Part No.: [462136](#)

EAN-13: 0766623462136 | UPC: 766623462136

Monitor and Laptop Stand - Free up your desk space and create an ergonomic dual-display setup

Create a cost-effective dual-monitor setup by integrating your laptop as a second display with this Combo Mount from Manhattan. It optimizes your workspace by elevating your notebook and monitor off your desk where it positions them both ergonomically at eye-level. The extra screen space helps you multitask for maximized productivity without the need to buy an expensive second monitor. This Monitor and Laptop Stand lets you have an application or document open on one monitor while you work on the other for less time and hassle flipping back and forth between programs.

Maximum compatibility

This Combo Mount's monitor arm supports 75x75/100x100 VESA-compliant displays up to 32" and weighing up to 8 kg (17 lbs.) while the tray supports every laptop from 10" to 17" and up to 8 kg (17 lbs.), such as HP[®], Apple[®] MacBook[®] Pro / Air, Lenovo[®] ThinkPad[®], Asus[®], Dell[®] and more. The monitor arm is perfect for smaller work environments like cubicles, providing everything

you need while using less space. The C-clamp lets you install the Monitor and Laptop Stand at the edge of a desk, table, or counter that has a thickness of 10 to 88 mm (0.4 to 3.5 in.) so you can avoid drilling holes into your furniture.

Full-motion view optimization

You can adjust the height of the stand so that the laptop is in line with the monitor, giving you all the efficiency of working with two displays. The full-motion arms let you extend, tilt and swivel across multiple axes, so it's easy to create an ergonomic workspace that fits your exact needs. You can also rotate your monitor from landscape to portrait orientation to view photos in portrait mode or see longer pages and blocks of code without having to scroll down. Tilt the tray completely flat for it to securely hold a projector.

Ventilation and cable management

Integrated cable management clips keep your cords tidy and organized. The vented laptop tray provides air circulation to help your laptop or tablet cool properly for peak performance that lasts.

Features:

- Desk-mount 2-in-1 ergonomic workspace optimizer that raises your display and notebook off your desk
- VESA-compliant mount on double-link swing arm for one 13" to 32" monitor up to 8 kg (17 lbs.)
- Tray for one 10" to 17" laptop up to 8 kg (17 lbs.)
- Offers 180° swivel, +90° / -35° tilt and height adjustment along the 800 mm (31 in.) pole for optimized views
- Supports 360° rotation for landscape or portrait display orientation
- Creates a dual-monitor setup by integrating your notebook as a second display
- Allows tray to be tilted completely horizontal for use as a holder for a projector up to 8 kg (17 lbs.)
- Meets VESA standards: 75x75, 100x100
- Includes C-clamp for drill-free installation at the edge of a desk, table or counter that is 10 to 88 mm (0.4 to 3.5 in.) thick
- Heavy-duty steel construction with powder coating
- Built-in cable management to minimize clutter
- Ideal for (home) office, studio, IT network and security applications
- Lifetime warranty

Specifications:
