Important Safety Instructions for Battery Chargers

SAVE THESE INSTRUCTIONS: This manual contains important safety and operating instructions for the BDFC240 and FS240FC battery chargers.

- Before using charger, read all instructions and cautionary markings on charger, battery pack, and product using battery pack.

DANGER: Electrocution hazard. 120 volts are present at charging terminals. Do not probe with conductive objects. Electric shock or electrocution may result.

WARNING: Shock hazard. Do not allow any liquid to get inside charger. Electric shock may result.

CAUTION: Burn hazard. To reduce the risk of injury, charge only Black & Decker Slide Pack rechargeable batteries. Other types of batteries may burst causing personal injury and damage.

CAUTION: Under certain conditions, with the charger plugged in to the power supply, the exposed charging contacts inside the charger can be shorted by foreign material. Foreign materials of a conductive nature such as, but not limited to, steel wool, aluminum foil, or any buildup of metallic particles should be kept away from charger cavities. Always unplug the charger from the power supply when there is no battery pack in the cavity. Unplug charger before attempting to clean.

- **These chargers are not intended for any uses other than charging Black & Decker rechargeable batteries.** Any other uses may result in risk of fire, electric shock or electrocution.
- **Do not expose charger to rain or snow.**
- **Pull by plug rather than cord when disconnecting charger.** This will reduce risk of damage to electric plug and cord.
- **Make sure that cord is located so that it will not be stepped on, tripped over, or otherwise subjected to damage or stress.**
- **Do not use an extension cord unless it is absolutely necessary.** Use of improper extension cord could result in risk of fire, electric shock, or electrocution.
- **An extension cord must have adequate wire size (AWG or American Wire Gauge) for safety.** The smaller the gauge number of the wire, the greater the capacity of the cable, that is 16 gauge has more capacity than 18 gauge. When using more than one extension to make up the total length, be sure each individual extension contains at least the minimum wire size.

Recommended Minimum Wire Size for Extension Cords

Total Length of Cord

25 ft.	50 ft.	75 ft.	100 ft.	125 ft.	150 ft.	175 ft.
7.6 m	15.2 m	22.9 m	30.5 m	38.1 m	45.7 m	53.3 m

Wire Size AWG

18	18	16	16	14	14	12
----	----	----	----	----	----	----

- **Do not place any object on top of charger or place the charger on a soft surface that might block the ventilation slots and result in excessive internal heat.** Place the charger in a position away from any heat source. The charger is ventilated through slots in the top and the bottom of the housing.
- **Do not operate charger with damaged cord or plug** — have them replaced immediately.
- **Do not operate charger if it has received a sharp blow, been dropped, or otherwise damaged in any way.** Take it to an authorized service center.
- **Do not disassemble charger; take it to an authorized service center when service or repair is required.** Incorrect reassembly may result in a risk of electric shock, electrocution or fire.
- **Disconnect the charger from the outlet before attempting any cleaning. This will reduce the risk of electric shock.** Removing the battery pack will not reduce this risk.
- **NEVER attempt to connect 2 chargers together.**
- **The charger is designed to operate on standard 120V household electrical power. Do not attempt to use it on any other voltage.**

SAVE THESE INSTRUCTIONS

Introduction

Your charger is designed to use standard 120 volt AC, 60 Hz power. It charges Black and Decker slide pack batteries from 9.6V up to 24V. Do not use DC or any other voltage. Charge time will depend on battery type and capacity. Black & Decker three terminal slide pack batteries are designed for fast charging and most will be charged in one hour or less. Special high capacity batteries may take longer. Two terminal slide pack batteries will be charged at a slower rate to avoid overheating the pack. Most of these will be charged in 2 hours or less.

READ ALL INSTRUCTIONS

- **Do not incinerate the battery pack even if it is severely damaged or is completely worn out.** The battery pack can explode in a fire.
- **A small leakage of liquid from the battery pack cells may occur under extreme usage or temperature conditions.** This does not indicate a failure. However, if the outer seal is broken and this leakage gets on your skin:
 - a. Wash quickly with soap and water.
 - b. Neutralize with a mild acid such as lemon juice or vinegar.
 - c. If battery liquid gets into your eyes, flush them with clean water for a minimum of 10 minutes and seek immediate medical attention. (**Medical Note:** The liquid is 25-35% solution of potassium hydroxide.)
- Charge the battery packs only in Black & Decker chargers.
- **DO NOT** splash or immerse in water or other liquids.
- **Do not store or use the tool and battery pack in locations where the temperature may reach or exceed 105°F (40°) (such as outside sheds or metal buildings in summer).**

DANGER: Electrocution hazard. Never attempt to open the battery pack for any reason. If battery pack case is cracked or damaged, do not insert into charger. Electric shock or electrocution may result. Damaged battery packs should be returned to service center for recycling.

