

IRIS

Deliver a clear message

**THIS IS MORE THAN TECHNOLOGY.
THIS IS YOUR BUSINESS.**

IN BEAUTIFUL 4K RESOLUTION.

Congratulations! You've made the right decision. By purchasing the Trust IRIS you've made video conferences a lot more productive.

Please register your purchase to receive the latest firmware and stability updates at: trust.com/videoconferencing/register

**EXPAND YOUR VIDEO CONFERENCE EXPERIENCE BY
ADDING THE FOLLOWING OPTIONAL PRODUCTS:**

24285
EXTENDED CABLE

If the included 3m long cable isn't long enough to place the Trust Iris where you'd like, the extended cable is there to help you out.

24074
EXTENDED MICROPHONE

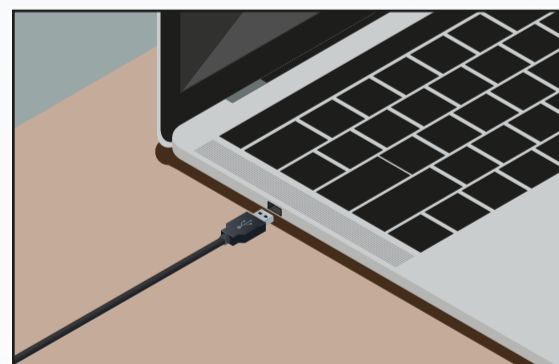

By adding the extended microphone to the IRIS, up to 8 people will be able to fully utilise the functionality of the camera, even if you're in a large conference room.

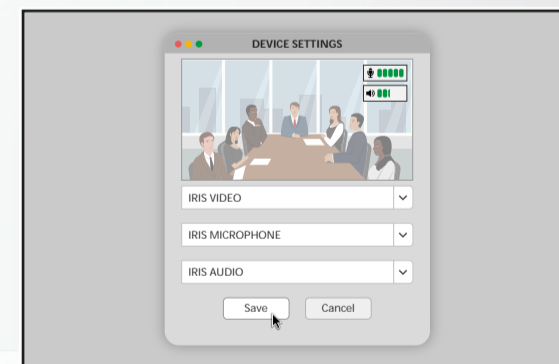

HOW TO CONNECT

Connecting the IRIS to your laptop is easy. Just plug in the included USB cable and the device will automatically be recognised. By following the 4 steps shown below, you'll be conferencing in no time.

1. Plug the USB cable into a free USB port in your laptop or desktop computer

2. Set your default audio, microphone and video settings to IRIS

3. Choose your preferred auto tracking mode on the included remote control

4. Start conferencing and get to work

QUICK START GUIDE

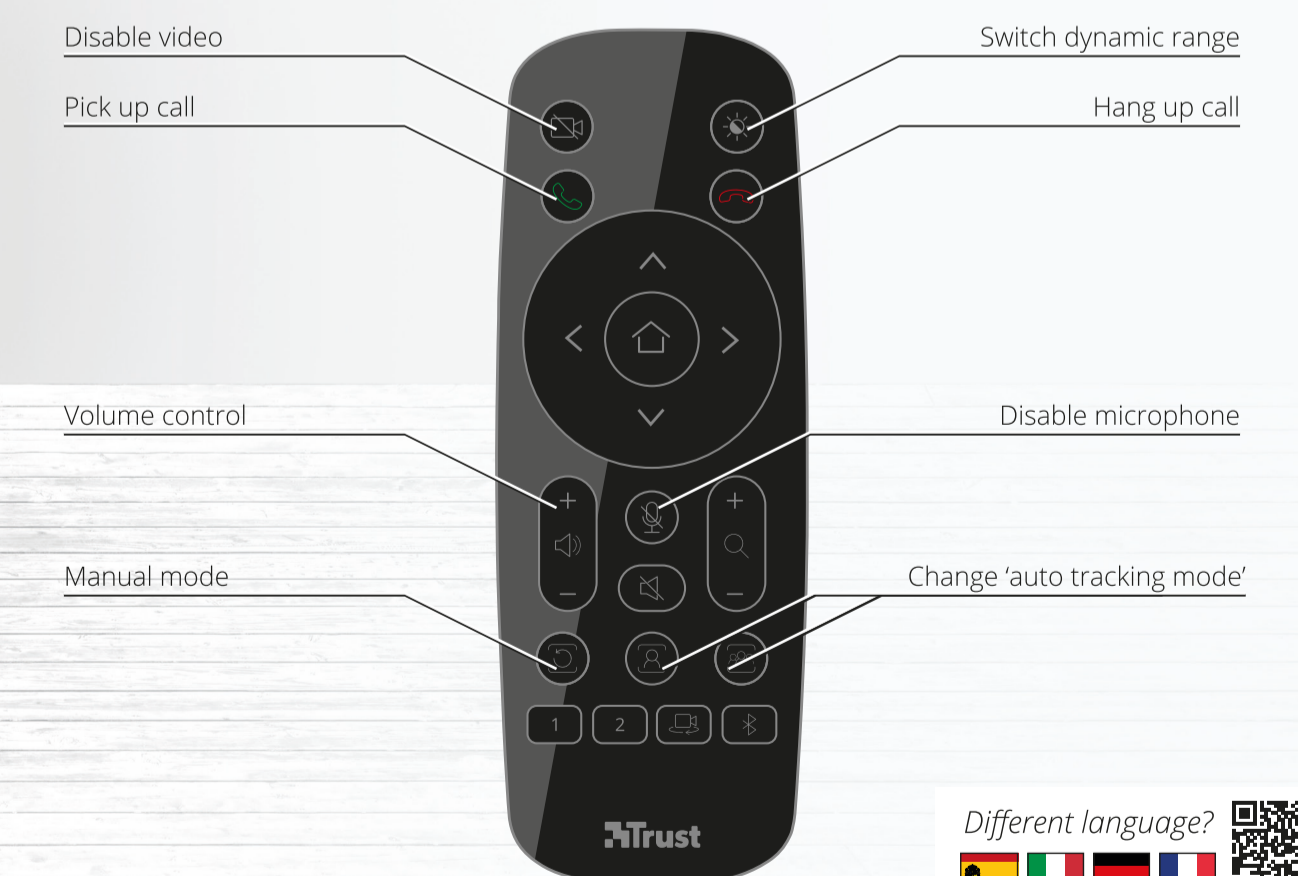

By folding this leaflet into a triangle and placing it on the table, you'll always have this handy quick start guide nearby.

REMOTE FEATURES

The included remote is packed with features to make your video conferences more productive. Everything, from picking up calls to adjusting the volume, is done with the remote. With the IRIS you're in full control of your meetings.

Below you'll find some of the most-used features. For more information, please refer to the user manual.
