

5-in-1 Cable Tester

Tests Ethernet (RJ45), 10Base2 / BNC, RJ11, USB and FireWire

Part No.: 780094

EAN-13: 0766623780094 | UPC: 766623780094

The Intellinet Network Solutions 5-in-1 Cable Tester is an affordable and versatile MIS tool that tests five common LAN and computer cables up to 600 ft. long: Ethernet (RJ45), 10Base, RJ11, FireWire (1394) and USB. It checks for continuity, crossover and shorting. Testing is completed with the press of a button, and LEDs indicate connections and faults of wires and pins. Designed for use with both shielded (STP) and unshielded (UTP) cables up to 180 m (600 ft.) long.

Features:

- Versatile cable tester for five commonly used network and computer cables
- For Cat5/6 network and ISDN connection tests
- USB AB- and IEEE1394 6-pin FireWire cable tester
- Connection test with LED indicators for 8 single lines and screening
- Tests for: Short, Non-Parallel, No Connection
- Quality protective pouch
- Lifetime Warranty

Specifications:

- Open / Short wiring test
- Connected wires display
- No Connection / No Termination indicator

- Bad Connection / Non-Parallel Connection indicator
- Ethernet (RJ45), 10Base2 / BNC, RJ11, USB and FireWire testing options

Package Contents

- Cable Tester
