# Let's huddle!

## For the 'do it now' meeting.

When inspiration comes, nurture it instantly, share your idea and see it grow. No delay or interruption, no need to book a room; huddle spaces support immediate unimpeded exchanges for small groups of up to five people. An intimate and quiet space welcoming local and remote participants via video-conferencing.

Step away from your working desk and engage, quickly, comfortably and productively with team colleagues. No scheduling required, take a seat and share your ideas.

**For instant collaboration Start here >**

### > Benefits

- One to one sessions for up to 5 people
- Ad hoc, no room booking required
- Share, create and co-create content
- Easy start video conferencing
- Fixed or mobile solutions

## Presentation Displays

Start-up instantly, accessing information displayed in ultra-high definition on your large format screen. Sizes up to 55" are ideal for smaller gatherings, viewed at close proximity for detailed analysis of data. Mosaic Connect enables participants to connect and present simultaneously from any device, even remote users, who, in natural colour reproduction appear as if sitting alongside you.

## Interactive Displays

Where there's a screen we're compelled to touch it; large format or small, we expect the same instant, intuitive gesture swipe. NEC ShadowSense™ touch technology supports seamless annotation with a paper-like writing experience and superb precision accuracy. Finger or pen, whatever your preference, auto palm erasing and no ghost touches allows freedom of touch and swipe.

## Collaboration Solutions

Good teamwork knows no boundaries and good collaboration tools allow access to talent and expertise wherever it is located. Gather your team from across the globe via the NEC UHD screen and Soundbar with built-in wide-angle camera and high quality audio to virtually seat them amongst your huddle. Instant wireless presentation allows any participant to take the lead at any time.

# Start thinking!

## Creativity unlimited.

Capturing the concept, practice or solution that propels your organisation to greater success comes from an effective meeting of minds, an immersive workspace and a clear vision of the elements that will drive that big idea.

This is where creativity and ideas get the space to grow. Rearrange the furniture on the fly to generate the right atmosphere for inspiration. Stand, sit on a bar stool, lie on a sofa; gather around a touch table or in front of a digital canvas. In short, remove all barriers that impede creativity.

For creative think-tanks [Start here](#)>

### > Benefits

- Break the constraints of tradition, think creatively, unconventionally
- Encouraging creativity and co-ordinated thinking
- Inspirational environments
- Share, create and co-create content

## Creative Wall

Any surface provides the opportunity to create; embrace your inner child, for once you are allowed to write on the walls! NEC high resolution ultra-short throw interactive projection provides a creative wall to inspire idea generation. A huge interactive whiteboard, yet when it's powered off there's no 'black screen', just the seamless integration of creative potential.

## Touch Table

Gathering around a table is a natural way to interact with others. A touch table enables instant access and manipulation of data whilst encouraging social interactions and eye contact across the surface. NEC's touch table with 3M™ PCAP touch technology has a bezel-free design with intuitive finger swipe control for a meeting less-ordinary.

## Big Canvas

Where a surface has no limits, NEC's InfinityBoard delivers infinite space to promote creative teamwork and idea generation, even involving teams in different locations. An 86" UHD screen in a side-by-side arrangement achieves a physical 3.8m wide digital canvas of pixel-free visualization, yet with infinitely more virtual surface. With built-in remote collaboration tools, thinking goes global.

# Get Engaged!

## Beyond the traditional meeting room.

When you need your audience to 'buy in' to your concept, when full participation is required, it is essential to make an impact right from the start. Larger, highly visible images with enhanced colour and crisp detail ensure your message gets across even to larger groups. Well-motivated participants, local or remote, are poised to take the lead or step in with ideas when invited.

With modular options, NEC offers the flexibility to match the ideal-fit collaborative meeting room solution to your groups' and venues' needs, perfectly primed to support fruitful and engaging discussions.

**For presentation and collaboration [Start here >](#)**

### > Benefits

- Interact and collaborate naturally
- For small to medium sized groups
- Easy set-up and start solutions
- Create and share content

## Projection

When reproducing large scalable images, laser projection offers a high bright solution for high impact presentation in meeting rooms of up to 15 participants. Discreetly ceiling mounted and maximizing wall surface space, NEC's long-life laser projection solutions feature embedded MultiPresenter functionality for seamless wireless presentation.

