videos which have been backup to the MSI Cloud Center to the world.

MSI Center

The MSI Center takes optimization to the next level with A.I.; it helps to prioritize & allocate the resource on your hand to accelerate the performance of those software which you work with everyday.

It also helps you to find the photos or materials with Tag and brings the most efficient experience for your daily works.

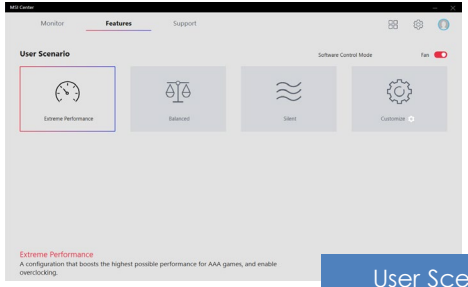
Smart Priority



User Scenario

Hardware TPM Module Support

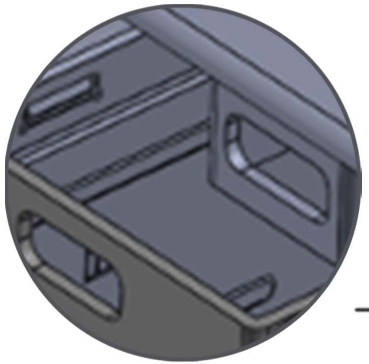
TPM Support

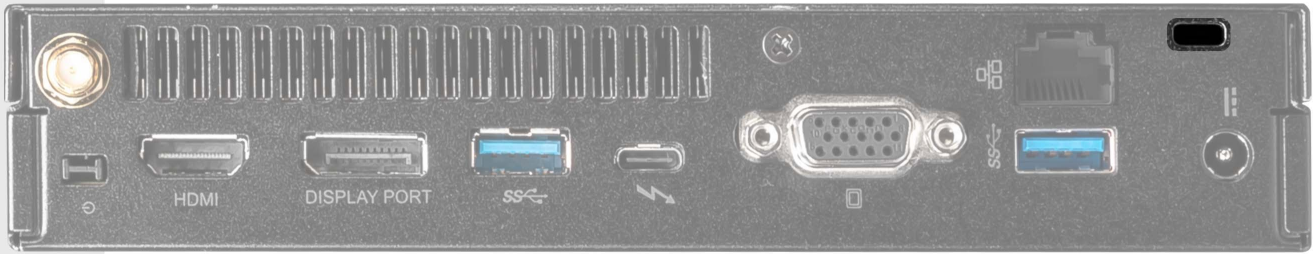
Hardware TPM (Trusted Platform Module) module is designed to provide hardware-based, security-related functions.

You can store your sensitive data & passwords by encryption keys for advanced security.

Kensington Lock with Padlock Combo Design

Protect the unit with a physical Kensington Lock with Padlock Combo Design.





VESA Mountable with External Power Switch Design

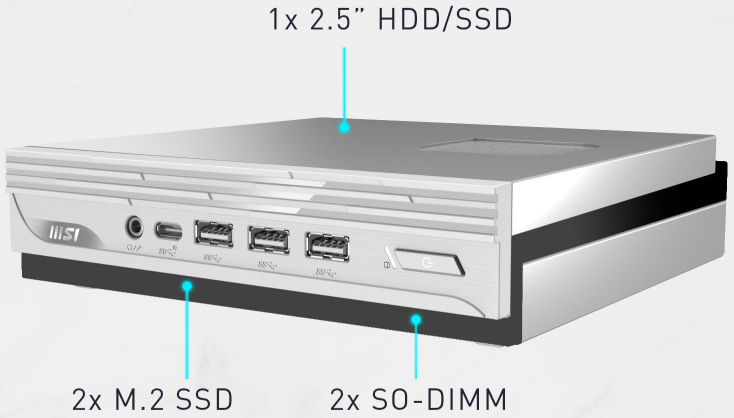
The VESA Mountable design allows you to hook up PRO DP10 anywhere you like, improving its flexibility and letting users have good space management at home or office.

The external power switch brings the most convenient way to turn it on.

Easy To Maintenance Design

Users can easily upgrade two M.2 SSD, one 2.5" HDD/SSD, and two SO-DIMMs by disassembling the side covers.

Make PRO DP10 an even more flexible desktop and reduce the time wasted on upgrading.



Switchable VGA to COM Port Design

A Switchable VGA to COM port (optional by request) will let you fully connect to your POS devices such as barcode scanners, receipt printers and many more.

The COM ports can also communicate with the programmable logic controllers (PLCs) or with other modules such as operator/HMI, motor controllers,a robot or vision systemin the intelligent factory.
