Assembly Instructions

VESA

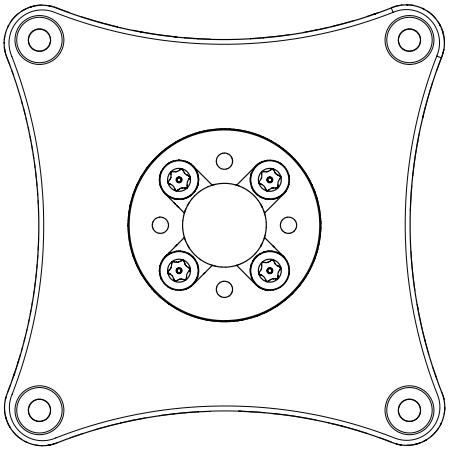
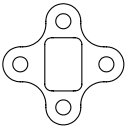
What's in the Box



VESA Mount



Case Washer x1

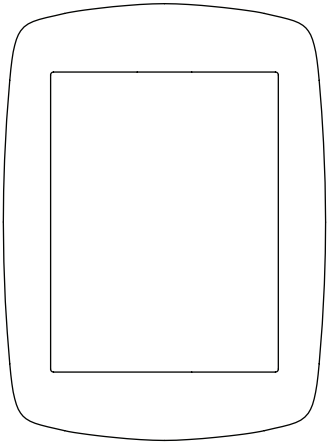
T20 Driver Bit x1

M4 Split Washer x4

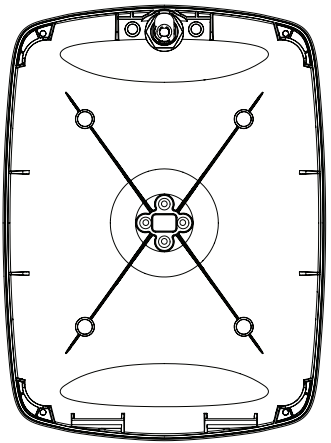
M4 20mm Buttonhead Screw x4

no.8 x 38mm Countersunk Screw x4

What's in the Box



Faceplate x1



Case x1

Tablet Setup Kit

Keys x2

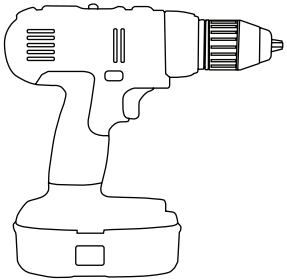
Tablet Support x4

Corner Pieces x4

Cable Clip x1

Sticker x1

Tools for the Job



Hand Drill

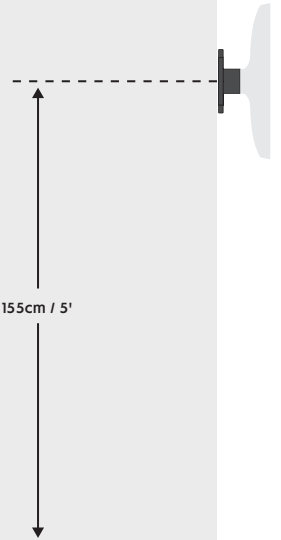
Pencil

16mm or 41/64" Drill Bit

Socket Screwdriver

2mm or 5/64" Drill Bit

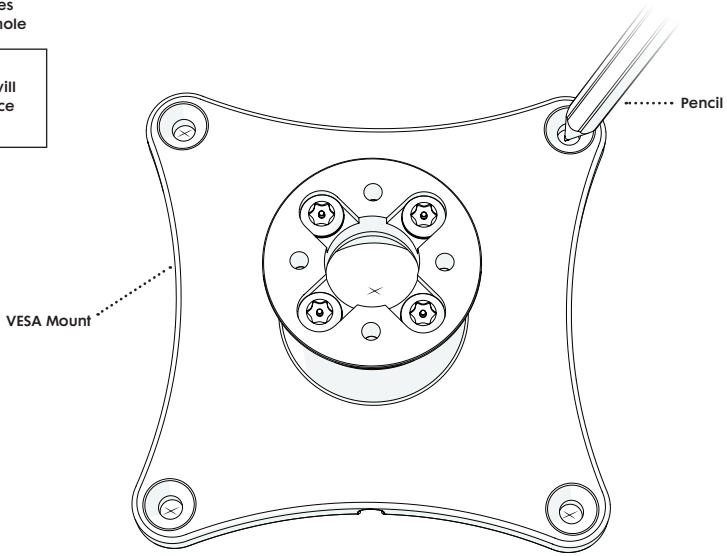
Recommended Installation Height



Mark the Drill Holes

Mark all four outer holes
and the large central hole

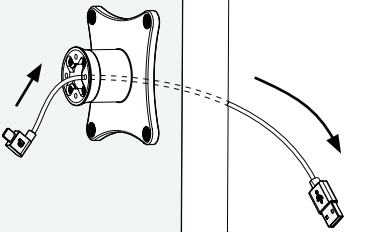
IMPORTANT:
Make sure the Lock will still be accessible once the case is installed



Choose Cable Routing Method

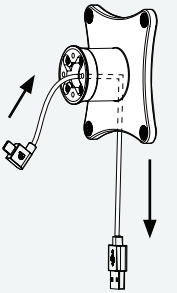
Through Surface

-Hidden Cabling
-Requires access to back of the Wall



On Surface

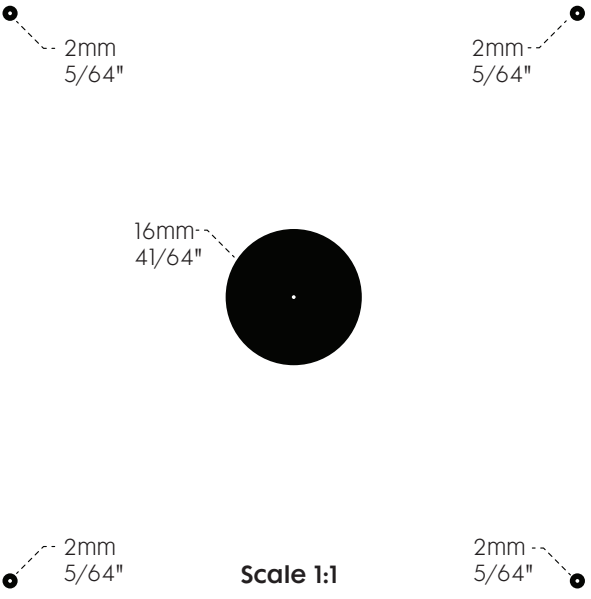
-Visible Cabling
-Perfect for Solid Walls



Drill the Holes

IMPORTANT:
2mm / 5/64" holes are designed for supplied woodscrews. If using your own screws eg when attaching to brick a different hole size may be needed

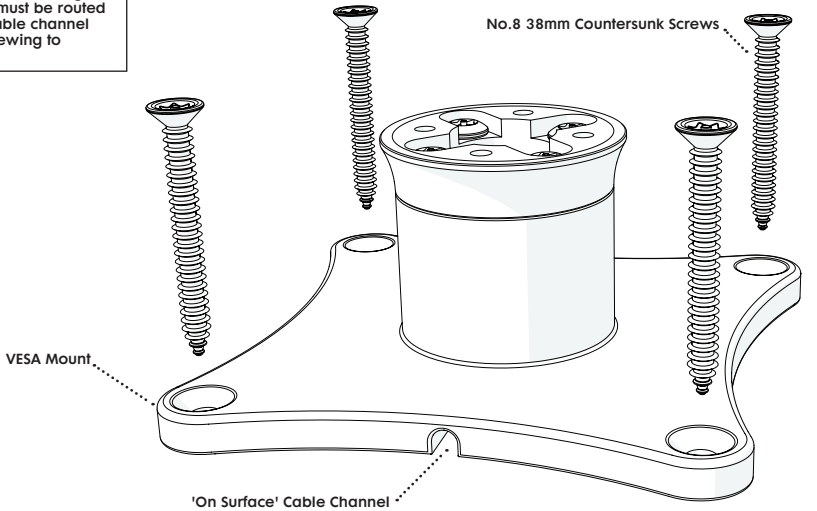
NOTE:
The 16mm / 41/64" hole is only required for 'On Surface' Mounting