## Large Format

With sizes up to a whopping 98" in ultra-high definition, even in larger meeting rooms, readability is good from the far side of the room with appropriate resolution to support detailed data presentation. Get straight to the point with instant meeting start-up and Mosaic Connect for wireless presentation to ensure an effortlessly impressive presentation delivery.

## NEC InfinityBoard

With up to 15 participants in the room and more joining from across the globe, a wide-angle video-conferencing camera ensures no one is snoozing at the back. Keep your audience's full attention with ultra-high resolution and precise colour reproduction, ensuring superb quality visualisation and good readability for all, regardless of their location.

# Decision time.

## Uncompromising quality in the Board Room.

For decision making at the highest level, where critical exchanges may determine the direction or financial security of an organisation; creating an environment for seamless and instant exchange with precise, highly detailed visual information you can trust, gives the confidence to make decisions that stand.

Uncompromising quality and flexibility to facilitate spontaneous brainstorming, sharing ideas across multiple locations and eye to eye contact with remote participants as if they were in the same room are vital elements.

For critical decision making [Start here >](#)

### > Benefits

- Ideal for critical meetings, whether technical, financial or planning, involving the entire board
- Representative environment
- Easy set-up video conferencing
- Create, co-create and share content

## Laser Projection

Laser light source projection delivers high-bright, high-resolution content for excellent readability of even the most detailed information. A large scalable screen size projected from its discreet ceiling mounted position maintains a compelling TCO over its long life. The built-in MultiPresenter and instant start-up functionality means you're ready to get down to business.

## Large Presentation Displays

With sizes up to 98", NEC's renowned quality perfectly fits the needs of the boardroom with full compatibility with Crestron Corporate Solutions and Cisco Webex. Ultra-high resolution image reproduction enables detailed analysis of data with instant start-up and wireless presentation functionality. Seamless integration with optional coloured bezels complements any high quality interior design.

## Direct View LED Wall

Impress your boardroom guests as an early adopter of the next big technology. Fine pitch indoor 16:9 dvLED modules scale up to fit the space available for a super-large format bezel-free digital canvas in FHD or UHD resolution. Even in the brightest direct sunlight, content is crisp, detailed and easily readable from either end of the boardroom table. An incredible 80,000 hours life span makes this an investment well worth considering.

## Solutions for every collaboration or meeting

NEC delivers total meeting room solutions which simply work. Our customer-centred consultative approach ensures your collaboration or meeting space objectives are addressed with perfectly tailored technology solutions. What's more, you can be assured of future-proof, fit for purpose operation with NEC's robust and reliable implementation of technology and support.

### 1. Projection Solution

Scalable screen size and long life; discreet creativity in bezel-less large format visualisation.

### 2. Huddle Solution

Up close and personal; detailed analysis of data demands ultra-high resolutions.

### 3. LCD Conferencing Solution

Large format presentation; eyeball to eyeball in the same room or across the globe.

### 4. Collaboration Soundbar

All in one camera, microphone and speaker system; from meeting room to collaboration space.

### 5. Wireless Presentation

Connect and present; seamless and slick switching between presenters.

### 6. Microphone / Speaker

Clarity of sound; modular options ensure superb audio performance.

### 7. Touch Table

Limitless imagination; gather round and share across the table for a fresh orientation in creativity.

### 8. InfinityBoard

Empowering infinite ideation; an all in one facilitator of collaboration without boundaries.

### 9. LED Videowall

High status impact; content delivered with distinction where decision making is business critical.

