20W Rapid Power USB-C Mini Charger

Big Power, Tiny Size

For the first time you can have a charger that will power medium size devices that's hardly bigger than the plug that goes into the wall. Using the latest charging technology, we've been able to make our chargers 50% smaller than other power adapters and eliminated the need for a bulky cable to connect the charger to the power outlet. The result is a take-anywhere charger that can be thrown in a laptop bag for on the road use without taking up valuable space and weighing you down.

50% Smaller.

The 20W Rapid Power Charger's technology helps minimise the charger's size and maximise its performance. The highly adaptable charger is an especially convenient resident plugged into power outlets in cramped spaces. It also occupies next to no space in your laptop bag and backpack pockets. That means you have more room for phones, cards, keys and other essentials.

A 20W Power Boost.

The charger can deliver up to 20W to most USB-C devices, including phones, tablets.

Fast and Safe

This charger is certified to meet and exceed all regulatory standards and features multiple safety functions such as over current protection, over voltage protection, short circuit protection & over temperature protection.

User Interface

Input	AC 100-240V ~50/60Hz, 0.5A
Output	1x USB-C (female) charging port, 3-12V DC charging output at up to 20W

Physical Characteristics

Product Dimensions	30(L) x 30(W) x 30(W) mm excluding plug
Weight	40g