NOTE: Battery storage and carrying caps are provided for use whenever the battery is out of the tool or charger. Remove cap before placing battery in charger or tool.

WARNING: Fire hazard. Do not store or carry battery so that metal objects can contact exposed battery terminals. For example, do not place battery in aprons, pockets, tool boxes, product kit boxes, drawers, etc., with loose nails, screws, keys, etc. without battery cap. **Transporting batteries can possibly cause fires if the battery terminals inadvertently come in contact with conductive materials such as keys, coins, hand tools and the like.** The US Department of Transportation Hazardous Material Regulations (HMR) actually prohibit transporting batteries in commerce or on airplanes (i.e., packed in suitcases and carry-on luggage) UNLESS they are properly protected from short circuits. So when transporting individual batteries, make sure that the battery terminals are protected and well insulated from materials that could contact them and cause a short circuit.

Charging Procedure

1. Plug the charger into an appropriate outlet. **NOTE: Do not charge by means of an engine generator or DC power source. Use only 120V AC.**
2. Insert battery into charger (Fig.1). **Be sure the pack(s) is fully seated in the charger.** The red (charging) light will flash continuously indicating that the charging process has started.
3. The completion of charge will be indicated by the red light remaining ON continuously. The pack is fully charged and may be used at this time or left in the charger.

Fig.1

Charge Indicators

Red light flashes continuously: **Charging**

Red light remains ON continuously: **Charged**

Red light flashing at a fast rate: **Replace Pack**

The charger is designed to detect certain problems that can arise with battery packs which would be indicated by the **red light flashing at a fast rate.** If this occurs, re-insert battery pack. If problem persists, try a different battery pack to determine if the charger is OK. If the new pack charges correctly, then the original pack is defective and should be returned to a service center for recycling. If the new battery pack gives the same trouble indication as the original, have charger tested at an authorized service center.

Red light flashes long, then short (dash dot, dash dot): **Hot Pack Delay**

When the charger detects a battery that is hot, it automatically starts a Hot Pack Delay, suspending charging until the battery has cooled. After the battery has cooled, the charger automatically switches to the Pack Charging mode. This feature ensures maximum battery life. The **red light flashes long, then short (dash dot, dash dot)** while in the Hot Pack Delay mode.

Wall Mounting (Figure 2)

A mounting hole is provided for mounting the charger on a vertical surface.

MOUNTING HOLE

Fig.2

Leaving the Battery Pack in the Charger

The charger and battery pack can be left connected with the red light glowing indefinitely. The charger will keep the battery pack fresh and fully charged.

NOTE: A battery pack will slowly lose its charge when kept out of the charger. If the battery pack has not been kept on maintenance charge, it may need to be recharged before use. A battery pack may also slowly lose its charge if left in a charger that is not plugged into an appropriate AC source.

Important Charging Notes

1. Longest life and best performance can be obtained if the battery pack is charged when the air temperature is between 65°F and 75°F (18° - 24°C). **DO NOT** charge the battery pack in an air temperature below +40°F (+4.5°C), or above +105°F (+40.5°C). This is important and will prevent serious damage to the battery pack.
2. The charger and battery pack may become warm to touch while charging. This is a normal condition, and does not indicate a problem. To facilitate the cooling of the battery pack after use, avoid placing the charger or battery pack in a warm environment such as in a metal shed, or an uninsulated trailer.
3. If the battery pack does not charge properly:
 - a. Check current at receptacle by plugging in a lamp or other appliance
 - b. Check to see if receptacle is connected to a light switch which turns power off when you turn out the lights.
 - c. Move charger and battery pack to a location where the surrounding air temperature is approximately 65°F - 75°F (18° - 24°C).
 - d. If charging problems persist, take the tool, battery pack and charger to your local service center.
4. The battery pack should be recharged when it fails to produce sufficient power on jobs which were easily done previously. **DO NOT CONTINUE** to use under these conditions. Follow the charging procedure. You may also charge a partially used pack whenever you desire with no adverse affect on the battery pack.
5. Under certain conditions, with the charger plugged into the power supply, the exposed charging contacts inside the charger can be shorted by foreign material. Foreign materials of a conductive nature such as, but not limited to, steel wool, aluminum foil, or any buildup of metallic particles should be kept away from charger cavities. Always unplug the charger from the power supply when there is no battery pack in the cavity. Unplug charger before attempting to clean.
6. Do not freeze or immerse charger in water or any other liquid.

