Neomounts®

Laptop holder

We are committed to making product choices that are sustainable and rely on the recyclability of our products. Investing in a circular economy where sustainability is at the heart of everything we do. A sustainable approach is essential in addressing global climate change.

Environmental footprint

Greenhouse gasses emitted into the environment during production of a product contribute directly to our planet's global warming.

Using LCA software¹ we are able to calculate² the (potential) environmental footprint, measured in kilograms CO₂-equivalent. This enables us to evaluate a product's footprint and support the design of sustainable products.

By recycling our products the impact on the environment can be reduced as the recycled material replace the need to produce virgin materials.

Neoneurts

Steel	87%
ABS	9%
Silicone	3%

Emitted carbon dioxide

To illustrate the effect of a kilogram carbon dioxide, we converted it to kilometres driven by a car.

Without recycling

4,32 kg CO₂ 13,1 km*

With recycling

2,88 kg CO₂ 8,7 km*

ADS20-425BL1								
	Steel	ABS	Silicone				Total	
Material weight (g)	955,3	102,4	35,1				1.093	
Kilograms CO ₂ -equivalent								
Without recycling	3,6	0,6	0,1				4,32	
Recycling reduction %							33%	
With recycling	2,18	0,59	0,11				2,88
