

# 2big RAID

PROFESSIONAL DESKTOP RAID  
STORAGE

Data Sheet

## Key Features

- Up to 28 TB of desktop RAID storage
- Transfer speeds of up to 440 MB/s
- 7,200 RPM/64 MB cache (or greater) IronWolf® Pro enterprise-class hard drives
- Innovative design with 2-bay RAID for reliability
- LaCie® Toolkit offers step-by-step RAID configuration
- LaCie RAID Manager monitors drive
- Backed by 5-year Rescue Data Recovery Services

design by neil poulton

## Product Overview

Ideal for creative professionals who need reliable photo backup and seamless video editing, 2big RAID delivers up to 28 TB of trusted desktop storage. Easy-to-configure hardware RAID 0/1 enables versatile speed, capacity, and data redundancy, while LaCie RAID Manager sends alerts about drive and system health. IronWolf Pro drives support fast, smooth workflows with 7,200 RPM performance and long-term reliability. Hot swappable drives are easy to replace when needed, even while 2big RAID is running. And if a natural disaster or accident strikes, rest easy with 5-year Rescue Data Recovery Services.

## Professional RAID Made Easy

- **Fast Performance:** Speeds of up to 440 MB/s enable fast large-file transfers and seamless 4K video editing.
- **Loads of Capacity:** Offering up to 28 TB of storage for large-scale projects and long-term archiving.
- **Hot-Swappable Drives:** Easily remove and replace drives while 2big is still operating.
- **Simple RAID Configuration:** New to RAID? LaCie Toolkit offers step-by-step assistance with setup. For the best speeds and capacity, choose RAID 0. For data redundancy, choose RAID 1.
- **Universal Compatibility:** With a USB-C port for the latest computers and a USB 3.0 adapter, connecting to a variety of devices is easy.

# 2big RAID

Actual data rates may vary depending on operating environment and other factors, such as chosen interface, RAID mode, RAID configuration, and disk capacity. When referring to drive capacity, one gigabyte, or GB, equals one billion bytes and one terabyte, or TB, equals one thousand billion bytes. Your computer's operating system may use a different standard of measurement and report a lower capacity. In addition, some of the listed capacity is used for formatting and other functions and will not be available for data storage.
