Workstation dock and charging powerhouse in one

The Manhattan USB-C 8-in-1 Dock with Wireless Charging Pad is your multipurpose solution for charging devices, linking to peripherals and connecting a display.

More connectivity options

This dock offers three USB 3.2 Gen 1 ports so you can be more productive. You can easily connect peripherals such as a mouse and keyboard or access external storage such as USB sticks or hard drives and get data transfer speeds up to 5 Gbps. For data transfers from card readers, the dock offers two card reader slots for SD and microSD cards. The Dock's HDMI port takes your device to the big screen – connect it to a display or projector and enjoy super clear UHD with resolutions up to 4K@30Hz.

Charging galore

The three USB-A ports are not limited to adding peripherals. Use them to charge mobile devices at speeds up to 1.5 A per port. If you have a compatible smartphone, you can fast charge it wirelessly with a current up to 10 A. Just place it on the tempered-glass top. If you connect a Power Delivery charger to the USB-C port, that port can supply power to all the attached devices in your setup, including your notebook, with available power up to 60 W. The dock's overload, overcurrent and overheat protection keep your devices safe.