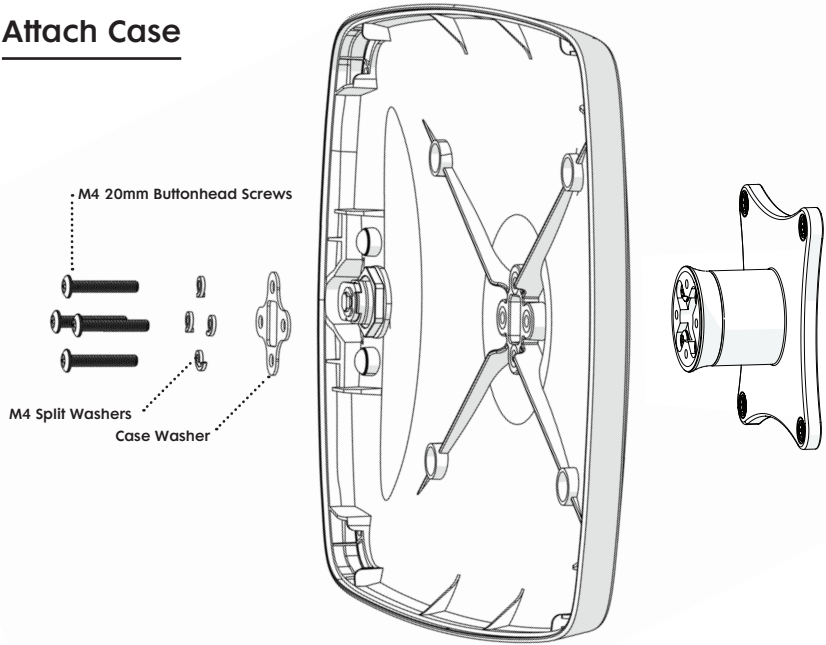
Scale 1:1

Attach to Surface

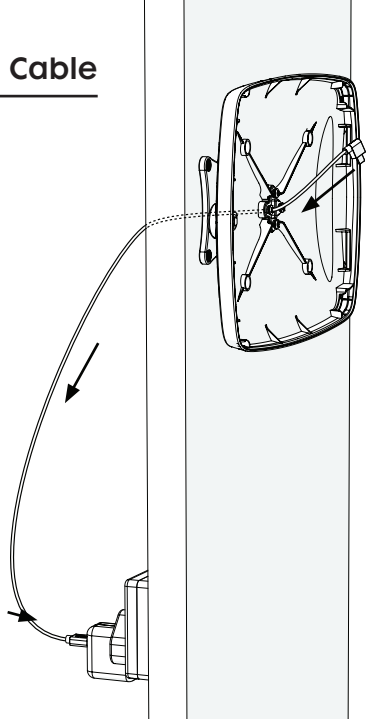
IMPORTANT:
If you have chosen 'On Surface' cable routing, the cable must be routed through cable channel before screwing to surface

