## CS3030 SOLID STATE DRIVES

The PNY XLR8 CS3030 M.2 NVMe SSD is an excellent choice for an NVMe upgrade from a SATA based solid state drive (SSD) in an existing NVMe enabled PC or MAC desktop or laptop computer. The CS3030 drive is designed to be a high performance SATA SSD replacement to help realize faster boot times, quicker application launches, and better overall system performance. Do more in less time with NVMe; boot up, power down, and load applications up to 6 times faster than with SATA based SSD's. With no moving parts, the PNY XLR8 CS3030 M.2 NVMe SSD is highly durable, less likely to fail, and supports up to 5 years of warranty.

The PNY XLR8 CS3030 M.2 NVMe Solid State Drive is the ideal solution to upgrade from a SATA based solid state drive (SSD) in an existing NVMe enabled PC or Mac desktop or laptop computer. The NVMe interface delivers exceptional performance of up to 3,500MB/s seq. read and 3,000MB/s seq. write speeds. It is designed to be a high performance SATA SSD replacement to help realize faster boot times, quicker application launches, and better overall system performance. With no moving parts, the PNY XLR8 CS3030 is highly durable, less likely to fail, and supports up to 5 years of warranty.

The PNY XLR8 CS3030 is engineered with the same level of quality and durability that our consumers have enjoyed with the CS900 and CS1311 SSDs. We've taken the world's most advanced NAND flash and refined the CS3030 to achieve a higher threshold for endurance and reliability. PNY's extensive testing and rigorous validation process ensures compatibility across various platforms and multiple operating systems.
