

Statement of Volatility – Dell E2423H

⚠ CAUTION: A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

The Dell E2423H contains both volatile and non-volatile components. Volatile components lose their data immediately after power is removed from the component. Non-volatile components continue to retain their data even after power is removed from the component. The following Non-volatile components are present on the Dell E2423H system board.

Table 1. List of Non-Volatile Components on System Board

| Description | Reference Designator | Volatility Description | User Accessible for external data | Remedial Action (Action necessary to prevent loss of data) |
|------------------|---------------------------------|---|-----------------------------------|--|
| System EEPROM | Storage of system setting (OSD) | Non-Volatile memory, 16Kbit. For storage system setting. | YES | NA |
| VGA EDID EEPROM | Storage of VGA EDID | Non-Volatile memory, 2kbit. VGA EDID data. | No | NA |
| System Flash ROM | Store of system firmware | Non-Volatile memory, 4Mbit. For storage system firmware. | No | NA |