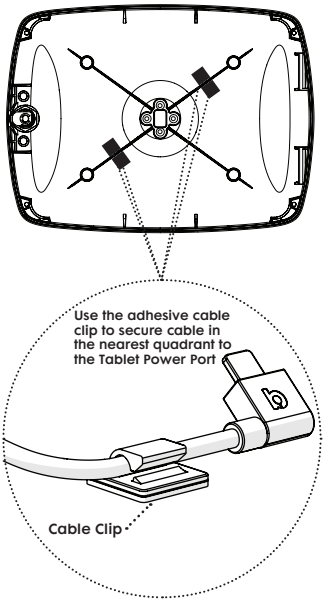


Attach Case



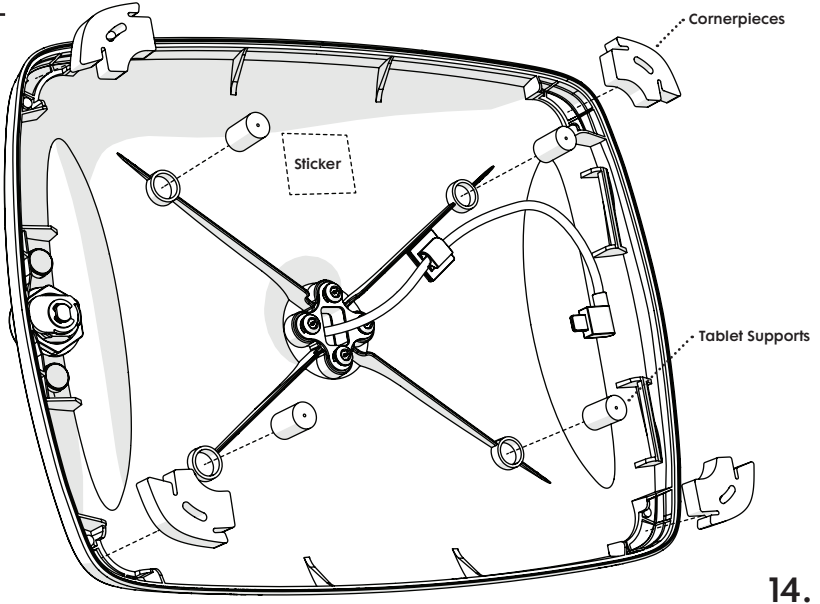
Route Cable



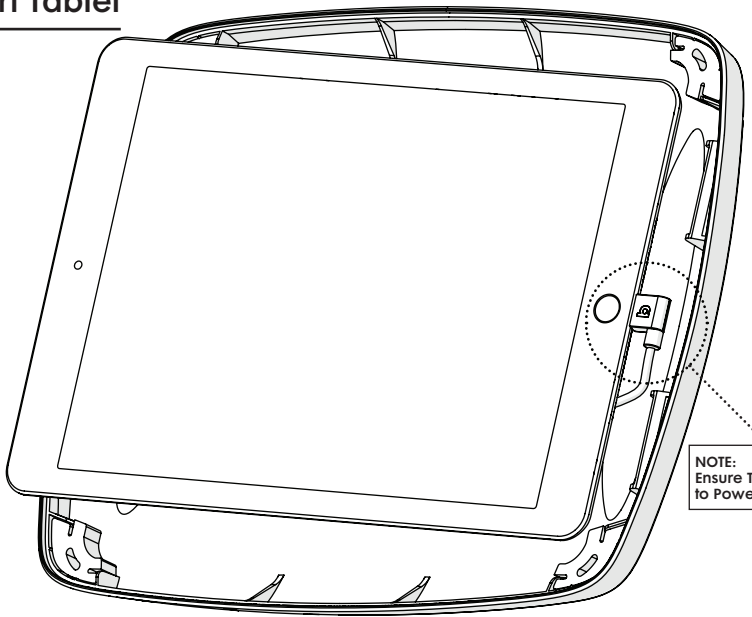


Use the adhesive cable clip to secure cable in the nearest quadrant to the Tablet Power Port
Cable Clip

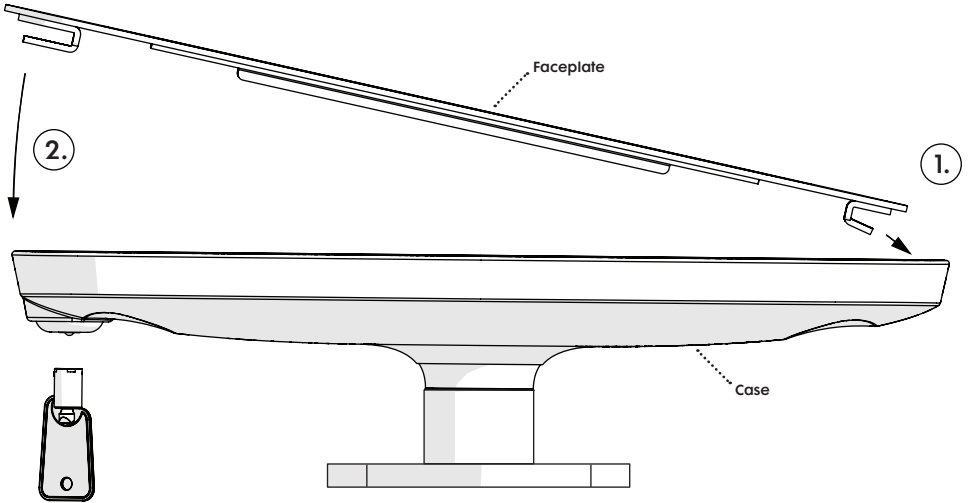
Case Setup



Insert Tablet

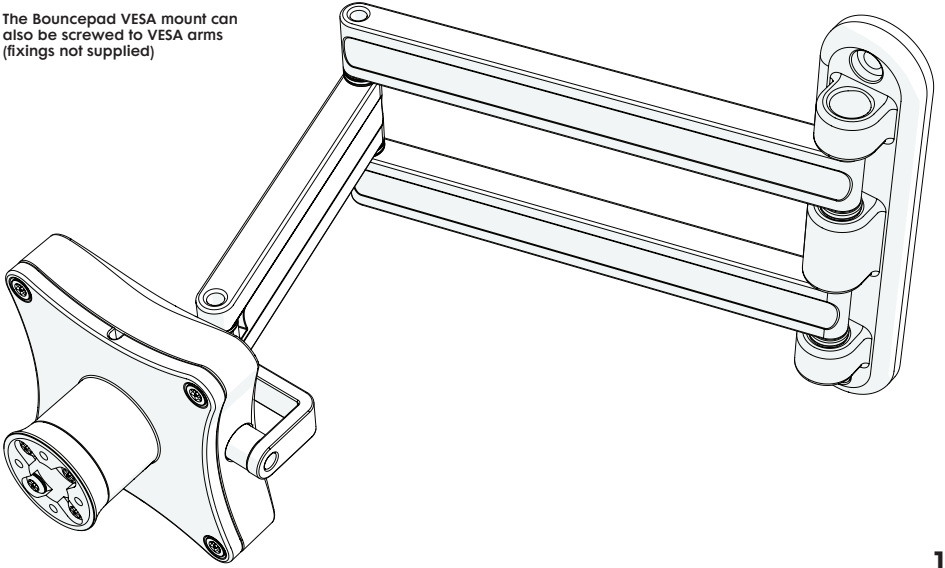


Lock Up



VESA Compatibility

The Bouncepad VESA mount can also be screwed to VESA arms (fixings not supplied)