WARNING: Shock hazard. Do not allow any liquid to get inside charger. Electric shock may result.

CAUTION: Never attempt to open the battery pack for any reason. If the plastic housing of the battery pack breaks or cracks, return to a service center for recycling.

This Class B digital apparatus complies with Canadian ICES-003.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This

INFORMACIÓN DE MANTENIMIENTO

Todos los Centros de servicio de Black & Decker cuentan con personal altamente capacitado dispuesto a brindar a todos los clientes un servicio eficiente y confiable en la reparación de herramientas eléctricas. Si necesita consejo técnico, reparaciones o piezas de repuesto originales de fábrica, póngase en contacto con el centro de servicio de Black & Decker más cercano a su domicilio. Para ubicar su centro de servicio local, consulte la sección "Herramientas eléctricas" (Tools-Electric) de las páginas amarillas, llame al 1-800-544-6986 o visite nuestro sitio www.blackanddecker.com.

GARANTÍA COMPLETA DE DOS AÑOS PARA USO EN EL HOGAR

Black & Decker (Estados Unidos) Inc. ofrece una garantía de dos años por cualquier defecto del material o de fabricación de este producto. El producto defectuoso se reparará o reemplazará sin costo alguno de dos maneras.

La primera opción, el reemplazo, es devolver el producto al comercio donde se adquirió (siempre y cuando se trate de un comercio participante). Las devoluciones deben realizarse conforme a la política de devolución del comercio (generalmente, entre 30 y 90 días posteriores a la venta). Le pueden solicitar comprobante de compra. Consulte en el comercio acerca de la política especial sobre devoluciones una vez excedido el plazo establecido.

La segunda opción es llevar o enviar el producto (con flete pago) a un Centro de servicio propio o autorizado de Black & Decker para su reparación o reemplazo según nuestro criterio. Le pueden solicitar el comprobante de compra. Los Centros de servicio autorizados y de propiedad de Black & Decker se detallan en la sección

"Herramientas eléctricas" (Tools-Electric) de las páginas amarillas de la guía telefónica.

Esta garantía no se extiende a los accesorios. Esta garantía le concede derechos legales específicos; usted puede tener otros derechos que pueden variar según el estado o la provincia. Si tiene alguna pregunta, comuníquese con el gerente del Centro de servicio de Black & Decker de su zona. Este producto no está diseñado para uso comercial.

AMÉRICA LATINA: esta garantía no se aplica a los productos que se venden en América Latina. Para los productos que se venden en América Latina, debe consultar la información de la garantía específica del país que viene en el empaque, llamar a la compañía local o visitar el sitio Web a fin de obtener esa información.

2 AÑOS DE GARANTIA

Este producto cuenta con dos años de garantía a partir de la fecha de compra contra cualquier defecto de su funcionamiento, así como cualquier falla debido a materiales empleados para su fabricación ó mano de obra defectuosa.

Nuestra garantía incluye la reparación o reposición del producto y/o componentes sin cargo alguno para el cliente incluyendo la mano de obra, esta incluye los gastos de trasportación erogados para lograr cumplimiento de esta garantía en los domicilios diversos señalados.

Para hacer efectiva esta garantía deberá presentar su herramienta y esta póliza sellada por el establecimiento comercial donde se adquirió el producto.

Nos comprometemos a entregar el producto en un lapso no mayor a 30 días hábiles contados a partir de la fecha de recepción del mismo en nuestros talleres de servicio autorizados.

ESTA GARANTIA NO APLICA CUANDO:

El producto se hubiese utilizado en condiciones distintas a las normales.

El producto no hubiese sido operado de acuerdo con el instructivo de uso que se acompaña.

El producto hubiese sido alterado o reparado por personas no autorizadas por nosotros.
