<sup>1</sup> Moving Picture Response Time (MPRT) improves the response time and reduces motion blur in the monitor. Enabling MPRT will disable AMD FreeSync™ technology, and you may notice a negligible flicker. | <sup>2</sup> Overclocking at 280Hz is based on laboratory test data, and this function may cause irregularities in the display. | <sup>3</sup> Supports 1920 x 1080 @ 280Hz as specified in HDMI 2.1. | <sup>4</sup> This software can only be used with Windows 10 & Windows 11. | <sup>5</sup> AMD FreeSync™ Premium technology only can work with AMD Radeon™ series graphics card.