Your Bouncepad is now installed

2mm or 5/64" Drill Bit

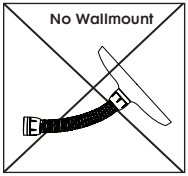
Pencil

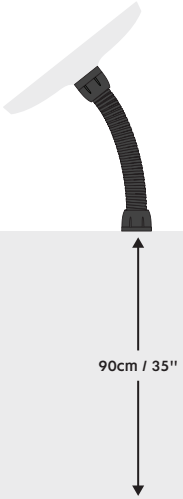
16mm or 41/64" Drill Bit

Socket Screwdriver

7mm Spanner or 9/32" Wrench

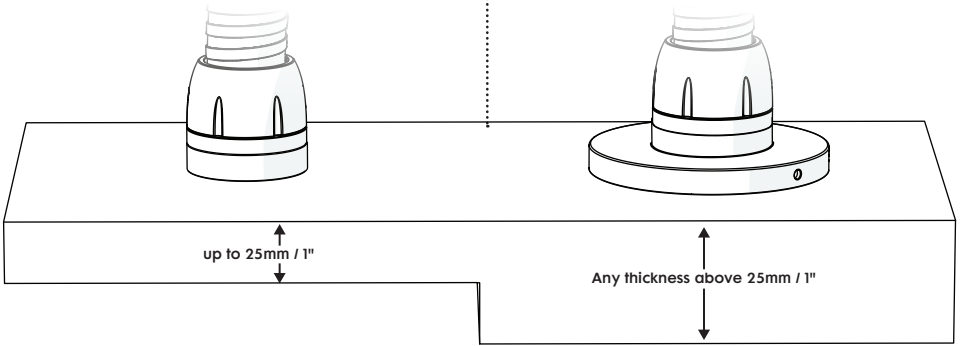
Recommended Installation Height





Choose Mounting Options

Through Mount



-Seemless appearance

-Requires access beneath mounting surface

Continue to p.25

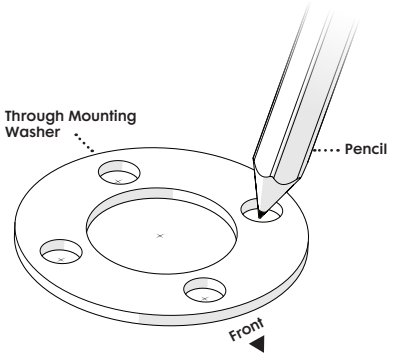
Surface Mount

-Option to route cable along surface when there is no access beneath mounting surface

Continue to p.28

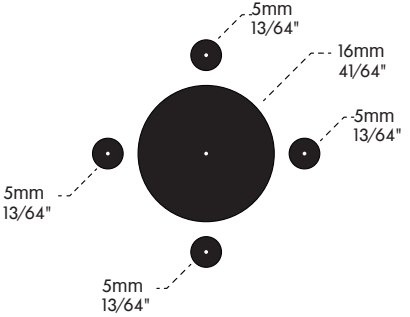
Through Mount

Step 1 of 4
Mark the Drill Holes



Step 2 of 4
Drill the Holes

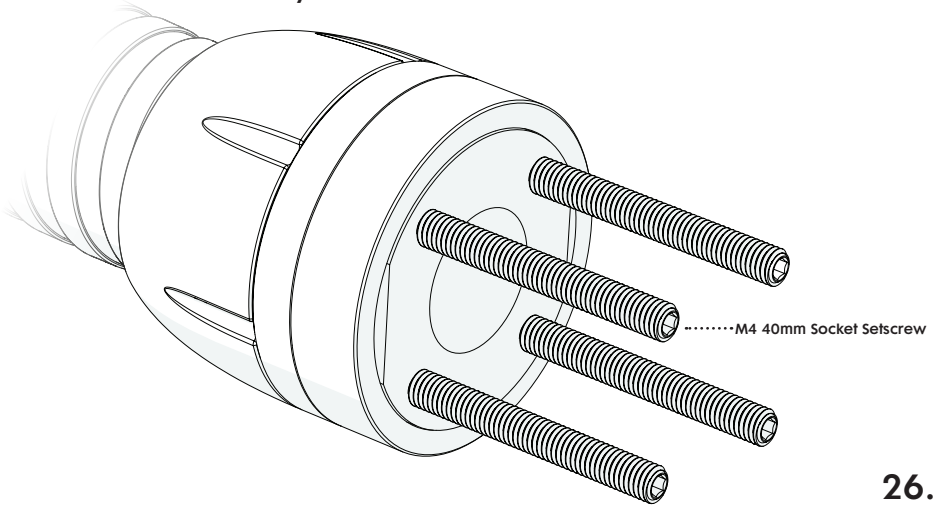
This diagram can be used as a drill template



