

Video Doorbell E340 With MiniBase Chime

Dual Cameras, See What Matters from Door to Floor

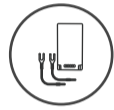

Dual Cameras

Color Night Vision

2K FHD

Battery-Powered or Hardwired

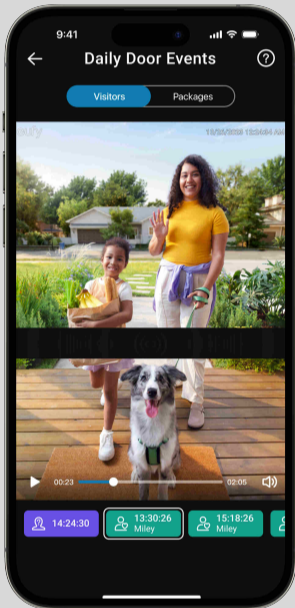

Quick-Release Battery Pack

Face Recognition

Package Detection

Dual Camera, See from Door to Floor

Eliminate blindspots at your door. See where even head-to-toe cameras can't.

2K Clarity with Color Night Vision

Clear and detailed visuals of anyone who drops by. Smart AI recognizes faces and detects packages.

Compared to the black and white infrared night vision of other doorbells, color night vision can reduce face blurriness while increasing the viewable distance during the night to up to 16 ft (5 m).

Greet Guests From Anywhere

Get instant notifications when someone is at the door. See, hear, and speak to them right from your devices.

On-Device Storage, No Monthly Fees

Save on cloud storage fees with 8 GB of secure built-in storage.

Battery or Wired, Your Choice

When hardwired, the doorbell captures the last 5 seconds as pre-roll footage. 24/7 recording is possible with HomeBase 3 (sold separately).

Wireless Chime with microSD Expandability

Hear the loud chime throughout your home, and add a microSD up to 128 GB (not included) for storing footage.
