

BE A PROFESSIONAL CONTENT CREATOR

Godwit 310 is a plug and play USB microphone that records high quality sound for podcasting, gaming, and more. The built-in cardioid condenser records sound sources that are directly in front of the microphone, delivering accurate, full-bodies sound. It's perfect for podcasts, game streaming, vocal performances, and instruments. Better yet, Godwit 310 comes equipped with a 3.5 mm headphone jack that allows you to either listen to what **you're** recording in real-time or **what's** playing on your computer, all at the toggle of a switch.

Specifications

- Type: Uni-directional condenser microphone