Scale 1:1

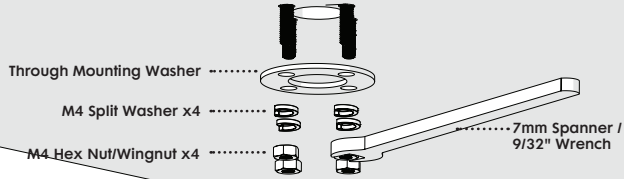
Through Mount

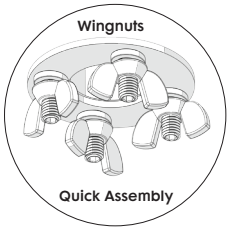
Step 3 of 4
Screw in socket setscrews by hand

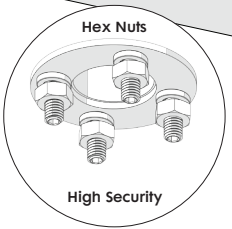


Through Mount

Step 4 of 4
Fasten from beneath surface



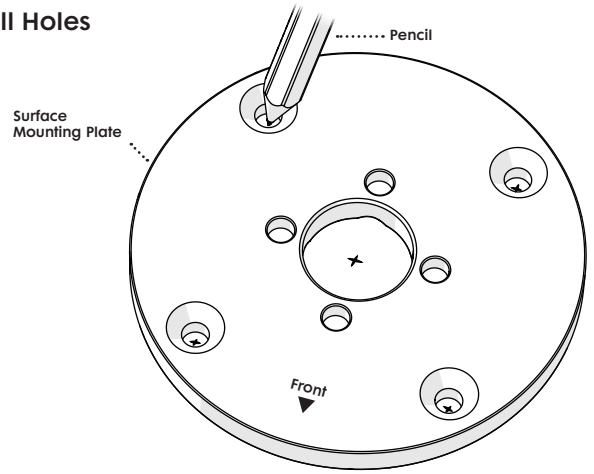




Now Skip to p.31

Surface Mount

Step 1 of 4
Mark the Drill Holes



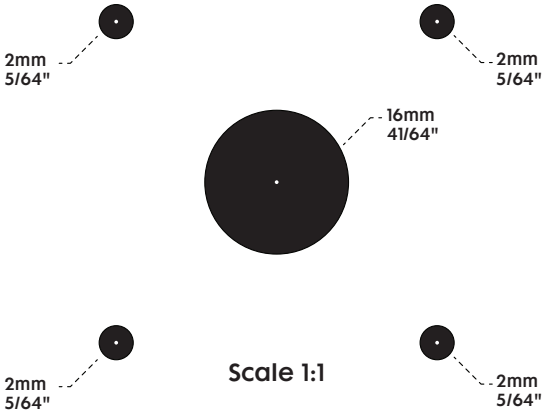
Surface Mount

Step 2 of 4
Drill the Holes

This diagram can be used as a drill template

IMPORTANT:
2mm / 5/64" holes are designed for supplied woodscrews. If using your own screws eg when attaching to brick a different hole size may be needed

NOTE:
The 16mm / 41/64" hole is not required if attaching to surface with no access beneath as the power cable can be routed along the surface

