Linksys™

Introducing our new WiFi 6 cloud access point.

Enterprise performance tailor made for businesses of all sizes.

The Linksys AX3600 MU-MIMO Cloud Indoor Wireless Access Point is an 802.11AX Dual-Band AP (2.4GHz + 5GHz) designed with 4x4 internal antennas for 3600Mbps* total WiFi speed. Perfect for high client density applications, every cloud wireless access point comes with free cloud management.

This means 24/7 access to an Enterprise-class Cloud-Native management solution without the recurring fees. With **Linksys Cloud 2.0**, instant scalability with no limit to the number of networks and devices you can manage.

Benefits

Faster Zero Touch Provisioning

Zero Touch Provisioning reduces the need for on-site installation/configuration, saving time and travel costs. Our micro-servers are deployed on AWS and running 24/7 and have virtually zero downtime, even when new cloud features are released. New features become available without the need for inconvenient maintenance windows because businesses shouldn't be interrupted for any reason.

No Extra Fees

Cloud Management is included with hardware purchase for the lifetime of the device. No need to worry about additional fees to manage our access points.

Deploy Anywhere with PoE+ Support

802.3AX PoE+ compliant for convenient power + data deployment.

Free Dedicated Technical Support

Our support staff is ready to help. Our technicians are CCNA certified and have the networking expertise to help with any configuration questions.

Beautiful Splash Pages

Our Splash Page editor is very easy to use and allows for custom splash pages. No restrictive, basic splash page templates here! Our page is hosted in the cloud at no additional cost. Create an account for free and try it out in our cloud portal at https://cloudmanager.linksys.com.
