

XMG1930 Series

24-port 2.5G Multi-Gig Lite-L3 Smart Managed Switch with 6 10G Uplinks

The XMG1930 series is a family of Multi-Gigabit Lite-L3 Smart Managed switches including 2 models, with and without PoE options. On top of its high-density twenty-four 2.5G ports that serve as a top performance access switch to upgrade from standard gigabit network, the switches also offer four 10G Multi-Gigabit ports to expand network connection to WiFi 6/6E AP or 10G servers along with two additional 10G fiber ports for extensibility and resilience. The PoE model XMG1930-30HP supports both PoE+ and PoE++ with a large power budget of 700 W offering great flexibility to deploy WiFi 6/6E and WiFi 7 wireless access points; while the non-PoE model XMG1930-30 is ideal for high-speed Internet Service Providers to upgrade from traditional 1G/2.5G to every user.

Benefits

Upgrade network with flexible connection choices

The XMG1930 Series Switch supports IEEE 802.3bz standard and includes both 2.5G and 10G port options to provide Multi-Gigabit technology on existing wiring infrastructure designed for standard gigabit, protecting your investments while offering up to 10 times more bandwidth capacity without the expensive and disruptive cable upgrades. Each copper port of the new Multi-Gigabit switch is able to automatically detect which speed is needed with the connected device. It's common for Multi-Gigabit switches to operate at different link speed for each individual ports, so the XMG1930 Series is designed with a unique 5-color LED, providing an intuitive indication of connection speed for each individual ports.

Multi-Gigabit supports with 2.5G and 10G combinations offering flexibility for high density Multi-Gig deployments

Up to SIX 10G uplinks including both copper and fiber options providing extensibility and resilience for networks

PoE model supports both 802.3bt PoE++ (60 W) and 802.3at PoE+ with a high-power budget of up to 700 W to easily connect WiFi 6/6E APs or IoT devices in your network

Nebula ecosystem offers a unified cloud network experience, from wired, wireless and security gateway

Access and manage the full feature sets included from the first day of purchase through the local web GUI

Superior PoE paves the way for high performance WiFi 6 APs

Upgrading business wireless infrastructure to WiFi 6/6E requires a reliable network Switch to provide solid backbone services. The XMG1930-30HP comes with 8 ports of IEEE 802.3bt (PoE++) offering up to 60W per port, as well as 20 ports of IEEE 802.3at delivering up to 30 W per port

to meet a variety of WiFi 6/6E AP adoptions. It is also ready for future WiFi 7 technology deployments. Maximize the performance of the 700 W system power budget with a wide range of choices from Zyxel WiFi 6/6E AP family.