### 10. Mosaic Connect Box

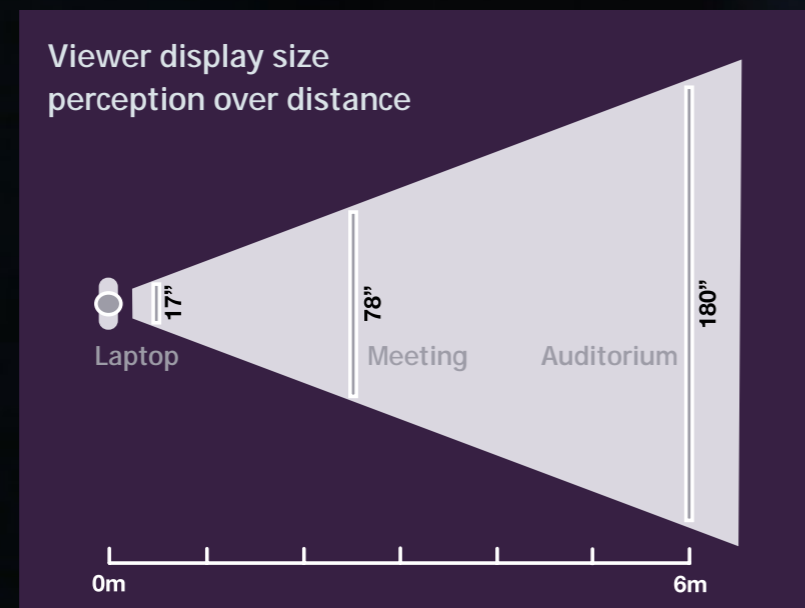

A wireless presentation solution which allows multiple users to wirelessly stream content from their devices to a main meeting room display.

## Size-up your meeting.

In a meeting room, the perception of image size differs according to the distance between the viewer and the screen. For example, at a distance of 4m, a 65" display appears to be the size of a 16" notebook and at 8m, like a 10" iPad. For this reason, the optimal screen size should be considered to ensure productivity and the number of recommended meeting participants should not be exceeded thus ensuring more productive gatherings.

This table offers some typical scenarios, distances and screen sizes to help you define which technology is most likely to fit your requirements.

Typical meeting scenarios include **Huddle Spaces**, **Think Tanks**, **Meeting Rooms**, **Conference Room**, **Board Rooms** and **Auditoriums**

<p><b>Huddle Space</b></p> <p>Whether for impromptu or scheduled meetings, a typical huddle space accommodates 3 to 5 participants within a small private space, equipped for collaboration amongst the group or across the world.</p>		Screen Size <b>&lt;65"</b>	Distance <b>&lt;2.5m</b>	Participants <b>&lt;5</b>
<p><b>Think Tank</b></p> <p>Designed to facilitate outside-of-the-box creativity and brainstorming, the think tank is an informal space, equipped with flexible, modular resources within an inspirational environment, designed to empower original thinking.</p>		Screen Size <b>&lt;86"</b>	Distance <b>&lt;3.0m</b>	Participants <b>&lt;5</b>
<p><b>Meeting Room</b></p> <p>A more conventional meeting space yet equipped with video conferencing and collaborative tools to ensure full inclusion from all participants and enabling anyone to take the lead with content seamlessly switching to the master display.</p>		Screen Size <b>55" - 86"</b>	Distance <b>&lt;6.0m</b>	Participants <b>&lt;15</b>
<p><b>Board Room</b></p> <p>Gathered around the Board Room table, viewing must be equally impressive whether up close or farther away. Where impressions count, a fully equipped prestige board room confirms your reputation as a business leader.</p>		Screen Size <b>&gt;75"</b>	Distance <b>&gt;6.0m</b>	Participants <b>&lt;20</b>
<p><b>Conference Room</b></p> <p>Larger than a traditional meeting space, it is vital to maintain audience attention with large scale, high contrast visuals with seamless switching between presenters for a slick delivery, ensuring impressive and productive conferences.</p>		Screen Size <b>&gt;75"</b>	Distance <b>&gt;6.0m</b>	Participants <b>&lt;30</b>
<p><b>Auditorium</b></p> <p>Broadcasting information to a large group, super large format visualization helps to anchor your audiences' attention, even those on the back row, to ensure your message delivers with full impact.</p>		Screen Size <b>&gt;100"</b>	Distance <b>&gt;6.0m</b>	Participants <b>&gt;30</b>
