[†]Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput and wireless coverage, and quantity of connected devices are not guaranteed and will vary as a result of network conditions, client limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and client location.

[‡]Clients need to support 802.11k/v/r and may require additional setup. Performance may vary depending on the client device.

[§]HomeShield includes the Free Basic Plan. Fees apply for the Pro Plan.

Visit <https://www.tp-link.com/homeshield> for more information.

[¶]Use of Wi-Fi 6 and other features including OFDMA, MU-MIMO, 1024-QAM, and BSS Color require clients to also support the corresponding features. The 160 MHz bandwidth may be unavailable in the 5 GHz band in some regions/countries due to regulatory restrictions.

[‡]Use of WPA3 encryption requires clients to also support the corresponding feature.

^{***}Maximum 4G download speeds depend on external factors such as the local 4G network coverage, data plan, real-time network capacity, client limitations, and environmental factors.

^{***}All WAN/LAN ports will operate as either WAN or LAN ports. Only one port can serve as a WAN port at a time.
