

SpacePole Stack™

Payment Solutions

A simple low-cost mounting solution for payment terminals from all manufacturers

It protects your investment in payment terminal hardware by preventing accidental drops and cable damage, reducing hardware failures that lead to downtime and service costs. Stack is compatible with ClickSafe® security tethers, meeting PCI Best Practice by providing protection from theft and tampering. Using SpacePole Stack to present and protect your payment terminal hardware ultimately delivers a superior customer experience at the point of payment.

Features

- **Compatibility:** One mount compatible with all SpacePole MultiGrip plates and available with the unique MultiClip® adaptors for the Ingenico Lane series of payment terminals
- **Tough:** Material ABS/ glass fibre reinforced composite plastic
- **Choice:** Mount with either self-tapping screws, or 3M VHB self-adhesive pads
- **Lightweight:** Reduces the chances of damage to the counter top

Benefits

- **Return on investment:** Changing payment device? Simply swap the MultiGrip plate. There is no change required for upgrade of MultiClip fitted devices
- **Low cost:** A mounting solution with a high specification and a 2-year warranty
- **Choice:** Optimised for any countertop height, with two height options out of the box
- **Neat:** Cable management means the installation looks smart and tidy
- **Safe:** Compatible with Kensington ClickSafe security tethers for added security and adherence to PCI Best Practice compliance