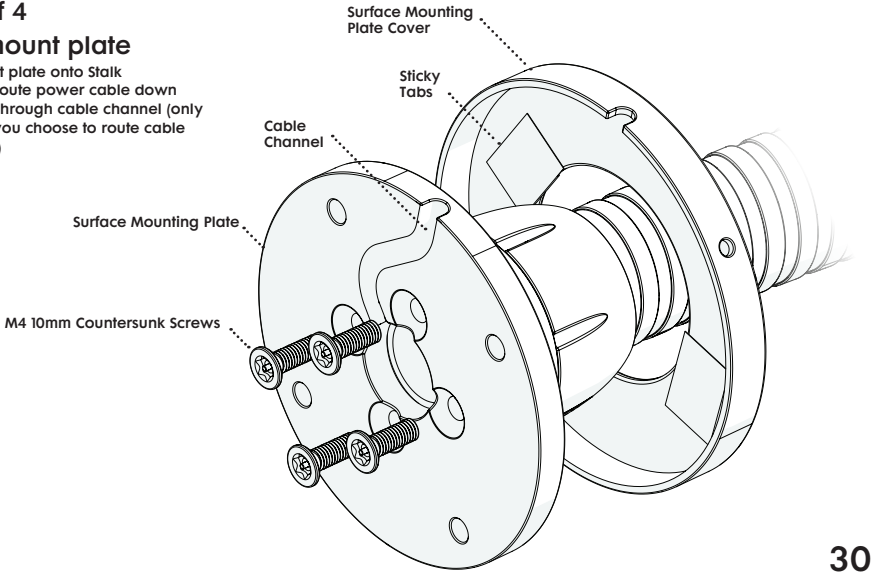


Surface Mount

Step 3 of 4

Attach mount plate

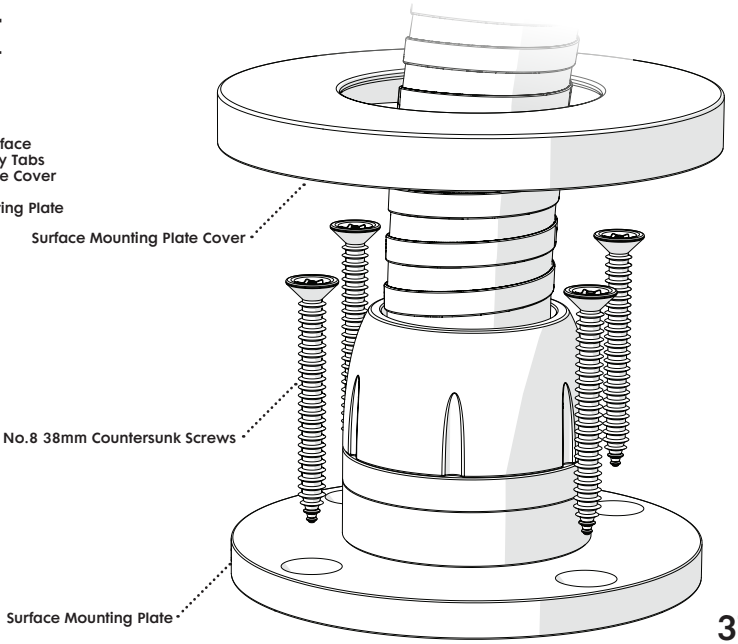
1. Screw Mount plate onto Stalk
2. OPTIONAL Route power cable down the Stalk and through cable channel (only applicable if you choose to route cable along surface)



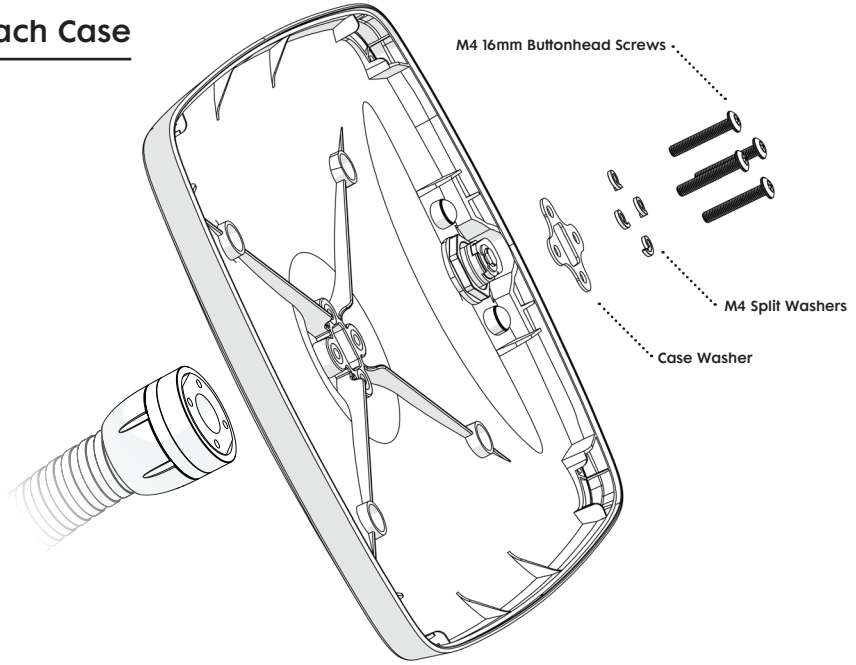
Surface Mount

Step 4 of 4
Attach to Surface

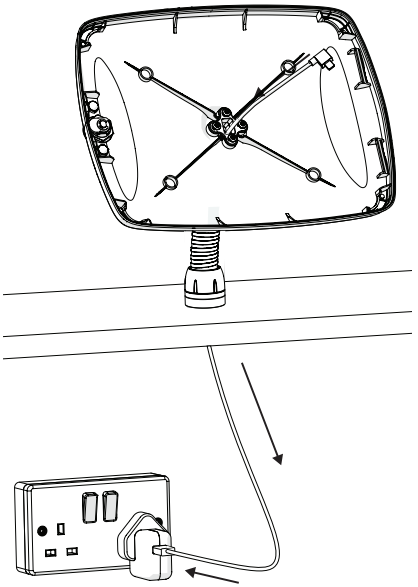
1. Screw Mounting Plate to surface
2. Remove backing from sticky Tabs
3. Slide Surface Mounting Plate Cover onto Stalk
4. Push down firmly on Mounting Plate Cover

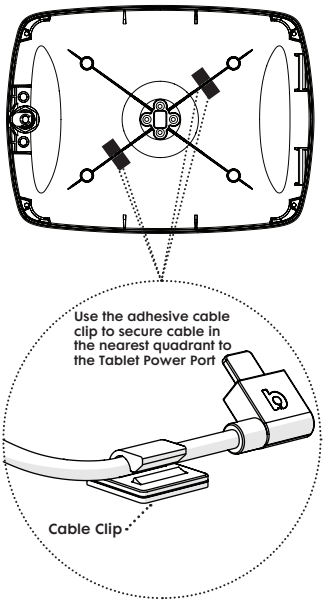


Attach Case



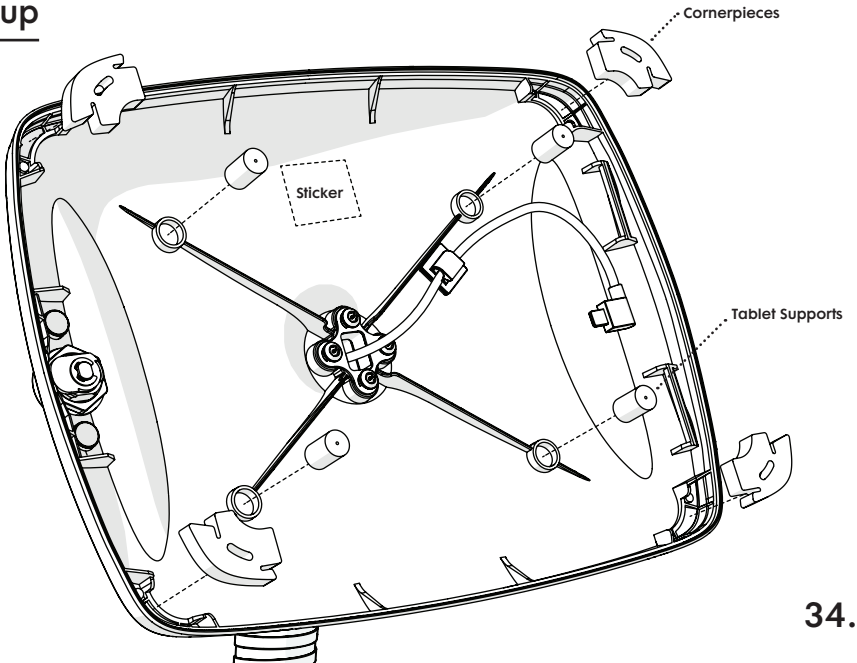
Route Cable



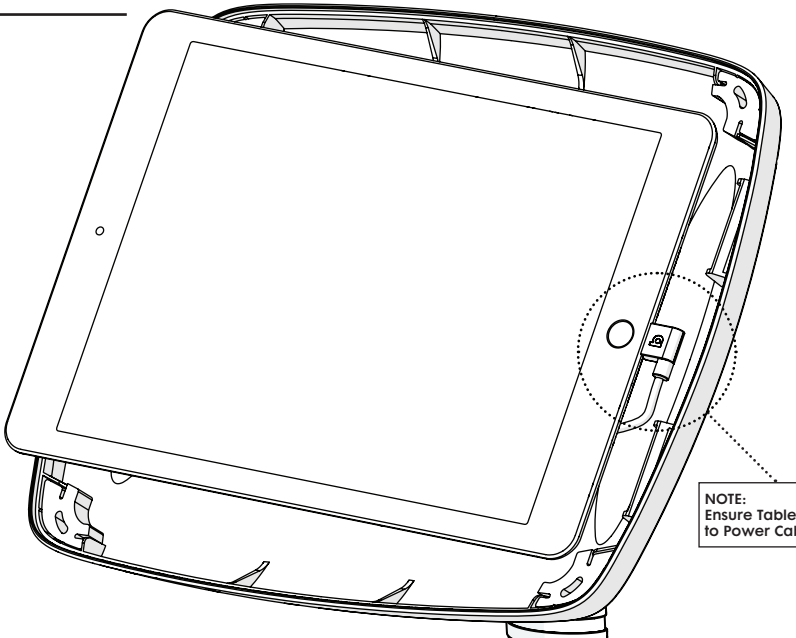


Use the adhesive cable clip to secure cable in the nearest quadrant to the Tablet Power Port
Cable Clip

Case Setup



Insert Tablet



NOTE:
Ensure Tablet is connected to Power Cable

Lock Up
